Biology. It's a great book to have right next to your Embryology and Developmental Biology class notes. The illustrations and explanations are detailed and make this a fabulous addition to a first-year medical student's library. Human Embryology and Developmental Biology: With STUDENT ... Human embryonic development, or human embryogenesis, refers to the development and formation of the human embryo. It is characterised by the processes of cell division and cellular differentiation of the embryo that occurs during the early stages of development. In biological terms, the development of the human body entails

growth from a one-celled zygote to an adult human being. Fertilisation occurs when the sperm cell successfully enters and fuses with an egg cell.
