Cracking the AP World History Exam, 2019 Edition Cengage Learning

A pioneering text which covers the urban society of early modern Europe as a whole. Challenges the usual emphasis on regional diversity by stressing the extent to which cities across Europe shared a common urban civilization whose major features remained remarkably constant throughout the period. After outlining the physical, political, religious, economic and demographic parameters of urban life, the author vividly depicts the everyday routines of city life and shows how pitifully vulnerable city-dwellers were to disasters, epidemics, warfare and internal strife.

The Routledge History of Poverty, c.1450-1800 is a pioneering exploration of both the lives of the very poorest during the early modern period, and of the vast edifices of compassion and coercion erected around them by individuals, institutions, and states. The essays chart critical new directions in poverty scholarship and connect poverty to the environment, debt and downward social mobility, material culture, empires, informal economies, disability, veterancy, and more. The volume contributes to the understanding of societal transformations across the early modern period, and places poverty and the poor at the centre of these transformations. It also argues for a wider

definition of poverty in history which accounts for much more than economic and social circumstance and provides both analytically critical overviews and detailed case studies. By exploring poverty and the poor across early modern Europe, this study is essential reading for students and researchers of early modern society, economic history, state formation and empire, cultural representation, and mobility.

In early modern Catholic Europe and its colonies priests frequently developed close relationships with pious women, serving as their spiritual directors during their lives, and their biographers after their deaths. In this richly illustrated book, Jodi Bilinkoff explores the ways in which clerics related to those female penitents whom they determined were spiritually gifted, and how they conveyed the live stories of these women to readers. The resulting popular literatures of hagiography and spiritual autobiography produced hundreds of texts designed to establish models of behavior for the Catholic faithful in the period between the advent of printing and the beginning of the modern age. Bilinkoff finds that confessional relations and the texts that document them reveal much about gender and social values. She uses life narratives, primarily from Spain, but also from France, Italy, Portugal, Spanish America, and French Canada, to examine the ways in which clerics presented female penitents as exemplary, and how they constructed their own identities around their interactions with exceptional women. These multilayered texts, she suggests, offer compelling accounts of individuals caught up in the pursuit of holiness, and provide a key to

understanding the resilience of Catholic culture in an age of religious change and conflict.
