What will you learn from this book? It's no secret the world around you is becoming more connected, more configurable, more programmable, more computational. You can remain a passive participant, or you can learn to code. With Head First Learn to Code you'll learn how to think computationally and how to write code to make your computer, mobile device, or anything

with a CPU do things for you. Using the Python programming language, you'll learn step by step the core concepts of programming as well as many fundamental topics from computer science, such as data structures, storage, abstraction, recursion, and modularity. Why does this book look so different? Based on the latest research in cognitive science and learning theory, Head First Learn to Code uses a visually rich format to engage your mind, rather than a text-heavy approach that puts you to sleep. Why waste your time struggling with new concepts? This multi-sensory learning experience is designed for the way your brain really works.

In 1939, everything changes for Anne Girl when outsider John Nelson grounds his sailboat on the shores, into Anne Girl's skiff, and into her life during a rare storm in the Alaskan fishing village of Nushagak. When Anne Girl and her mother Marulia find their skiff flattened by John's boat, Anne Girl decides she both hates and wants him. Thus begins a generational saga of strong, stubborn Yup'ik women living in a village that has been divided between the new and the old, the bluff side

**A Brain-Friendly Guide to Passing the Project Management Professional Exam** Ssi Logic Aileen's view on PMP Exam Preparation To learn to ride a bike, a person must ride a bike. To learn to pass the PMP(r) Exam, a person must practice with hundreds and hundreds of PMP(r) Exam Prep sample questions. This book is the first book in our series of mini- books - PMP(r) Exam Preparation Simplified Series Over the last 16 years Aileen has helped over 10,000 project managers in her workshops obtain their PMP(r) credential. Often the participants in Aileen's workshops are successful project managers who may lack experience is specific topics on the PMP(r) Exam. The topics that participants seem to struggle with the most are: Earned value Management (EVM) Contract types and calculations(FPIF, CPIF, PTA, etc.) Network diagrams including float, free float, project float, leads and lags Financial based questions including IRR, ROI, etc. Statistical based questions There is one thing all of these areas have in common and it is math. Aileen has decided to create mini-books in each of these areas so that students can gain both the knowledge and the confidence to get these questions right. Many project managers want to study just enough to pass the PMP(r) Exam and not one second more.Aileen's view is to practice on enough sample questions in each area so that the project manager is confident he/she will never get a question in that area wrong. While the primary goal of this book and Aileen's workshops is to help you pass the PMP(r) Exam, Aileen hopes that you will also walk away as a more knowledgeable and successful project manager.
