Ross Morrison McGill, aka @TeacherToolkit believes that becoming a teacher is one of the best decisions you will ever make, but after more than two decades in the classroom, he knows that it is not an easy journey! Packed with countless anecdotes, from disastrous observations to marking in the broom cupboard, TE@CHER TOOLKIT is a compendium of teaching strategies and advice, which aims to motivate, comfort, amuse and above all reduce the workload of a new teacher. The book

includes humorous illustrations, photocopiable templates, a new-look 5 minute plan and QR codes to useful videos. This limited edition hardback version will be an invaluable addition to your school CPD library or a long-lasting bible to keep with you throughout your teaching career. As anyone who has followed him on Twitter knows, Ross is not afraid to share the highs and lows of his own successes and failures. He strives to share great teaching practice, to save you time and to ensure you are the best teacher you can be, whatever the new policy or framework. His eagerly-awaited new book continues in this vein and is a must-read for all new teachers. Vitruvian teaching will help you survive your first five years: Year 1: Be resilient (surviving your NQT year) Year 2: Be intelligent (refining your teaching) Year 3: Be innovative (take risks) Year 4: Be collaborative (share and work with others now your classroom practice is secure) Year 5: Be aspirational (moving towards middle leadership) Start working towards Vitruvian today. **Seven Questions about Apprenticeships** Andesite Press This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. The role of educational leaders has changed radically as countries attempt to transform their education systems to prepare young people to function in today's world of rapid technological and social change, economic globalization, and increased migration and mobility. This book argues that, in order to achieve this transformation, there is an urgent need for new paradigms of schooling. It offers practical advice on how to bring about such breakthrough change from within schools. Dancing on a Shifting Carpet documents how schools can reinvent themselves to meet the needs of contemporary and future students. The book describes and explains specific models that can be used. It recommends a leadership model that schools could adopt to facilitate their reinvention, and it provides specific advice on how

to develop and sustain reinvented cultures in their schools. It also suggests a new methodology for insider researchers in positions of power within their own organization.

The OECD education indicators enable countries to see themselves in light of other countries performance. They reflect on both the human and financial resources invested in education and on the returns of these investments.

*Education at a Glance* Aust Council for Ed Research

After a period of relative neglect in many countries, apprenticeships and other forms of work-based learning are experiencing a revival. Their effectiveness in easing school-to-work transitions and serving the economy is increasingly recognised. However, engaging individuals, employers, social partners and education and training systems in such learning remains a significant challenge. In light of this, *Seven Questions about Apprenticeships* draws out policy messages on how to design and implement high-quality apprenticeships, using material from the OECD project Work-based Learning in Vocational Education and Training. It presents answers to seven questions commonly asked by governments and practitioners seeking to either introduce or reform apprenticeship systems for young people and/or older workers. Can apprenticeships provide a useful contribution in every country? Should employers receive financial incentives for providing apprenticeships? What is the right wage for apprentices, and how long should an apprenticeship last? How can we ensure a good learning experience at work? How can apprenticeships be made to work for youth at risk? And how to attract potential apprentices? The study establishes principles of effective practice by building on new analytical work and examples of effective practice from around the world.
