Apex Legends: Overtime #1 47North

In the gripping sequel to the Philip K. Dick Award-winning novel *The Book of the Unnamed Midwife*, one woman undertakes a desperate journey to rescue the future. Etta comes from Nowhere, a village of survivors of the great plague that wiped away the world that was. In the world that is, women are scarce and childbearing is dangerous...yet desperately necessary for humankind's future. Mothers and midwives are sacred, but Etta has a different calling. As a scavenger. Loyal to the village but living on her own terms, Etta roams the desolate territory beyond: salvaging useful relics of the ruined past and braving the threat of brutal slave traders, who are seeking women and girls to sell and subjugate. When slavers seize those she loves, Etta vows to release and avenge them. But her mission will lead her to the stronghold of the Lion—a tyrant who dominates the innocent with terror and violence. There, with no allies and few weapons besides her wits and will, she will risk both body and spirit not only to save lives but also to liberate a new world's destiny.

When it feels like everything in the world is stacked against you, it's easy to claim that it's the devil's doing. But what if that were true? For a teenager like Nexus, having to deal with school, supernatural traits, and the hustle and bustle of 31st century living, life is hard enough. But when misfortune seems to meet him at every turn, it's no wonder he places the blame all on some devil. Especially when that devil appears before him. Things take a turn for the worse when his closest friend, Darius, disappears. It's at that moment, he realizes that this is bigger than him. Something has to be done. Something has to change. Desperate to find a way to bring his friend back, he reluctantly teams up with his classmates, Noah, Lynn, and Kai. All of them share a bond with Darius, and all of them are just as concerned. But given the fact that none of them possess any clue about demons, devils, or this entire world of darkness, who's to say what lies ahead for them?

Bioengineer Peter Bernhardt has dedicated his life to nanotechnology, the science of manipulating matter on the atomic scale. As the founder of Biogineers, he is on the cusp of revolutionizing brain therapies with microscopic nanorobots that will make certain degenerative diseases a thing of the past. But after his research is stolen by an unknown enemy, seventy thousand people die in Las Vegas in one abominable moment. No one is more horrified than Peter, as this catastrophe sets in motion events that will forever change not only his life but also the course of human evolution. Peter's company is torn from his grasp as the public clamors for his blood. Desperate, he turns to an old friend, who introduces him to the Phoenix Club, a cabal of the most powerful men in the world. To make himself more valuable to his new colleagues, Peter infuses his brain with experimental technology, exponentially upgrading his mental prowess and transforming him irrevocably. As he's exposed to unimaginable wealth and influence, Peter's sense of reality begins to unravel. Do the club members want to help him, or do they just want to claim his technology? What will they do to him once they have their prize? And while he's already evolved beyond mere humanity, is he

advanced enough to take on such formidable enemies and win?

Energy and Environmental Law and Policy Series #41 We know the science of climate change; we know the economics of climate change; we also know the law of climate change. However, we do not know how countries may come together to cooperate on climate change mitigation. In this connection, the role of international trade in climate change, although universally acknowledged, is not well understood. This groundbreaking book by one of the world's foremost authorities on international economic law not only investigates this role in great depth, but also explains how free trade agreements can be used as a powerful tool to help mitigate climate change. Focusing on the idea of climate clubs—namely the coalition of the willing—among governments, companies, and/or international institutions, the book offers insightful analysis on aspects of the trade-climate linkage such as: formation of climate clubs; legitimacy and accountability; technological cooperation; green patents; how competition law hinders effective cooperation between companies seeking to produce sustainable goods; domestic policy preferences; recognizing States that should legitimately be allowed to be free riders; and sanctions for noncompliance. Three detailed case studies are included: a comparison of the U.S. and European Union (EU) Generalized System of Preferences (GSP) programs, energy security in the Arab world, and EU-Russia energy trade relations. With the author's conviction that global access to energy, mitigating climate change, and benefit from international trade and investment all can be achieved, this book offers a fresh understanding of the international trading system as a way to reach a prosperous, modern, and sustainable society that will help decarbonize the economy effectively. It will be welcomed by all professionals and policymakers concerned with climate change mitigation, and particularly by those active at its nexus with international trade.

Ancient authors emphasize dramatic moments in the life of Julia Domna, wife of Roman emperor Septimius Severus (193-211). They accuse her of ambition unforgivable in a woman, of instigating civil war to place her sons on the throne, and of resorting to incest to maintain her hold on power. In imperial propaganda, however, Julia Domna was honored with unprecedented titles that celebrated her maternity, whether it was in the role of mother to her two sons (both future emperors) or as the metaphorical mother to the empire. Imperial propaganda even equated her to the great mother goddess, Cybele, endowing her with a public prominence well beyond that of earlier imperial women. Her visage could be found gracing everything from state-commissioned art to privately owned ivory dolls. In *Maternal Megalomania*, Julie Langford unmasks the maternal titles and honors of Julia Domna as a campaign on the part of the administration to garner support for Severus and his sons. Langford looks to numismatic, literary, and archaeological evidence to reconstruct the propaganda surrounding the empress. She explores how her image was tailored toward different populations, including the military, the Senate, and the people of Rome, and how these populations responded to propaganda about the empress. She employs Julia Domna as a case study to explore
