This is the chapter slice "How Your School Uses Energy Gr. 5-8" from the full lesson plan "Reducing Your School's Carbon Footprint" Bring climate change to the classroom by teaching students about their school's carbon footprint. Our resource helps students determine their school's carbon footprint and what they can do to make it smaller. Identify fossil fuels used at school and how they make your life more convenient. Brainstorm ways to reduce energy used in your school. Recognize the benefits of adding idle-free zones to your school. Explore events in the history of a slice of bread that caused the emission of greenhouse gases. Calculate the amount of carbon dioxide trees would remove from the atmosphere if they were planted around the perimeter of your school. Complete a project that will lead to a reduced school footprint. Find out how carbon offsets help reduce a school's carbon footprint. Written to Bloom's Taxonomy and STEAM initiatives, additional graphic organizers, carbon footprint calculator, crossword, word search, comprehension quiz and answer key are also included.

Accentuate The Negative Prentice Hall

Principles of Neurobiology, Second Edition presents the major concepts of neuroscience with an emphasis on how we know what we know. The text is organized around a series of key experiments to illustrate how scientific progress is made and helps upper-level undergraduate and graduate students discover the relevant primary literature. Written by a single author in a clear and consistent writing style, each topic builds in complexity from electrophysiology to molecular genetics to systems level in a highly integrative approach. Students can fully engage with the content via thematically linked chapters and will be able to read the book in its entirety in a semester-long course. *Principles of Neurobiology* is accompanied by a rich package of online student and instructor resources including animations, figures in PowerPoint, and a Question Bank for adopting instructors.
