ASHLEY REEVES

Critical Perspectives on Business and Management Psychology Press
This volume offers fresh insights into economic development and growth in emerging economies. It includes

contributions covering topics such as natural disasters and income inequalities, the environmental impact of economic growth, social preferences, information and market disorder under democracy, inflation targeting and its covariates, economic empowerment. This book is intended for scholars in the field of economics, and those interested in furthering economic development.

Intimate Economies of Immigration

Detention Taylor & Francis

This collection explores the complex dynamics of corporate land deals from a broad agrarian political economy perspective, with a special focus on the implications for property and labour regimes, labour processes and structures of accumulation. This involves looking at ways in which existing patterns of rural social differentiation – in terms of class, gender, ethnicity and generation – are being shaped by changes in land use and property relations, as well as by the re-organization of production and exchange as rural communities and resources are incorporated into global commodity chains. It goes further than the descriptive ‘what’ and ‘who’ questions, in order to understand the ‘how’ and

‘why’ of these patterns. It is empirically solid and theoretically sophisticated, making it a robust and boundary-changing work. Contributors come from various scholarly disciplines. Covering nearly all regions of the world, the collection will be of interest to researchers from various disciplines, policymakers and activists. This book was originally published as a Special Issue of the Journal of Peasant Studies.

From Corporate to Social Media

Berghahn Books

Essays discuss the relationship between politics and environmentalism, including methods proposed and those used to solve environmental problems, how regulation has changed over the years, and how trade affects the environment.

Critical Perspectives Taylor & Francis

This ambitious volume chronicles and analyzes from a critical globalization perspective the social, economic, and political changes sweeping across Latin America from the 1970s through the present day. Sociologist William I. Robinson summarizes his theory of globalization and discusses how Latin America's political economy has changed as the states integrate into the new global production and financial system, focusing specifically on the rise of nontraditional agricultural exports, the explosion of maquiladoras, transnational tourism, and the export of labor and the import of remittances. He follows with an overview of the clash among global capitalist forces, neoliberalism, and the new left in Latin America, looking closely at the challenges and dilemmas

resistance movements face and their prospects for success. Through three case studies—the struggles of the region's indigenous peoples, the immigrants rights movement in the United States, and the Bolivarian Revolution in Venezuela—Robinson documents and explains the causes of regional socio-political tensions, provides a theoretical framework for understanding the present turbulence, and suggests possible outcomes to the conflicts. Based on years of fieldwork and empirical research, this study elucidates the tensions that globalization has created and shows why Latin America is a battleground for those seeking to shape the twenty-first century's world order.

Kantian Business Ethics Edward Elgar

Publishing

The first in-depth analysis of how global governance impacts on the lives of ordinary people. This new volume includes four detailed case studies on labour, migration, children and development that explore the actual nature of governance policies in the GPE. Jean Grugel and Nicola Piper clearly show how global governance, the creation of global norms and regimes to regulate politics, economic and social actors, suggests and promotes ideals such as stable politics, democracy, human rights and individualism, with a strategy to create a more ordered and ultimately better world. They move away from the traditional focus on élites, states and global institutions to explore and analyze how liberal global

governance is really affecting ordinary people and how this is often an obstacle to development, citizenship, voice and inclusion. Paying particular attention to the global South, Asia and Latin America, these expert authors trace the development of liberal global governance. They also clearly examine and study how this regulation has spread from areas such as trade and investment, to development, labour, migration, children and the environment. *Entrepreneurship* Routledge
Der Gesellschaftstheorie ist die Arbeit und mit ihr die empirische Fundierung abhandengekommen, der Arbeitssoziologie die Theorie - aufgrund dieses Befundes wurde "Kapitalismustheorie und Arbeit" zum Standardwerk. Die Autorinnen und

Autoren diskutieren nun in der aktualisierten englischen Auflage des Bandes die gegenwärtigen theoretischen Ansätze, um Kapitalismus und Arbeit wieder zusammenzudenken.

Universities and Globalization

Routledge

The legendary Greek figure Orpheus was said to have possessed magical powers capable of moving all living and inanimate things through the sound of his lyre and voice. Over time, the Orphic theme has come to indicate the power of music to unsettle, subvert, and ultimately bring down oppressive realities in order to liberate the soul and expand human life without limits. The liberating effect of music has been a particularly important theme in twentieth-century African American

literature. The nine original essays in *Black Orpheus* examines the Orphic theme in the fiction of such African American writers as Jean Toomer, Langston Hughes, Claude McKay, James Baldwin, Nathaniel Mackey, Sherley Anne Williams, Ann Petry, Ntozake Shange, Alice Walker, Gayl Jones, and Toni Morrison. The authors discussed in this volume depict music as a mystical, shamanistic, and spiritual power that can miraculously transform the realities of the soul and of the world. Here, the musician uses his or her music as a weapon to shield and protect his or her spirituality. Written by scholars of English, music, women's studies, American studies, cultural theory, and black and Africana studies, the essays in this interdisciplinary collection ultimately

explore the thematic, linguistic structural presence of music in twentieth-century African American fiction.

Human Resource Management M.E. Sharpe

This critical reader of original essays places the boom and bust years of the Internet in a broad cultural context. Exploring the world of html, web browsers, cookies, online net guides, portals, and Internet service providers, this text includes the history of the Internet, interesting case studies and discussions on online community, user inequalities, and governance. Within the larger issues of technological infrastructure, government policy, and globalization, *Critical Perspectives on the Internet* highlights both the limitations and possibilities of everyday Internet

use. Does the net function as a space for radical social and political change? For challenging established media? What opportunities lie in the cracks and crevasses of net structure? With its critical agenda for Internet studies, this text is a valuable tool for upper-level courses on the Internet, online communication, computer-mediated communication, communication and information technologies, and media and politics.

Critical Perspectives Routledge

International migration has been described as one of the defining issues of the twenty-first century. While a lot is known about the complex nature of migratory flows, surprisingly little attention has been given to one of the most prominent responses by

governments to human mobility: the practice of immigration detention. *Intimate Economies of Immigration Detention* provides a timely intervention, offering much needed scrutiny of the ideologies, policies and practices that enable the troubling, unparalleled and seemingly unbridled growth of immigration detention around the world. An international collection of scholars provide crucial new insights into immigration detention recounting at close range how detention's effects ricochet from personal and everyday experiences to broader political-economic, social and cultural spheres. Contributors draw on original research in the US, Australia, Europe, and beyond to scrutinise the increasingly tangled relations associated with detention

operation and migration management. With new theoretical and empirical perspectives on detention, the chapters collectively present a toolbox for better understanding the forces behind and broader implications of the seemingly uncontested rise of immigration detention. This book is of great interest to those who study political economy, economic geography and immigration policy, as well as policy makers interested in immigration. *Critical Perspectives on Entrepreneurship* Elsevier
Educating for the Knowledge Economy? *Critical Perspectives* Routledge
Business Models Routledge
The growing body of research on business models draws upon a range of sub-disciplines, including strategic

management, entrepreneurship, organization studies and management accounting. *Business Models: A Research Overview* provides a research map for business scholars, incorporating theoretical and applied perspectives. It develops the field of business model research by offering a critique of the field as it has developed to date and provides a guide for future research and theorization. The research performed as a basis for this book improves and extends prior subjective and less-documented work by using a scientific approach to identifying impactful research. The book argues that business model research is a mature field and that future research should focus on performative and ecosystem-based contributions, with the timely

identification of four distinct stages of business model research. The study here provokes a new set of research questions, which are addressed in the concluding passages of Chapters 5-8, as a point of departure for those researching business models. This book is essential primary reading for scholars and practitioners of business models who are looking to seek out new knowledge and build new perspectives. *Critical Perspectives on Corporate Social Responsibility in Media and Communication Industries* Springer Nature

In this volume, the contributors consider globalization as combining a market ideology with a corresponding material set of practices drawn from the world of business. Issues of managerialism,

privatization and accountability - central values in business - have become central for universities and their administrators as well. The selections in the book help to illustrate the editors' contentions that globalization presents clear disadvantages as well as benefits, and that its effect on higher education is neither likely to be uniform nor the outcomes inevitable.

Globalization and Education Campus Verlag

This set includes articles from the four main fields which have influenced the study of Mergers and Acquisitions: Economics, Finance, Strategic Management and Human Resource Management. Featuring the key papers by individuals who shaped the field, the collection presents these formative

pieces in thematically grouped sections, including coverage of: * Perspectives on the modern business corporation and the role of mergers and acquisitions: historical, financial, strategic and management * Causes of mergers and acquisitions activity * Performance impact of mergers and acquisitions activity * Public policy and the corporation The set features a comprehensive index and original introductory material.

Critical Perspectives on Business and Management Routledge

This is the fifth volume in a series which studies research in urban sociology, this work is an analysis of race and ethnicity in urban areas.

Critical Perspectives on Global Governance SAGE Publications

What are the long-term causes and consequences of the global financial crisis of 2007–2008? This book offers a fresh perspective on these issues by bringing together a range of academics from law, history, economics and business to look in more depth at the changing relationships between crises and complexity in the US and UK financial markets. The contributors are motivated by three main questions:

- Is the present financial system more complex than in the past and, if so, why?
- To what extent, and in what ways, does the worldwide financial crisis of 2007–2008 differ from past financial crises?
- How can governments, regulators and businesses better manage and deal with increased levels of complexity both in the present and in

the future? Students and scholars of finance, economics, history, financial law, banking and international business will find this book to be of interest. It will also be of use to regulators and policymakers involved in the US and UK banking sectors.

Rights and Regulation in Governing Regimes Taylor & Francis

In this original collection of essays, a group of distinguished scholars critically examine the ethical dimensions of business using the Kantian themed business ethics of Norman E. Bowie as a jumping off point. The authors engage Bowie's influential body of scholarship as well as contemporary themes in business, including topics such as: the normative foundations of capitalism; the applicability of Kantian ethics, virtue

ethics, and pragmatism in normative business ethics; meaningful work; managerial ethics; the ethics of high leverage finance capitalism; business ethics and corporate social responsibility; and responsibility for the natural environment. The contributors to this volume include both scholars sympathetic to Bowie's Kantian business ethics and scholars critical of that perspective. As one of the foundational figures in the establishment and legitimization of the study of business ethics as a field of scholarship, Bowie casts a long shadow over the field. Over the last thirty years he has applied a distinctive, Kantian approach to the analysis of problems in business ethics and his work has had a substantial impact on a wide range of theory and

scholarship in the field. Bowie argues in his work that economic value is not the only value that should inform managers, executives, and policy makers when making both business policy decisions and everyday management decisions. He utilizes a Kantian framework to support the position that additional values – such as human dignity and rational consistency – should inform business practice and influence managerial decision-making. He also shows that business practices that include these additional values are consistent with sound management theory and that such businesses can be financially successful. This volume of scholarly essays will be of considerable interest to students and scholars working in business ethics, corporate

social responsibility, and organization studies.

Critical Perspectives in Public Health

Rowman & Littlefield

The Circular Economy in Europe presents an overview and a critical discussion on how circularity is conceived, imagined, and enacted in current EU policy-making. In 2013, the idea of a circular economy entered the stage of European policy-making in the efforts to reconcile environmental and economic policy objectives. In 2019 the European Commission declared in a press release that the Circular Economy Action Plan has been delivered. The level of circularity in the European economy, however, has remained the same. Bringing together perspectives from social sciences, environmental

economics and policy analysis, *The Circular Economy in Europe* provides a critical analysis of policies and promises of the next panacea for growth and sustainability. The authors provide a theoretical and empirical basis to discuss how contemporary societies conceive their need to re-organise production and consumption and explores the messy assemblage of institutions, actors, waste streams, biophysical flows, policy objectives, scientific disciplines, values, expectations, promises and aspirations involved. This book is essential reading for all those interested in understanding how ideas about the circular economy emerged historically, how they gained traction and are used in policy processes, and what the practical challenges in implementing this policy

are.

Social Capital Psychology Press

This unique volume brings together 20 critical essays on aging within the context of the broad social, political, and economic factors that help shape and determine the realities of growing old. Rather than viewing aging in isolation, it explores the social creation of old age dependency and the profound influence of race, gender, and social class on what it means to grow old. It looks too at such topics as the "biomedicalization" of aging; the role of business and the media in changing societal images of the old; the fact and fiction behind "senior power"; the multibillion dollar nursing home industry; and the role of advanced capitalist nations in creating economic dependency among elders in the Third

World.

Educating for the Knowledge Economy?

Taylor & Francis US

The Present as History is a rare opportunity to hear world-renowned scholars speak on the new imperialism, feminism and human rights, secularism and Islam, post-colonialism, and the global economy. They treat the United States as an object to be historically and politically interrogated rather than as the norm from which all else is to be evaluated and assess the Third World through its history of colonialism and neocolonialism rather than focusing on issues of culture and morality. Amartya Sen discusses the shortcomings of the development agenda as it was conceived at the close of the Second World War, while Joseph Stiglitz explains economic

globalization and the power of the International Monetary Fund in guiding its trajectory. Sanjay Reddy argues that global poverty estimates are flawed, and Helena Norberg-Hodge uses her experience in Tibet to lay bare the problems with development practice. Political scientists Partha Chatterjee, Mahmood Mamdani, and Anatol Lieven chart the growth of hegemonic power from the colonial to the postcolonial period. Chatterjee examines the enduring effects of colonial administrative and governing practices, while Mamdani, focusing on the present global dispensation, explains the growth of terrorist movements around the world in the context of the Cold War. Lieven looks at the different strains of American nationalism and the continuities and

ruptures between nineteenth-century empires and the present one. Iranian human rights lawyer Shirin Ebadi elaborates the relationship between Islam, democracy, and human rights while anthropologists Lila Abu-Lughod and Saba Mahmood respectively trace the historical use of women as an excuse for imperial intervention and discuss the relationship between liberalism, Islam, and secularism. Literary theorist and cultural critic Gayatri Chakravorty Spivak looks at the legacy of colonialism in the domain of language and education, and isolates the problems associated with human rights discourse and practice. In conclusion, Talal Asad traces the genealogy of the term secularism, the special place of Islam within it, and its relationship to modernity. Gil Anidjar

considers the distinction between religion and politics and elaborates the historical links between secularism and Christianity. Taken together, these interviews offer a valuable understanding of world history and a corrective to predominant conventional discourses on global power and justice. Business Ethics Routledge

This new collection provides a much needed retrospective view of the key academic work published in this area. The papers here highlight the

importance of studying entrepreneurship from a wide range of perspectives, including research that derives from economics, history, sociology, psychology and from different business disciplinary bases such as marketing, finance and strategy. The overall focus in this set is on "entrepreneurial" activity, rather than specifically small or family-owned business and favours research articles over those that deal purely with practice.
