Since the coming into  
force of the United

Nations Law of the Sea, states have been targeting outlying islands to expand their exclusive economic zones, simultaneously stirring up strident nationalism when such plans clash with those of neighbouring states. No such actions have brought the world closer to the brink of war than the ongoing face-off between China and Japan over the Diaoyu/Senkaku islands, an uninhabited archipelago in the East China Sea. In this timely and original book, Godfrey Baldacchino provides a

detailed exploration of seven tried and tested solution protocols that have led to innovative 'win-win' solutions to island disputes over the last four centuries. A closer look at the circumstances and processes that brought contending regional powers to an honourable, even mutually advantageous, settlement over islands provides a convincing and original argument as to why the conflict over the Diaoyu/Senkaku islands need not conclude in a

'zero-sum' or 'winner takes all' solution, as is the likely outcome of both open conflict and international arbitration. The book will be of interest to scholars and practitioners concerned with the festering Diaoyu/Senkaku dispute, as well as students, scholars and policy specialists in geography, geopolitics, international relations, conflict studies, island studies, Asian studies and history. *Global Problems, Smart Solutions* McGraw Hill  
Introducing Global Health:

Practice, Policy, and Solutions is a contemporary overview of the major issues in global public health. The book explores how population health might be maximized with the right blend of health system, education, anti-poverty, infectious disease, urban development, governance, and incentive-based policies. It covers topics critical for understanding the state of the world today, including wars for natural resources, the missing women

phenomenon, and whether global aid really works. The book's case studies focus on developing economies, mixed economies, and new emerging superpowers. Thematic chapters are interwoven with running motifs, such as the health risks and benefits associated with different totalitarian, capitalist, and market socialist economies. Moving beyond statistics, the book represents a major innovation in the teaching of global health

by presenting technical concepts including the incidence and prevalence of disease within the context of more accessible topics such as global poverty. This helps students contextualize otherwise challenging but critical concepts, such as the burden of infectious disease. By encouraging reflection, focusing on what works, and using activities and exercises, *Introducing Global Health* both teaches the fundamentals of global public health and

cultivates apolicy perspective that is appealing and compelling for today'sstudents. *Global Telecom Industry Handbook Volume 2 Satellite Communication: Strategic Information, Regulations, Opportunities, Contacts* IGI Global Development Challenges, South-South Solutions is the monthly e-newsletter for the United Nations Development Programme's South-South Cooperation Unit ([www.southerninnovator.org](http://www.southerninnovator.org)). It has been published

every month since 2006. Routledge Defining the value of an entire company can be challenging, especially for large, highly competitive business markets. While the main goal for many companies is to increase their market value, understanding the advanced techniques and determining the best course of action to maximize profits can puzzle both academic and business professionals alike. *Valuation Challenges and Solutions* in Contemporary

Businesses provides emerging research exploring theoretical and practical aspects of income-based, market-based, and asset-based valuation approaches and applications within the financial sciences. Featuring coverage on a broad range of topics such as growth rate, diverse business, and market value, this book is ideally designed for financial officers, business professionals, company managers, CEOs, corporate professionals, academicians,

researchers, and students seeking current research on the challenging aspects of firm valuation and an assortment of possible solution-driven concepts.

Global Warming: Causes, Impacts and Solutions covers all aspects of global warming including its causes, impacts, and engineering solutions. Energy and environment

policies and strategies are scientifically discussed to expose the best ways to reduce global warming effects and protect the environment and energy sources affected by human activities. The importance of green energy consumption on the reduction of global warming, energy saving and energy security are also discussed. This book also focuses on energy management and conservation strategies for better utilization of energy sources and technologies in buildings

and industry as well as ways of improving energy efficiency at the end use, and introduces basic methods for designing and sizing cost-effective systems and determining whether it is economically efficient to invest in specific energy efficiency or renewable energy projects, and describes energy audit producers commonly used to improve the energy efficiency of residential and commercial buildings as well as industrial facilities. These features and more provide the

tools necessary to reduce global warming and to improve energy management leading to higher energy efficiencies. In order to reduce the negative effects of global warming due to excessive use of fossil fuel technologies, the following alternative technologies are introduced from the engineering perspective: fuel cells, solar power generation technologies, energy recovery technologies, hydrogen energy technologies, wind energy technologies,

geothermal energy technologies, and biomass energy technologies. These technologies are presented in detail and modeling studies including case studies can also be found in this book. *Costs and Benefits* Institute of Southeast Asian Studies Introducing... Essentials of Investments, 9th Global Edition, by Zvi Bodie, Alex Kane and Alan J. Marcus. We are pleased to present this Global Edition, which has been developed specifically to meet the needs of international

Investment students. A market leader in the field, this text emphasizes asset allocation while presenting the practical applications of investment theory without unnecessary mathematical detail. The ninth edition includes new coverage on the roots and fallout from the recent financial crisis and provides increased content on the changes in market structure and trading technology. Enhancements to this new Global Edition include: - New 'On the market front'

boxes highlight important investment concepts in real world situations across the globe, to promote student thinking without taking a full case study approach. Topics include short-selling in Europe & Asia, credit default swaps and the debt crisis in Greece and include examples from Commerzbank, JP Morgan, Facebook, Coca-Cola, Santander, The European Energy Exchange, plus many more! - Revised worked examples illustrate problems using both real and fictional

scenarios from across the world to help students develop their problem solving skills. Regional examples include Hutchinson Whampoa (Asia), The Emirates Group (The Middle East) and KLM Royal Dutch Airlines (The Netherlands). - Revised end-of chapter material includes brand new global questions and global internet exercises that feature currencies, companies and scenarios from Europe, Middle East, Africa and Asia to increase engagement for

international students. - Global Edition of Connect Plus Finance, McGraw-Hill's web-based assignment and assessment platform with eBook access, helps students learn faster, study more efficiently, and retain more knowledge. This Global Edition has been adapted to meet the needs of courses outside of the United States and does not align with the instructor and student resources available with the US edition. *Development Challenges,*

*South-South Solutions: May 2014 Issue*  
 DSConsulting  
 World Bank Technical Paper 249. These papers from a World Bank-sponsored seminar address two timely issues: water policy and water markets. The Bank has emphasized that water must be treated as an economic and social good. From a management viewpoint, countries should explore the efficient allocation of water through the use of pricing. Although pricing through markets has

existed for some time, the use of these markets has not been widespread. This volume covers the traditional fields in water management. Section I discusses water policy in the Middle East, North Africa, and China's Yellow River Basin. The second section reviews the Bank's experience with irrigation and drainage and the attitudes of water resources professionals toward problems in this area. The final section targets the general aspects of water markets with case studies from

Chile, Mexico, Spain, and the United States. The suitability of markets for Central Asia and the Indo-Gangetic basin is also examined.

*Globalisation and Korean Foreign Investment*  
 Asian Development Bank  
 The Asian Development Bank, Erdenes Mongol LLC, and the Business Council of Mongolia worked together to organize the Central Asia Regional Economic Cooperation (CAREC) Investment Forum that took place on 24 September 2015 in

Ulaanbaatar, Mongolia. The forum was the first-ever conference to focus on the investment environments in the CAREC countries. More than 300 high-level government officials and business leaders from 26 countries attended the event to share their insights on how to make effective investments within the region. They also shared their experiences and expectations on how to manage investments in Mongolia. The main topics discussed during the

conference were: (i) generating a recipe for success in the CAREC region that will focus on identifying and making good investments, (ii) exploring the investment environment and policies in CAREC member countries, and (iii) investing in a regionally connected Mongolia. Central Asia Regional Economic Cooperation (CAREC) Investment Forum 2015 Asian Development Bank As organizations continue to move towards digital enterprise, the need for

digital transformation continues to grow especially due to the COVID-19 pandemic. These impacts will last far into the future, as newer digital technologies continue to be accepted, used, and developed. These digital tools will forever change the face of business and management. However, on the road to digital enterprise transformation there are many successes, difficulties, challenges, and failures. Finding solutions for these issues through strategic

thinking and identification of the core issues facing the enterprise is of primary concern. This means modernizing management and strategies around the digital workforce and understanding digital business at various levels. These key areas of digitalization and global challenges, such as those during or derived from the pandemic, are new and unique; They require new knowledge gained from a deep understanding of complex issues that have been examined and the

solutions being discovered. Emerging Challenges, Solutions, and Best Practices for Digital Enterprise Transformation explores the key challenges being faced as businesses undergo digital transformation. It provides both solutions and best practices for not only handling and solving these key issues, but for becoming successful in digital enterprise. This includes topics such as security and privacy in technologies, data management, information and communication

technologies, and digital marketing, branding, and commerce. This book is ideal for managers, business professionals, government, researchers, students, practitioners, stakeholders, academicians, and anyone else looking to learn about new developments in digital enterprise transformation of business systems from a global perspective. *Summary of Proceedings* Springer Nature Addressing a previously ignored area, this text analyses two converging

factors: globalisation and Korean foreign direct investment policy. It looks at the emergence of the Korean government's globalisation objectives, and at the response of the chaebol, the business groups that brought about their country's rapid industrialisation. The chapters reveal a complex story with political as well as economic dimensions. They also note the impact of the 1997 crisis, and the growing importance of inward investment. The book, therefore, covers developments in Korean

economic policy from the Chun-Roh regime to the Kim Dae-Joong era. *Policy and Governance* Routledge Development Challenges, South-South Solutions is the monthly e-newsletter for the United Nations Development Programme's South-South Cooperation Unit ([www.southerninnovator.org](http://www.southerninnovator.org)). It has been published every month since 2006. **Directory of Pension Funds and Their Investment Managers** Routledge Sustainability and the

Automobile Industry in AsiaPolicy and GovernanceRoutledge *Trends in Telecommunication Reform 2016* Cambridge Scholars Publishing This book provides a wealth of information and a critically required framework for sustainable automobile policy development in major Asian countries. It also gives wide-ranging policy options, ranging from technological to institutional solutions to automobile emission problems, based on

empirical case studies and comparative policy and regulatory analysis. It is a useful reference with valuable insights on how rapidly changing economies are adopting their policy and regulatory structures to cope with the progressively severe environmental impacts of automobile increase.

Springer Science & Business Media

This book explains the dynamics behind southeast Asia's foreign investment activity, and looks at the region's options for reviving its reputation as an attractive host for foreign investors. Each chapter focuses on a key element;

together, they portray southeast Asia's foreign investment profile and prospects. By bringing these key interlocking elements together under a single cover, the book aims to provide a more profound understanding of the challenges southeast Asian countries face in their on-going attempts both to attract new foreign investment inflows and to continue hosting substantial existing foreign-invested assets.

This publication is a result of a 2-year innovative, exploratory, and reflective study of cities as unique urban spaces that support life, work, and play. It responds to major issues that affect the quality of life of urban residents. This publication offers practical ways on how urban managers, urban practitioners, businesspeople, and citizens can engage to make cities more livable by building on their distinctive physical, social, cultural, and economic characteristics.

With the adoption of the Sustainable Development Goals by the United Nations, the book comes at the right time to offer integrated urban development solutions that can translate global development commitments into urban-level actions to achieve livable cities.

### **Japan, East Asia and Northern Europe**

international perspectives; and issues and findings.

*Introducing Global Health: Practice, Policy, and Solutions* Information

Gatekeepers Inc

Asian countries are catching up with the West by transforming their primarily agrarian societies into industrial powerhouses.

Manufacturing is driving innovation, productivity growth, and higher standards of living for billions of Asians. In the colonial past, the Asian production and supply

chains served Western consumers. The world is now poised to evolve, led by a unified Asian business landscape capable of driving sustainable global growth within industries and markets. The *Global Rise of Asian Transformation* provides insights into the complex process of macro-political and economic dynamics reshaping the business landscape throughout Asia. This edited collection lays bare the megatrends that are challenging the region,

including emerging consumers, urbanization, infrastructure, climate change, and energy megatrends that will further bolster the region's world standing if governments and businesses handle them adeptly. Case studies of major international companies, such as Sony, Lenovo, and Tata Motors, are also included. *Regional and Global Gains from Liberalization* UNESCO Publishing Provides the necessary business knowledge for IT professionals, who work in

the global investment banking industry. The chapters in the book contain an overview of the global investment banking industry, the business environment in which global investment banks operate in; Business processes in investment banking and the impact of the recent credit crisis on the industry. Also included are profiles of common systems used in the industry and IT projects executed by global investment banks. The future of the industry is described in the concluding

chapter of this book. "Business Knowledge for IT in Global Investment Banking " is an invaluable handbook for IT professionals as well as business professionals. It is also useful for both undergraduate and graduate students in Information Technology - related degree programmes. This is another publication in the "Bizle Professional Series."

*Total Operations Solutions*  
United Nations  
A positive agenda for achieving the Sustainable

Development Goals by 2030 All 193 member nations of the United Nations agreed in September 2015 to adopt a set of seventeen "Sustainable Development Goals," to be achieved by 2030. Each of the goals—in such areas as education and health care—is laudable in and of itself, and governments and organizations are working hard on them. But so far there is no overall, positive agenda of what new things need to be done to ensure the goals are achieved across

all nations. In a search of fresh approaches to the longstanding problems targeted by the Sustainable Development Goals, the Japan International Cooperation Agency and the Global Economy and Development program at Brookings mounted a collaborative research effort to advance implementation of Agenda 2030. This edited volume is the product of that effort. The book approaches the UN's goals through three broad lenses. The first considers

new approaches to capturing value. Examples include Nigeria's first green bonds, practical methods to expand women's economic opportunities, benchmarking to reflect business contributions to achieving the goals, new incentives for investment in infrastructure, and educational systems that promote cross-sector problem solving. The second lens entails new approaches to targeting places, including oceans, rural areas, fast-growing developing cities, and the

interlocking challenge of data systems, including geospatial information generated by satellites. The third lens focuses on updating governance, broadly defined. Issues include how civil society can align with the SDG challenge; how an advanced economy like Canada can approach the goals at home and abroad; what needs to be done to foster new approaches for managing the global commons; and how can multilateral institutions for health and development finance

evolve.

*Investing in Sustainable Urban Transport*

Greenwood Publishing Group

Every four years since 2004, the Copenhagen Consensus Center has organized and hosted a high profile thought experiment about how a hypothetical extra \$75 billion of development assistance money might best be spent to solve twelve of the major crises facing the world today. Collated in this specially commissioned book, a group of more than 50

experts make their cases for investment, discussing how to combat problems ranging from armed conflicts, corruption and trade barriers, to natural disasters, hunger, education and climate change. For each case,

'Alternative Perspectives' are also included to provide a critique and make other suggestions for investment. In addition, a panel of senior economists, including four Nobel Laureates, rank the attractiveness of each policy proposal in terms of

its anticipated cost-benefit ratio. This thought-provoking book opens up debate, encouraging readers to come up with their own rankings and decide which solutions are smarter than others.
