A law professor's concise look at legal concepts, landmark cases, and the complex relationship between law and morality. In a society in which courts, and hence lawyers, have achieved extraordinary power, it is not surprising that the discipline of law is contentious and controversial. In A Student's Guide to the Study of Law, Gerard V. Bradley, professor of law at the University of Notre Dame Law School and an expert in the areas of constitutional law and law and religion, introduces readers to the major concepts, cases, and thinkers that have shaped American legal scholarship and history. He also helps readers better understand what, at bottom, is at stake in the different understandings of the nature of law that drive many of our national debates.

Transport is an inherent part of tourism; whether as a functional means of transportation, such as between origin and destination or within the destination; or as a key element of the holiday experience itself, as in cruising or traveling along scenic or historic routes. This book provides the necessary background information to gain a comprehensive understanding of transportation markets, with each of the three modes of transportation – air, ground and marine – explored in detail. Each section includes definitions, the historical development of the market and international institutional frameworks, with case studies, learning objectives and study questions incorporated to facilitate an active learning process.

This comprehensive edited volume is the first of its kind, designed to serve as a textbook for long-duration business analytics programs. It can also be used as a guide to the field by practitioners. The book has contributions from experts in top universities and industry. The editors have taken extreme care to ensure continuity across the chapters. The material is organized into three parts: A) Tools, B) Models and C) Applications. In Part A, the tools used by business analysts are described in detail. In Part B, these tools are applied to construct models used to solve business problems. Part C contains detailed applications in various functional areas of business and several case studies. Supporting material can be found in the appendices that develop the pre-requisites for the main text. Every chapter has a business orientation. Typically, each chapter begins with the description of business problems that are transformed into data questions; and methodology is developed to solve these questions. Data analysis is conducted using widely used software, the output and results are clearly explained at each stage of development. These are finally transformed into a business solution. The companion website provides examples, data sets and sample code for each chapter.
