Soil Mechanics and ...Soil mechanics
mainly deals with Soil microstructure
and its property. Foundation engineering
related to design of foundation and
pressure distribution deals with
engineering properties of soil.
Geotechnical engineering is the branch
of civil engineering concerned with the
engineering behavior of earth
materials. What is the difference between
geotechnical engineering ...A peer-
reviewed journal that surveys the field of
soil mechanics and foundations including
retaining structures, soil dynamics,
engineering behavior of soil and rock,
site characterization, slope stability,
dams, rock engineering, earthquake
engineering, environmental geotechnics,
geosynthetics, computer modeling,

groundwater monitoring and restoration, and coastal and geotechnical ocean engineering. Journal of the Soil Mechanics and Foundations Division ... Geotechnical engineering, also known as geotechnics, is the branch of civil engineering concerned with the engineering behavior of earth materials. It uses the principles and methods of soil mechanics and rock mechanics for the solution of engineering problems and the design of engineering works. It also relies on knowledge of geology, hydrology, geophysics, and other related sciences. Geotechnical engineering is important in civil engineering, but also has applications in military, mining, petrochemical, and other industries.
