Mungo Park's fatal
journey down West
Africa's Niger River,
author and
adventuress Salak
became the first*

person to travel alone from Mali's Old Segou to Timbuktu, the legendary "doorway to the end of the world." This is her story.

The Cruellest Journey

F.A. Davis

There are two paths in life: Should & Must. We arrive at this crossroads over and over again, and every day. And we get to choose. Starting out or starting over, making a career change or making a life change, the most life-affirming thing you can do is to honor the voice inside that says your have something special to give, and then heed the call and act. Many have traveled this road before. Here's how you can, too. #choosemust
An inspirational gift book for every recent graduate, every artist, every seeker, and

every career change. *College Success* Simon and Schuster
"A very engaging read about how time travel has captured our imaginations . . . You will find a number of surprising discoveries awaiting you." —Fred Alan Wolf, author of *Taking the Quantum Leap*
The idea of time travel has tantalized humans for millennia. We can send humans into space, but roaming through time has eluded us. Do the laws of physics demand that we stay forever trapped in the present? This Book Is From the Future will explore: Time travel theories and machines of the past, present, and future Time and the multiverse: why wormholes, parallel universes, and extra dimensions might allow

for time travel The paranormal aspects of time: Might we already be “mentally” time traveling? Mysterious time shifts, slips, and warps that people are reporting all over the world. Are we experiencing coexisting timelines? Time travel conspiracy theories: Are we already walking among real time travelers? Has a real time machine already been created in a top-secret government facility? “From pop culture fantasies to wild conspiracy theories to the latest scientific thinking, This Book Is From the Future is a fascinating exploration of our collective obsession with time. Jones and Flaxman cover the subject from just about every angle, with a dash of humor

and the serious scientific curiosity it deserves.” —Stephen Wagner, author of True Tales of the Ouija Board “A superb study of how past, present and future may be manipulated, controlled and even altered. Back to the Future and H. G. Wells’s The Time Machine might not be mere fiction, after all!” —Nick Redfern, author of Final Events

Relativity: A Journey Through Warped Space and Time F A

Davis Company Here’s just what you need to effectively care for your patients at any stage of life in today’s ever-changing world of health care. Elaine Polan and Daphne Taylor guide you through the life cycle—from conception to old age—with an

emphasis on health promotion, maintenance, and restoration in clinical practice.

Brains Through Time

Simon and Schuster

Dirt, soil, call it what you want—it's everywhere we go. It is the root of our existence, supporting our feet, our farms, our cities. This fascinating yet disquieting book

finds, however, that we are running out of dirt, and it's no laughing matter. An engaging natural and cultural history of soil that sweeps from ancient civilizations to modern times, *Dirt: The Erosion of Civilizations* explores the compelling idea that we are—and have long been—using up Earth's soil. Once bare of protective vegetation and exposed to wind and rain, cultivated soils erode bit by bit, slowly enough to be ignored in a single lifetime but fast enough over centuries to limit the lifespan of civilizations. A rich mix of history, archaeology and geology, *Dirt* traces the role of soil use and abuse in the history of Mesopotamia, Ancient Greece, the Roman Empire, China,

European colonialism, Central America, and the American push westward. We see how soil has shaped us and we have shaped soil—as society after society has risen, prospered, and plowed through a natural endowment of fertile dirt. David R. Montgomery sees in the recent rise of organic and no-till farming the hope for a new agricultural revolution that might help us avoid the fate of previous civilizations.

recently freed,

formerly enslaved
brothers work to
protect the new life
they’ve built during the
Reconstruction after
the Civil War in this
vibrant, illustrated
middle grade novel.
Maybe nobody gave
freedom, and nobody
could take it away like
they could take away a
family farm. Maybe
freedom was
something you claimed
for yourself. Like other
ex-slaves, Pascal and
his older brother
Gideon have been
promised forty acres
and maybe a mule.
With the found family
they have built along
the way, they claim a
place of their own.
Green Gloryland is the
most wonderful place
on earth, their own
farm with a healthy
cotton crop and plenty
to eat. But the
notorious night riders

have plans to take it away, threatening to tear the beautiful freedom that the two boys are enjoying for the first time in their young lives.

U.S. History McGraw-Hill/Glencoe

“YOU HAVE CHANGED MY LIFE” is a common refrain in the emails Walter Lewin receives daily from fans who have been enthralled by his world-famous video lectures about the wonders of physics. “I walk with a new spring in my step and I look at life through physics-colored eyes,” wrote one such fan.

When Lewin’s lectures were made available online, he became an instant YouTube celebrity, and *The New York Times* declared, “Walter Lewin delivers his lectures with the panache of Julia Child

bringing French cooking to amateurs and the zany theatricality of YouTube’s greatest hits.” For more than thirty years as a beloved professor at the Massachusetts Institute of Technology, Lewin honed his singular craft of making physics not only accessible but truly fun, whether putting his head in the path of a wrecking ball, supercharging himself with three hundred thousand volts of electricity, or demonstrating why the sky is blue and why clouds are white. Now, as Carl Sagan did for astronomy and Brian Green did for cosmology, Lewin takes readers on a marvelous journey in *For the Love of Physics*, opening our eyes as

never before to the amazing beauty and power with which physics can reveal the hidden workings of the world all around us. “I introduce people to their own world,” writes Lewin, “the world they live in and are familiar with but don’t approach like a physicist—yet.” Could it be true that we are shorter standing up than lying down? Why can we snorkel no deeper than about one foot below the surface? Why are the colors of a rainbow always in the same order, and would it be possible to put our hand out and touch one? Whether introducing why the air smells so fresh after a lightning storm, why we briefly lose (and gain) weight when we ride in an elevator, or what the big bang

would have sounded like had anyone existed to hear it, Lewin never ceases to surprise and delight with the extraordinary ability of physics to answer even the most elusive questions. Recounting his own exciting discoveries as a pioneer in the field of X-ray astronomy—arriving at MIT right at the start of an astonishing revolution in astronomy—he also brings to life the power of physics to reach into the vastness of space and unveil exotic uncharted territories, from the marvels of a supernova explosion in the Large Magellanic Cloud to the unseeable depths of black holes. “For me,” Lewin writes, “physics is a way of seeing—the spectacular and the

mundane, the immense and the minute—as a beautiful, thrillingly interwoven whole.” His wonderfully inventive and vivid ways of introducing us to the revelations of physics impart to us a new appreciation of the remarkable beauty and intricate harmonies of the forces that govern our lives.

Journey Across Time, Early Ages, Teacher Wraparound Edition

McGraw-Hill Education
Incorporate classroom-tested reading strategies that give your students the tools they need to become independent learners with this all-new middle school world history program—the perfect combination of story and standards.

World history, journey across time,

the early ages:

teacher ed Univ of California Press
Herodotus, the great Greek historian, wrote this famous history of warfare between the Greeks and the Persians in a delightful style. Herodotus portrays the dispute as one between the forces of slavery on the one hand and freedom on the other. This work covers the rise of the Persian influence and a history of the Persian empire, a description and history of Egypt, and a long digression on the landscape and traditions of Scythia. Because of the comprehensiveness of this work, it was considered the founding work of history in Western literature. A must-have for history enthusiasts.

World History: Journey Across Time Red Wheel/Weiser
A special 25th anniversary edition of the extraordinary international bestseller, including a new Foreword by Paulo Coelho. Combining magic, mysticism, wisdom and wonder into an inspiring tale of self-discovery, *The Alchemist* has become a modern classic, selling millions of

copies around the world and transforming the lives of countless readers across generations. Paulo Coelho's masterpiece tells the mystical story of Santiago, an Andalusian shepherd boy who yearns to travel in search of a worldly treasure. His quest will lead him to riches far different—and far more satisfying—than he ever imagined. Santiago's journey teaches us about the essential wisdom of listening to our hearts, of recognizing opportunity and learning to read the omens strewn along life's path, and, most importantly, to follow our dreams.

For the Love of Physics
Routledge
Alex Rogo is a harried plant manager working

ever more desperately to try and improve performance. His factory is rapidly heading for disaster. So is his marriage. He has ninety days to save his plant - or it will be closed by corporate HQ, with hundreds of job losses. It takes a chance meeting with a colleague from student days - Jonah - to help him break out of conventional ways of thinking to see what needs to be done. Described by Fortune as a 'guru to industry' and by Businessweek as a 'genius', Eliyahu M. Goldratt was an internationally recognized leader in the development of new business management concepts and systems. This 20th anniversary edition includes a series of

detailed case study interviews by David Whitford, Editor at Large, Fortune Small Business, which explore how organizations around the world have been transformed by Eli Goldratt's ideas. The story of Alex's fight to save his plant contains a serious message for all managers in industry and explains the ideas which underline the Theory of Constraints (TOC) developed by Eli Goldratt. Written in a fast-paced thriller style, *The Goal* is the gripping novel which is transforming management thinking throughout the Western world. It is a book to recommend to your friends in industry - even to your bosses - but not to your competitors!

The Crossroads of Should and Must
 McGraw-Hill
 FORBES #1 CAREER BOOK TO READ IN 2018
 The larger-than-life journey of an 18-year-old college freshman who set out from his dorm room to track down Bill Gates, Lady Gaga, and dozens more of the world's most successful people to uncover how they broke through and launched their careers. *The Third Door* takes readers on an unprecedented adventure—from hacking Warren Buffett's shareholders meeting to chasing Larry King through a grocery store to celebrating in a nightclub with Lady Gaga—as Alex Banayan travels from icon to icon, decoding their success. After

remarkable one-on-one interviews with Bill Gates, Maya Angelou, Steve Wozniak, Jane Goodall, Larry King, Jessica Alba, Pitbull, Tim Ferriss, Quincy Jones, and many more, Alex discovered the one key they have in common: they all took the Third Door. Life, business, success... it's just like a nightclub. There are always three ways in. There's the First Door: the main entrance, where ninety-nine percent of people wait in line, hoping to get in. The Second Door: the VIP entrance, where the billionaires and celebrities slip through. But what no one tells you is that there is always, always... the Third Door. It's the entrance where you have to jump out of line, run down the

alley, bang on the door a hundred times, climb over the dumpster, crack open the window, sneak through the kitchen—there's always a way in. Whether it's how Bill Gates sold his first piece of software or how Steven Spielberg became the youngest studio director in Hollywood history, they all took the Third Door. Journey Across the Life Span Allen & Unwin Activity Workbook, Student Edition World History Simon and Schuster Helps students learn more about chapter topics and prepare for quizzes and tests **The Third Door** Oxford University Press, USA Travelling throughout the old British Empire in search of the legacy of Queen Victoria,

Victoria Wood visits the countries that were transformed by British ingenuity and the advances of the industrial revolution.
