**You Have More Than You Think** Simon and Schuster  
 In these turbulent economic times, everyone is asking the same question: "What should I do with my money now?" With their trademark irreverence and plainspokenness, David and Tom Gardner, bestselling authors and cofounders of The Motley Fool, answer this critical question and recommend ten important yet quick steps readers can take to survive economic uncertainty, secure their personal finances, and fortify their portfolios. Along the way, they address such important issues as: • Is this the time to snatch up stock market bargains? • Are any mutual funds sure bets? • Is short-term debt dangerous? • Bonds, T-bills, CDs, savings accounts -- does it make sense to be conservative? • Why you should believe in America now more than ever. The Gardners offer a snapshot view of business and the financial markets at the dawn of the world's "new economic reality" -- all while looking ahead to the future with some timely and timeless guidance for investors. No matter your age or level of investing

experience, *The Motley Fool's What to Do with Your Money Now* is an indispensable survival manual for our unpredictable economic times.

*Quality of Earnings* Simon and Schuster

"In the dark, bewildering, trap-infested jungle of misinformation and opaque riddles that is the world of investment, J.L. Collins is the fatherly wizard on the side of the path, offering a simple map, warm words of encouragement and the tools to forge your way through with confidence. You'll never find a wiser advisor with a bigger heart." -- Malachi Rempen: Filmmaker, cartoonist, author and self-described ruffian This book grew out of a series of letters to my daughter concerning various things--mostly about money and investing--she was not yet quite ready to hear. Since money is the single most powerful tool we have for navigating this complex world we've created, understanding it is critical. "But Dad," she once said, "I know money is important. I just don't want to spend my life thinking about it." This was eye-opening. I love this stuff. But most people have better things to do with their precious time. Bridges to build, diseases to cure, treaties to negotiate, mountains to climb, technologies to create, children to teach, businesses to run. Unfortunately, benign neglect of things financial leaves you open to the charlatans of the financial world. The people who make investing endlessly complex, because if it can be made complex it becomes more profitable for them, more expensive for us, and we are forced into their waiting arms.

Here's an important truth: Complex investments exist only to profit those who create and sell them. Not only are they more costly to the investor, they are less effective. The simple approach I created for her and present now to you, is not only easy to understand and implement, it is more powerful than any other. Together we'll explore: Debt: Why you must avoid it and what to do if you have it. The importance of having F-you Money. How to think about money, and the unique way understanding this is key to building your wealth. Where traditional investing advice goes wrong and what actually works. What the stock market really is and how it really works. Why the stock market always goes up and why most people still lose money investing in it. How to invest in a raging bull, or bear, market. Specific investments to implement these strategies. The Wealth Building and Wealth Preservation phases of your investing life and why they are not always tied to your age. How your asset allocation is tied to those phases and how to choose it. How to simplify the sometimes confusing world of 401(k), 403(b), TSP, IRA and Roth accounts. TRFs (Target Retirement Funds), HSAs (Health Savings Accounts) and RMDs (Required Minimum Distributions). What investment firm to use and why the one I recommend is so far superior to the competition. Why you should be very cautious when engaging an investment advisor and whether you need to at all. Why and how you can be conned, and how to avoid becoming prey. Why I don't recommend dollar cost averaging. What financial independence looks like and how to have your money support you. What the 4% rule is and how to use it to safely spend your wealth. The truth behind Social Security. A Case Study on how this all can be implemented in real life. Enjoy the read, and the journey!

#### **The Motley Fool's Money After 40** John Wiley & Sons

A NEW YORK TIMES, WALL STREET JOURNAL, AND USA TODAY BESTSELLER The legendary investor shows how to identify and master the cycles that govern the markets. We all know markets rise and fall, but when should you pull out, and when should you stay in? The answer is never black or white, but is best reached through a keen understanding of the reasons behind the rhythm of cycles. Confidence about where we are in a cycle comes when you learn the patterns of ups and downs that influence not just economics, markets, and companies, but also human psychology and the investing behaviors that result. If you study past cycles, understand their origins and remain alert for the next one, you will become keenly attuned to the investment environment as it changes. You'll be aware and prepared while others get blindsided by unexpected events or fall victim to emotions like fear and greed. By following Marks's insights—drawn in part from his iconic memos over the years to Oaktree's clients—you can master these recurring patterns to have the opportunity to improve your results.
