*Beating Captain Najork* Oxford University Press

Many businesses and organizations are increasingly aware of the case for promoting gender equality, both within and outside their organizational boundaries. Evidence suggests that gender equality in the workplace boosts performance, and legal frameworks in many countries mandate specific action on gender inequality in the workplace. However, despite organizational policies on promoting equality and equal opportunities, there remain challenges to be overcome in many businesses, including throughout their supply chains. The book provides research

rationales as to why responsible organizations must address the issue of gender equality in the workplace. It also presents case studies, action research and examples of good practices, describing how businesses and organizations are working to promote gender equality in various contexts. The book is designed to support the rationale for gender equality in business and organizations, providing evidence of implementation of gender equality in the workplace and advice on how to deal with and overcome challenges. It will be of interest to academics, employees, practitioners, policy-makers, businesses, institutions and organizations.

*American Politics and Society* Routledge

This work maintains the approach of the US text, *Principles of Economics* by Case and Fair, but with the main focus on Europe.

This is reflected in the use of the open economy approach, the use of the Euro as the standard currency, as well as providing numerous European examples and applications. Maths Boxes enable the lecturer to decide on the amount of calculus they wish to include. End-of-chapter problems with selected answers at the end of the book allow students to assess their progress.

The SAGE Encyclopedia of Economics and Society Routledge

This volume, covering metals and minerals, contains chapters on approximately 90 commodities. In addition, this volume has chapters on mining and quarrying trends and on statistical surveying methods used by Minerals Information, plus a statistical summary.

Minerals Yearbook John Wiley & Sons

It is a well-known saying that money does not buy happiness. But it certainly helps in life. It is important to have enough of it to satisfy our needs and to secure ourselves from emergency situations. That's what adults think. And what about the youth? What is their approach to money, what do they know about finances and how are their skills in everyday financial management coming along? What kind of knowledge and skills should be provided? Do young people in different countries represent similar or different approaches to financial matters? Using the results of a research on young people in Poland and Germany, the authors draw a picture of financial literacy. They furthermore present a number of recommendations that help developing the knowledge and the financial skills of young people in practice.

Rankings and the Reshaping of Higher Education United Nations

Le secteur des industries extractives (IE) occupe une place

démessurée dans les économies de nombreux pays en développement. Les économistes et les spécialistes des finances publiques qui y travaillent sont fréquemment confrontés à des problèmes qui requièrent une connaissance approfondie du secteur, de son économie, de sa gouvernance, de ses enjeux stratégiques, et une idée précise de ce que la richesse en ressources naturelles suppose en termes de gestion du budget et des finances publiques. L'ouvrage en trois volumes Points essentiels à l'intention des économistes et des spécialistes des finances publiques, publié dans la série des Études de la Banque mondiale, a pour objet de donner un bref aperçu des problèmes associés aux IE que ces spécialistes sont susceptibles de rencontrer. Ce premier volume, Le secteur des industries extractives, dresse une synthèse des aspects fondamentaux de l'économie des IE, analyse les principales composantes des cadres stratégiques, institutionnels et de gouvernance du secteur, et définit les obligations de financement du secteur public dans ce domaine. Son analyse des aspects économiques des IE couvre l'évaluation des gisements de sous-sol, l'interprétation économique donnée au minerai, et la structure des marchés de l'énergie et des produits minéraux. Il définit les responsabilités des entités publiques compétentes, et présente les caractéristiques des cadres juridique et réglementaire du secteur. Il analyse brièvement ses fonctions essentielles et particulières, ainsi que les structures financières qui soutiennent les mesures de sauvegarde environnementale et sociale, l'investissement des recettes publiques provenant de l'exploitation des ressources pétrolières, gazières ou minières, et la diversification économique à partir des industries extractives.

Les auteurs espèrent que les économistes et les spécialistes des finances publiques qui travaillent dans les pays riches en ressources naturelles y compris les décideurs au sein des ministères des finances, des organisations internationales, et autres entités compétentes — jugeront cet ouvrage utile à leur compréhension et à leur analyse du secteur des IE.

*Handbook of Empirical Research on Islam and Economic Life*  
Springer

In Islamic jurisprudence, a comprehensive ethic has been formulated governing how business and commerce should be run, how accountability to God and the community is to be achieved, and how banking and finance is to be arranged. This Handbook examines how well these values are translated into actual performance. It explores whether those holding true to the system are hindered and put at a disadvantage or whether the Islamic institutions have been able to demonstrate that faith-based activities can be rewarding, both economically and spiritually.

*Research Methods in Consumer Law* Financial Times/Prentice Hall  
Working for the administration remains one of the most coveted career paths for young Chinese. *Rejuvenating Communism: Youth Organizations and Elite Renewal in Post-Mao China* seeks to understand what motivates young and educated Chinese to commit to a long-term career in the party-state and how this question is central to the Chinese regime's ability to maintain its cohesion and survive. Jérôme Doyon draws upon extensive fieldwork and statistical analysis in order to illuminate the undogmatic commitment recruitment techniques and other methods the state has taken to develop a diffuse allegiance to

the party-state in the post-Mao era. He then analyzes recruitment and political professionalization in the Communist Party's youth organizations and shows how experiences in the Chinese Communist Youth League transform recruits and feed their political commitment as they are gradually inducted into the world of officials. As the first in-depth study of the Communist Youth League's role in recruitment, this book challenges the assumption that merit is the main criteria for advancement within the party-state, an argument with deep implications for understanding Chinese politics today.

**Teaching Change** McFarland

Twenty five years ago the first Human Development Report in 1990 began with a simple notion: that development is about enlarging people's choices—focusing broadly on the richness of human lives rather than narrowly on the richness of economies. This Report starts with a fundamental question—how can work enhance human development? The Report takes a broad view of work, going beyond jobs and taking into account such activities as unpaid care work, voluntary work and creative work—all of which contribute to the richness of human lives. The Report highlights impressive progress on human development over the past quarter century.

**Report on Activities, ... December 28, 2013 to January 2, 2015, House Report 113-679, 113-2** World Bank Publications  
Three quarters of our current electricity usage and transport methods are derived from fossil fuels and yet within two centuries these resources will dry up. *Energy Economics* covers the role of each fossil and renewable energy source in today's world, providing the information and tools that will enable

students to understand the finite nature of fossil fuels and the alternative solutions that are available. This textbook provides detailed examinations of key energy sources – both fossil fuels and renewables including oil, coal, solar, and wind power – and summarises how the current economics of energy evolved. Subsequent chapters explore issues around policy, technology and the possible future for each type of energy. In addition to this, readers are introduced to controversial topics including fracking and global warming in dedicated chapters on climate change and sustainability. Each chapter concludes with a series of tasks, providing example problems and projects in order to further explore the proposed issues. An accompanying companion website contains extensive additional material on the history of the major types of fuel as well as technical material relating to oil exploration, the development of solar power and historical environmental legislation. This textbook is an essential text for those who study energy economics, resource economics or energy policy.

**Overcoming Challenges to Gender Equality in the Workplace** Springer

In *Pursued Economy: Understanding and Overcoming the Challenging New Realities for Advanced Economies*, celebrated economist and thought leader Richard C. Koo dives deep into the failure of traditional economic solutions to address the economic and social problems of post-Great Recession and post-pandemic economies. Starting with the original concepts of balance sheet recessions and global competition for capital, the author explains why the Great Recession lasted for so long and why well-intentioned policies that worked so well in the past are no longer

working today. Readers will discover that advanced economies moved from what the author calls the "golden era" to the "pursued era" of economic development long ago, but the policy debate in these countries continues to be informed by golden era assumptions that are no longer relevant but are still taught in universities. That mismatch has led to an over-reliance on monetary policy and an under-reliance on fiscal policy that are distorting economies and worsening inequality in a profoundly transformed world. With many real-world examples from the author's extensive involvement in the policy debate on economic, banking and trade issues in several countries, including the U.S., the book describes the correct policy mix in the pursued era as distinct from that in the golden era. It also explains the challenges central banks face in fighting inflation after a decade of over-reliance on monetary policy that flooded the world's economies with unprecedented liquidity. Instead of simply assuming the existence of "trend growth rates", this book tackles the issue of economic growth head-on so as to elucidate the symmetry between the drivers of growth and the drivers of recession. It also argues that the fundamental disconnect between free trade and free capital movements must be addressed in order to maximize the gains from globalization while minimizing its costs. Written in simple language and with a great sense of urgency, *Pursued Economy* should be of interest to anyone who is concerned about the global economy, financial stability and geopolitics.

*Humans Need Not Apply* Routledge

Access issues are pivotal to almost all charter school tensions and debates. How well are these schools performing? Are they

segregating and stratifying? Are they public and democratic? Are they fairly funded? Can apparent successes be scaled up? Answers to all these core questions hinge on how access to charter schools is shaped. This book describes the incentives and pressures on charter schools to restrict access and examines how charters navigate those pressures, explaining access-restricting practices in relation to the ecosystem within which charter schools are created. It also explains how charters have sometimes responded by resisting the pressures and sometimes by surrendering to them. The text presents analyses of 13 different types of practices around access, each of which shapes the school's enrollment. The authors conclude by offering recommendations for how states and authorizers can address access-related inequities that arise in the charter sector. School's Choice provides timely information on critical academic and policy issues that will come into play as charter school policy continues to evolve. Book Features: Examines how charter schools control who gains and retains access. Explores policies and practices that undermine equitable admission and encourage opportunity hoarding. Offers a set of policy recommendations at the state and federal level to address access-related issues.

*The Decline of America* Government Printing Office

This report responds to an invitation from the Nordic Council of Ministers to map out Nordic initiatives within textiles as a pre-study to the initiation of a Nordic Roadmap for Sustainable Textiles in 2015. The work has been conducted by: SIFO - National Institute for Consumer Research (Norway) SFA - Sustainable Fashion Academy (Sweden) NFA - Nordic Fashion Association/nicefashion.org (Nordic) IVL - Swedish Environmental

Research Institute (Sweden) CRI - Copenhagen Resource Institute (Denmark) Nordic Committee of Senior Officials for Environmental Affairs (EK-M) has been responsible for the funding of this project. The project's steering committee consists of representatives from members from the working groups; Nordic Chemicals Group (NKG), the Nordic Waste Group (NAG) and the Group of sustainable consumption and production (SCP) and officers from the Environmental Protection Agency in Denmark. This steering Group is jointly responsible for the direction and decisions regarding the project. NAG has been coordinating the work. Coordinator of project has been Yvonne Augustsson from the Swedish Environmental Protection Agency.

**Food Fortification in a Globalized World** Harvard Education Press

Distance Learning is for leaders, practitioners, and decision makers in the fields of distance learning, e-learning, telecommunications, and related areas. It is a professional journal with applicable information for those involved with providing instruction to all kinds of learners, of all ages, using telecommunications technologies of all types. Stories are written by practitioners for practitioners with the intent of providing usable information and ideas. Articles are accepted from authors - new and experienced - with interesting and important information about the effective practice of distance teaching and learning. Distance Learning is published quarterly. Each issue includes eight to ten articles and three to four columns, including the highly regarded "And Finally..." column covering recent important issues in the field and written by Distance Learning editor, Michael Simonson. Articles are written by practitioners

from various countries and locations, nationally and internationally. Distance Learning is an official publication of the United States Distance Learning Association, and is co-sponsored by the Fischler School of Education at Nova Southeastern University and Information Age Publishing.

**Le secteur des industries extractives** Nordic Council of Ministers

Why does inequality have such a hold on American society and public policy? And what can we, as citizens, do about it? Inequality in America takes an in-depth look at race, class and gender-based inequality, across a wide range of issues from housing and education to crime, employment and health. Caliendo explores how individual attitudes can affect public opinion and lawmakers' policy solutions. He also illustrates how these policies result in systemic barriers to advancement that often then contribute to individual perceptions. This cycle of disadvantage and advantage can be difficult-though not impossible-to break. "Representing" and "What Can I Do?" feature boxes throughout the book highlight key public figures who have worked to combat inequality and encourage students to take action to do the same. The second edition has been thoroughly revised to include the most current data and to cover recent issues and events like the 2016 elections and the Black Lives Matter movement. It now also includes a brand-new chapter on crime and criminal justice and an expanded discussion of immigration. Concise and accessible, Inequality in America paves the way for students to think critically about the attitudes, behaviors and structures of inequality.

Theorizing Teaching and Learning in Asia and Europe Lulu.com

Now in its ninth edition, this popular introduction tackles the most recent trends in American politics and society through explanation, analyses, and interpretations of government processes – adding valuable context for students by considering these procedures and developments from an international perspective. Fully updated to take account of the many recent developments in American politics and society – exploring developments characterized by the deepest ideological divisions in recent memory Features new chapters on the performance of the Obama presidency and the polarization of American politics Focuses on the divisive ideological climate that now dominates American politics and which was exemplified by the bitter and polarized 2016 presidential election campaign Benefits from a student-friendly style and design with numerous illustrations and a range of helpful pedagogical features, including chronologies, biographies, and definition boxes highlighting key concepts and controversial issues Offers thought-provoking insights into the social background to contemporary politics in America, while fully embracing the latest developments and considering these from a non-U.S. perspective

**Rejuvenating Communism** JHU Press

Cancer Policy: Pharmaceutical Safety provides invaluable information on the interesting and compelling field of cancer drug safety. Identifying and understanding high-priority policy issues and key pharmacovigilance strategies is of paramount importance. In this volume, outstanding and original chapters provide an overview and synthesis of the latest thoughts and findings relating to drug safety in the cancer domain. Topics include natural language processing and pharmacovigilance of

alternative cancer pharmaceuticals. The information presented in this volume will improve understanding of emerging strategies to identify adverse drug reactions and drug-drug interactions within the cancer setting and will highlight policies that have been instituted to improve cancer patient safety. In summary, *Cancer Policy: Pharmaceutical Safety* explores many of the important areas of pharmacovigilance research in oncology.

*Cancer Policy: Pharmaceutical Safety* Edward Elgar Publishing  
*Modern Labor Economics: Theory and Public Policy*, now in its fourteenth edition, continues to be the leading text for one-semester courses in labor economics at the undergraduate and graduate levels. It offers a thorough overview of the modern theory of labor market behavior and reveals how this theory is used to analyze public policy. Designed for students who may not have extensive backgrounds in economics, the text balances theoretical coverage with examples of practical applications that allow students to see concepts in action. The authors believe that showing students the social implications of the concepts discussed in the course will enhance their motivation to learn. Consequently, this text presents numerous examples of policy decisions that have been affected by the ever-shifting labor market. This new edition continues to offer the following: a balance of relevant, contemporary examples coverage of the current economic climate an introduction to basic methodological techniques and problems tools for review and further study This fourteenth edition presents updated data throughout and a wealth of new examples, such as the impact of COVID-19 lockdowns, gig work, nudges, monopsony power in the technology industry, and the effect of machine learning on

inequality. Supplementary materials for students and instructors are available on the book's companion website.

*Mapping sustainable textile initiatives* University of Pennsylvania Press

Economics is the nexus and engine that runs society, affecting societal well-being, raising standards of living when economies prosper or lowering citizens through class structures when economies perform poorly. Our society only has to witness the booms and busts of the past decade to see how economics profoundly affects the cores of societies around the world. From a household budget to international trade, economics ranges from the micro- to the macro-level. It relates to a breadth of social science disciplines that help describe the content of the proposed encyclopedia, which will explicitly approach economics through varied disciplinary lenses. Although there are encyclopedias of covering economics (especially classic economic theory and history), the SAGE Encyclopedia of Economics and Society emphasizes the contemporary world, contemporary issues, and society. Features: 4 volumes with approximately 800 signed articles ranging from 1,000 to 5,000 words each are presented in a choice of print or electronic editions Organized A-to-Z with a thematic Reader's Guide in the front matter groups related entries Articles conclude with References & Future Readings to guide students to the next step on their research journeys Cross-references between and among articles combine with a thorough Index and the Reader's Guide to enhance search-and-browse in the electronic version Pedagogical elements include a Chronology of Economics and Society, Resource Guide, and Glossary This academic, multi-author reference work will serve as a general,

non-technical resource for students and researchers within social science programs who seek to better understand economics through a contemporary lens.

Financial Literacy and Financial Education Teachers College Press  
Consumer law is worthy of greater academic attention at a time when many new questions arise and old ones need new answers. This unique handbook takes the reader on a journey through existing literature, research questions and methods. It builds on the state of the art to offer a springboard for jumping to the heart of contemporary issues and equips researchers with a starter's kit to weave together rich traditions, ranging from socio-

economics to behavioural analysis.

OECD Reviews of School Resources Responsive School Systems Connecting Facilities, Sectors and Programmes for Student Success Routledge

University rankings have gained popularity around the world and are now a significant factor shaping reputation. This second edition updates Ellen Hazelkorn's first comprehensive study of rankings from a global perspective, drawing in new original research and extensive analysis. It is essential reading for policymakers, managers and scholars.
