IBARRA BROOKLYN

Emerging Practices in Cost Management John Wiley & Sons
Provides a review of current and potential research in green management and control.

An Introduction to Cost Accounting, Operations Management, and Quality Control CRC Press

"This book, published by the European Commission, brings together about 80 papers selected by a Scientific Advisory Committee with the intention to make broadly known the main themes and issues addressed on the occasion of this Convention. Given the strategic importance of the latter, these post-conference proceedings constitute a reference document

providing an overview on aeronautical research within Europe more particularly devoted to Commission supported programmes and networks"--Back cover.

Selected Water Resources Abstracts Cengage Learning

The careful management of costs and operations are two of the most essential elements for successful operation of any organization - public, private, or nonprofit. This book demonstrates that a good grounding in cost basics, especially those related to cost accounting, operations management, and quality control can help all organizations, in particular government, increase efficiency, improve performance, and, in the end, do a better job of running its everyday operation. The book is divided into three parts: Part I offers thorough coverage of cost fundamentals, with an emphasis on basic cost concepts, cost behavior, cost analysis, cost assignment, cost allocation, and cost

control. Part II deals with optimization in government. Included in this part are traditional or classical optimization with applications in inventory management and queuing, followed by mathematical programming, network analysis, productivity measurement, and games and decisions. Finally, Part III deals with a special case in cost and optimization that has become important in recent years – quality control. Simple, accessible language and explanations are integrated throughout, and examples have been drawn from government so that readers can easily relate to them. Cost and Optimization is required reading for practicing public managers and students of public administration in need of a clear, concise guide to efficient use of public resources.

Technical Report - Forest Engineering Research Institute of Canada CRC Press

Cost Accounting with Integrated Data Analytics takes the approach that you need to reach students in order to engage and effectively teach them to make meaning of costing concepts. Through storytelling, students develop a deeper understanding of cost accounting fundamentals, allowing them to apply their knowledge to modern business scenarios and develop the competencies and decision-making skills needed to become the future accounting professional. Throughout Cost Accounting, students also work through a variety of data analysis applications that allow them to develop their decision-making skills within real-world contexts. Through assignments and integrated cases that leverage market-leading technology, students learn how to make informed business decisions and think critically about data.

CEP Software Directory Cengage Learning

Provides a modern presentation that eliminates the seven

limitations of past and present engineering economics texts: Contains the 12-FACTOR Calculator, an Excel spreadsheet designed by author to provide the values of the 12 factors of engineering economics for arbitrary values of i , g (), and N Contains the ANNUAL and PRESENT WORTH COMPARISON Calculators with Component Replacements for comparing equipment purchase quotations Defines quasi-simple investments and presents a Step-by-Step procedure for calculating their IRRs and balances Presents a classification of the four common non-simple investments and provides Step-by-Step procedures for calculating their IRRs and balances Compares the different profitability measures for the same investment: pretax IRR, aftertax IRR, aftertax sensitivity analysis, net present value, accounting rate of return, benefit-cost ratio, and payback period *Management* Springer Nature

A continuous requirement for better urban transport systems and the need for a healthier environment has resulted in an increasing demand for new solutions. Innovative systems, new approaches and original ideas need to be thoroughly tested and critically evaluated before they can be implemented in practice. Moreover, there is a growing need for integration with telecommunications systems and IT applications in order to improve safety, security and efficiency. This volume also addresses the need to solve important pollution problems associated with urban transport in order to achieve a healthier environment. The variety of topics covered by the included research works, which were presented at the 26th International Conference on Urban Transport and the Environment, reflect the complex interaction of urban transport systems with their

environment and the need to establish integrated strategies. The goal is to arrive at optimal socio-economic solutions while reducing the negative environmental impacts of current transportation systems.

Web-Based Green Products Life Cycle Management Systems:

Reverse Supply Chain Utilization John Wiley & Sons

Towards Green Marine Technology and Transport covers recent developments in marine technology and transport. The book brings together a selection of papers reflecting fundamental areas of recent research and development in the fields of ship hydrodynamics, marine structures, ship design, shipyard technology, ship machinery, maritime transportation,

Subsonic versus Supersonic Business Jets - Full Concept Comparison considering Technical, Environmental and Economic Aspectsdiplom.de

Bulletin of the Public Affairs Information Service Emerald Group Publishing

Defrosting for Air Source Heat Pumps: Research, Analysis and Methods presents a detailed analysis of the methods, processes and problems relating to defrosting, a necessary requirement to maintain the performance of ASHP units. Readers will gain a deeper understanding of control strategies and system design optimization methods that improve the performance and reliability of units. The book discusses the most recent experimental and numerical studies of reverse cycle defrosting and the most widely used defrosting method for ASHP. Techno-economic considerations are also presented, as is the outlook for the future. This book is a valuable resource for research students

and academics of thermal energy and mechanical engineering, especially those focusing on defrosting for ASHP, heating, ventilation and energy efficiency, as well as engineers and professionals engaged in the development and management of heat pump machinery. Includes MATLAB codes that allow the reader to implement the knowledge they have acquired in their own simulations and projects Discusses experimental and numerical studies to provide a well-rounded analysis of technologies, methods and available systems Presents techno-economic considerations and a look to the future

Environmental Impact Statement IOS Press

A general review of literature published from 1990

Livestock and the environment CRC Press

Contains summarized inventory, cost, manpower and utilization data relating to automatic data processing equipment (ADPE) used by the United States Government.

DCE technical report WIT Press

This fully revised fourth edition of Max Lay's well-established reference work covers all aspects of the technology of roads and road transport, and urban and rural road technology. It forms a comprehensive but accessible reference for all professionals and students interested in roads, road transport and the wide range of disciplines involved with

Proceedings of the Sixth European Aeronautics Days, Madrid, 30 March - 1 April, 2011 Routledge

This report describes the annual total cost of metallic corrosion in the United States and preventive strategies for optimum corrosion management. The current study showed that technological changes have provided many new ways to prevent

corrosion and there has been improved use of available corrosion management techniques. However, better corrosion management can be achieved using preventive strategies in non-technical and technical areas.

Former Camp Elliott, San Diego, California Subsonic versus Supersonic Business Jets - Full Concept Comparison considering Technical, Environmental and Economic Aspects

Inhaltsangabe: Introduction: On the 26th of August 2010 the new ultra-large-cabin ultra-long-range Gulfstream G650 business jet reached Mach 0.995 during its flight test campaign (1). This is almost the speed of sound (Mach 1) and inspires one to say, why not fly faster than the speed of sound! Reduce travelling time in the commercial business aviation segment. This is, however not a completely new vision. Many companies and research facilities have already spent a lot of time and investment in studies to investigate the feasibility of supersonic flight. Entry Into Service (EIS) for the new Gulfstream G650 is scheduled for 2012. In the following the main performance parameter of the G650 aircraft will be summarised. The parameters range, cruise speed, MTOW, etc. have been selected and serve as a basis to allow an appropriate comparison between the G650 as the latest high end Subsonic Business Jet and potential in future Supersonic Business Jets (SSBJ) within this subject Master Thesis. With the impressive maximum range of nearly 13,000 km the G650 can connect Dubai with New York or London with Buenos Aires within almost 14 hours. Maximum Range @ Normal Cruise Speed: 7,000 nm/12,964 km. Normal Cruise Speed Mach: 0.85/904 km/h. Mmo (Maximum Operating Mach Number): Mach 0.925. Maximum Cruise Altitude: 51,000 ft/15,545 m. Maximum Takeoff Weight

(MTOW): 99,600 lb/45,178 kg. Maximum Fuel Weight: 44,200 lb/20,049 kg. Passengers: 11-18. Price: appr. 60-70 million USD. Gulfstream business rival Bombardier Aerospace also announced in October 2010 two new high end models, the Global 7000 and 8000 with a maximum range of 7,300 nm (13,520 km) and 7,900 nm (14,631 km) at cruise speed Mach 0.85. Entry Into Service is scheduled for 2016 (Global 7000) and 2017 (Global 8000). A comprehensive overview of business jets in service and in development is given in attachment 13.1. A Supersonic Business Jet flying at Mach 2 cruise speed could virtually halve the travelling time, which would enormously enhance the mobility and flexibility. In order to achieve this ambition a paradigm shift is required. New technologies must be established, the impact on the environment must be understood and minimised, existing regulations must be changed to permit overland flight restrictions and the product still needs to be economically viable. All of the above aspects must be considered and will be subject for discussion within this Master Thesis (See also figure [...])

Operations Research: Applications and Algorithms
diplom.de

The market-leading textbook for the course, Winston's OPERATIONS RESEARCH owes much of its success to its practical orientation and consistent emphasis on model formulation and model building. It moves beyond a mere study of algorithms without sacrificing the rigor that faculty desire. As in every edition, Winston reinforces the book's successful features and coverage with the most recent developments in the field. The Student Suite CD-ROM, which now accompanies every new copy of the text, contains the latest versions of commercial software

for optimization, simulation, and decision analysis. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

EPA 600/2 Woodhead Publishing

The task of structuring information on built environment has presented challenges to the research community, software developers and the industry for the last 20 years. Recent work has taken advantage of Web and industry standards such as XML, OWL, IFC and STEP. Another important technology for the fragmented AEC industry is digital communication. Wired or wireless, it brings together architects, engineers and construction site workers, enabling them to exchange information, communicate and work together. Virtual enterprise organization structures, involving mobile teams over distance, are highly compatible with the needs of the construction industry.

Urban Transport XXVI IGI Global

From restaurants to resorts, the hospitality industry demands strong operations management to delight guests, develop employees, and deliver financial returns. This introductory textbook provides students with fundamental techniques and tools to analyse and improve operational capabilities of any hospitality organization.

Introduce your students to the latest advancements that Microsoft Office and Excel have to offer with MICROSOFT OFFICE

365 & EXCEL 2019 -- new to the acclaimed Shelly Cashman Series. MICROSOFT OFFICE 365 & EXCEL 2019 continues the series' strong history of innovation with a hallmark learning approach enhanced to address the varied learning styles of today's students. A trademark step-by-step, screen-by-screen approach encourages students to expand their understanding of the software through experimentation, critical thought, and personalization. This new edition and accompanying resources are designed to engage readers and improve retention while also engaging them in real-world scenarios to reinforce critical skills to make them successful in their educational and professional careers. In addition, MindTap and updated SAM (Skills Assessment Manager) online resources are available to guide additional study and ensure successful results. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

a bibliography with abstracts

This book gathers the proceedings of the 18th International Conference on Computing and Information Technology (IC2IT2022), held on May 19–20, 2022, in Kanchanaburi, Thailand. The topics covered include machine learning, natural language processing, image processing, intelligent systems and algorithms, as well as network and cloud computing. These lead to the major research directions for emerging information technology and innovation, reflecting digital trends.
