In 1987 Mike Robbins, a young journalist in London, felt restless and decided to travel. He never really stopped. In the quarter century that followed he lived and worked in countries as diverse as the world itself. The pieces in this book take the reader from rural Sudan to the headwaters of the Amazon, from Semana Santa in Quito to Buddhist temples in the Himalayas, across Bhutan on a motorbike, into the ancient souk of Aleppo, to the steppes of Central Asia and finally to New York. Along the way there is Ethiopian gin, a sex tourist in Moscow, Kyrgyz women in cycling pants, a surreal toilet in Brussels, echoes of slavery in Brazil, and an encounter with Helen of Troy in Third Avenue. *The Nine Horizons* is an anarchic snapshot of a troubled but beautiful world in transition.

A Summer Reading Pick for President Barack Obama, Bill Gates, and Mark Zuckerberg
From a renowned historian comes a groundbreaking narrative of humanity's creation and evolution—a #1 international bestseller—that explores the ways in which biology and history have defined us and enhanced our understanding of what it means to be "human." One hundred thousand years ago, at least six different species of humans inhabited Earth. Yet today there is only one—homo sapiens. What happened to the others? And what may happen to us? Most books about the history of humanity pursue either a historical or a biological approach, but Dr. Yuval Noah Harari breaks the mold with this highly original book that begins about 70,000 years ago with the appearance of modern cognition. From examining the role evolving humans have played in the global ecosystem to charting the rise of empires, *Sapiens* integrates history and science to reconsider accepted narratives, connect past developments with contemporary concerns, and examine specific events within the context of larger ideas. Dr. Harari also compels us to look ahead, because over the last few decades humans have begun to bend laws of natural selection that have governed life for the past four billion years. We are acquiring the ability to design not only the world around us, but also ourselves. Where is this leading us, and what do we want to become? Featuring 27 photographs, 6 maps, and 25 illustrations/diagrams, this provocative and insightful work is sure to spark debate and is essential reading for aficionados of Jared Diamond, James Gleick, Matt Ridley,

Robert Wright, and Sharon Moalem.

La ricchezza del patrimonio artistico o paesaggistico di una località non è più sufficiente per trasformarne il territorio in prodotto turistico. Oggi è necessario considerare i luoghi come sistemi integrati che mettono insieme le risorse e le attrattive e nei quali giocano un ruolo fondamentale anche le aziende che forniscono servizi diretti e indiretti al turista. Il destination management è un'attività recente che sta muovendo i suoi primi passi, ancora priva di riferimenti precisi in termini di procedura e di gestione. Josep Ejarque, alla luce della sua esperienza e dei successi conseguiti sul campo, spiega in modo chiaro e pratico come si deve agire per fare di una località qualsiasi, anche apparentemente non adatta, una destinazione turistica di successo. Il volume è destinato agli operatori del turismo, a studenti e docenti di scuole e università a indirizzo turistico, ad amministratori locali e responsabili di destinazione.
