Engineering Graphics and Design - 5 Photos - Education An engineering drawing is a type of technical drawing that is used to convey information about an object. A common use is to specify the geometry necessary for the construction of a component and is called a detail drawing. Usually, a number of drawings are necessary to completely specify even a simple component. The drawings are linked together by a master drawing or assembly drawing which gives the drawing numbers of the subsequent detailed components, quantities required, construction material. Engineering drawing - Wikipedia Engineering, Graphics & Design was created from Technical Drawing and is aimed at Engineering and Architecture. Its concepts are modern and relevant compared to the "Old Technical Drawing" syllabus. Isometric and Orthographic Projection is the basis of subject and 2D

and 3D drawings is vital for the visualisation of drawings and manufacturing of concepts.
