The Encyclopedia of Indo-European Culture is a major new reference work that provides full, inclusive coverage of the major Indo-European language stocks, their origins, and the range of the reconstructed Proto-Indo-European language. The Encyclopedia also includes numerous entries on archaeological cultures having some relationship to the origin and dispersal of Indo-European groups -- as well as entries on some of the major issues in Indo-European cultural studies. There are two kinds of entries in the Encyclopedia of Indo-European Culture: a) those that are devoted to

archaeology, culture, or the various Indo-European languages; and b) those that are devoted to the reconstruction of Proto-Indo-European words. Entries may be accessed either via the General Index or the List of Topics: Entries by Category where all individual reconstructed head-forms can also be found. Reference may also be made to the Language Indices. In order to make the book as accessible as possible to the non-specialist, the Editors have provided a list of Abbreviations and Definitions, which includes a number of definitions of specialist terms (primarily linguistic) with which readers may not be acquainted. As the writing systems of many Indo-European groups vary considerably in terms of phonological representation, there is also included a list of Phonetic Definitions. With more than 700 entries, written by specialists from around the world, the Encyclopedia of Indo-European Culture has become an essential reference text in this field.

This book deals with the historical development of the Albanian language (its phonology, morphology and lexicon) from prehistoric times to our days. The main focus of the book is the reconstruction of Proto-Albanian in its relation to its ancestor, Indo-European, and to modern Albanian.

Designing the School Curriculum Routledge

Masterful in its simplicity, *Chronicle in Stone* is a touching coming-of-age story and a testament to the perseverance of the human spirit. Surrounded by the magic of beautiful women and literature, a boy must endure the deprivations of war as he suffers the hardships of growing up. His sleepy country has just thrown off centuries of tyranny, but new waves of domination inundate his city. Through the boy's eyes, we see the terrors of World War II as he witnesses fascist invasions, allied bombings, partisan infighting, and the many faces of human cruelty—as well as the simple pleasures of life. Evacuating to the countryside, he expects to find an ideal world full of extraordinary things, but discovers instead an archaic backwater where a severed arm becomes a talisman and deflowered girls mysteriously vanish. Woven between the chapters of the boy's story are tantalizing fragments of the city's history. As the devastation mounts, the fragments lose coherence, and we perceive firsthand how the violence of war destroys more than just buildings and bridges.

The great Russian psychologist L. S. Vygotsky has long been recognized as a pioneer in developmental psychology. But somewhat ironically, his theory of development has never been well understood in the West. *Mind in Society* should correct much of this misunderstanding. Carefully edited by a group of outstanding Vygotsky scholars, the book presents a unique selection of Vygotsky's important essays, most of which have previously been unavailable in English. The Vygotsky who emerges from these pages can no longer be glibly included among the neobehaviorists. In these essays he outlines a dialectical-materialist theory of cognitive development that anticipates much recent work in American social science. The mind, Vygotsky argues, cannot be understood in isolation from the surrounding society. Man is the only animal who uses tools to alter his own inner world as well as the world around him. From the handkerchief knotted as a simple mnemonic device to the complexities of symbolic language, society provides the individual with technology that can be used to shape the private processes of mind. In *Mind in Society* Vygotsky applies this theoretical framework to the development of perception, attention, memory, language, and play, and he examines its implications for education. The result is a remarkably interesting book that is bound to renew Vygotsky's relevance to modern psychological thought.

Leadership in today's organizations is a tough business. Organizational leaders face a number of challenges as their jobs, and the world around them, become increasingly complex. Trends, such as organizational "delaying," rapid technological advances, and increased employee empowerment require that leaders adapt their techniques and styles of leadership to meet these new challenges. Consequently, there has been an explosion of interest in leadership in recent years as researchers and management educators struggle to understand the process of leadership development, how it operates, and what characteristics make effective leaders. Born of these questions, the 11th Annual

Kravis-de Roulet Leadership Conference at Claremont McKenna College brought together an impressive slate of scholars whose theories, research, and cutting-edge techniques are now gathered together in this impressive volume. Each chapter asks and answers questions about the current state of the field while providing future direction for research to help bridge the gap between leadership researchers and leadership development practitioners. Notable topics include chapters on "e-leadership" and leadership within the "virtual" organization, exploring 360-degree feedback, the importance of "social capital," and a comprehensive analysis of the well-researched theory of Leader Member Exchange.

'That which puzzled and fascinated me whenever I met Lasgush was this sensation of the impossible. It was impossible to get on with him as you did with others. The moment you were at him, or rather, the moment you knocked at his door, suddenly all became another thing. There was another logic, another code, other words, wrapped up in another meaning. .when you went to Lasgush's, it was more than going abroad. You believed you dropped somewhere beyond our time, beyond the everyday way of looking at things. One more step and it looked as if you would cross the borders of life and would find yourself in Dante's nothingness. .He was unpredictable, corrosive like acid, creepy, startling. His laugh was like as if beyond our life, mirthless, and his sadness had no

grief. As for his anger, it was such as well, luxurious, cold, whereas his contempt was radiating from afar, as if adorned with silver.' (Kadare, In My Studio. pp 207, 208, 209. My translation) -All this Saussurean lava of meaning has its own matchless 'crater' from where it erupts and reaches us time and again, endlessly. Lasgush's Word has its own individual suspension, chiselled by the hand of a true master. It is breathlessly succinct and, in all probability, on a par with the best ever created. Lasgush says that his Word is: 'Mystery that burns in a thread of lightning.' (My Fiery Tongue)

This volume is a new compendium of Albanian etymology tracing thousands of modern Albanian words back to their origins. It contains detailed information on the Indo-European vocabulary preserved in Albanian as well as on numerous loanwords coming from ancient Greek, Latin, early Romance and Slavic. The ancient elements of the Albanian vocabulary are used for the reconstruction of their Proto-Albanian origin and then compared with their Indo-European parallels. The history of Indo-European words and of early loanwords in Albanian shows the history and culture of the Albanian people reflected in the etymology of the Albanian language. The book also includes a short sketch of Albanian historical phonetics and a vast bibliography. Every entry is extensively documented and contains earlier etymological explanations and interpretations.

"Designing the School Curriculum" takes a practical, step-by-step approach, giving students the thorough grounding in the process that leads to confident and effective practitioners. The author emphasizes the discretionary judgment of the individual teacher and acknowledges that the curriculum design process is completed only in the unique and spontaneous learning exchanges between students and teachers. Practical ideas on the formation of school purposes, the design of school-wide experiences, effective implementation, and the creation of responsive evaluative mechanisms help students to fulfill the goal of the text to design an authentic and effective curriculum. After an introductory chapter examining the role of the teacher in the design process and two brisk chapters leading students through the theoretical foundations of curriculum development, the text launches into the curriculum design process, giving a close look to each element. Hlebowitsh makes a valuable contribution to the field with this new text, offering a contemporary treatment of classic curriculum design theory and, most importantly, equipping students to engage in effective curriculum design themselves. "

This book is the first comprehensive survey of mood in the languages of Europe. It gives readers access to a collection of data on mood. Each article presents the mood system of a specific European language in a way that readers not familiar with this language are able to understand and to interpret the data. The articles contain information on the morphology and semantics of the mood system, the possible combinations of tense and mood morphology, and the possible uses of the non-indicative mood(s). The papers address the explanation of mood from an empirical and descriptive perspective. This book is of interest to scholars of mood and modality, language contact, and areal linguistics and typology.

Two destinies intersect in this novel -- that of Gjorg, a young mountaineer who has just killed a man in order to avenge the death of his older brother, and who expects to be killed himself in keeping with the code of the highlands; and that of a young couple who have come to study the age-old customs, including the blood feud.

Historical Dictionary of Albania Walter de Gruyter

Albania is not well known by outsiders; it was deliberately closed to the outside world during the communist era. Now it has thankfully become free again, its borders are open and it can be visited, and it is increasingly integrating with the rest of Europe and beyond. Unfortunately, Albania has had its share of problems in the post-communist era; it's a land of destitution and despair, thanks in part to the Albanian mafia, which has turned the country into one of blood-feuds, kalashnikovs, and

eternal crises. Yet, Albania is, in essence, a European nation like any other and will soon, it is to be hoped, advance and take its proper place in Europe and the world. The second edition of the *Historical Dictionary of Albania* relates the history of this little-known country through a detailed chronology, an introduction, a bibliography, appendixes, and over 700 cross-referenced dictionary entries on significant persons, places, and events; institutions and organizations; and political, economic, social, cultural, and religious facets.

Mind in Society Taylor & Francis

George Kennedy's three volumes on classical rhetoric have long been regarded as authoritative treatments of the subject. This new volume, an extensive revision and abridgment of *The Art of Persuasion in Greece*, *The Art of Rhetoric in the Roman World*, and *Greek Rhetoric under Christian Emperors*, provides a comprehensive history of classical rhetoric, one that is sure to become a standard for its time. Kennedy begins by identifying the rhetorical features of early Greek literature that anticipated the formulation of "metarhetoric," or a theory of rhetoric, in the fifth and fourth centuries b.c.e. and then traces the development of that theory through the Greco-Roman period. He gives an account of the teaching of literary and oral composition in schools, and of Greek and Latin oratory as the primary rhetorical genre. He also discusses the overlapping disciplines of ancient philosophy and religion and their interaction with rhetoric. The result is a broad and engaging history of classical rhetoric that will prove especially useful for students and for others who want an overview of classical rhetoric in condensed form.

Mood in the Languages of Europe BRILL

Many languages, particularly those which have achieved literary status, have been studied in great detail, and specialized descriptions of these are plentiful. What has not been so readily available, however, is a general survey covering a wide spectrum of the world's languages on a comparative basis. It is this kind of comparative cross-section of languages, ranging from the familiar and well-documented to the relatively obscure, that the *Compendium of the World's Languages* presents.
