*Clinical Cases: Nursing care case studies - Inkling* Elsevier Health Sciences

Praise for the first edition: "This is an excellent teaching guide and resource manual for instructors, gerontological nursing students, and practicing nurses and social workers who wish to learn more about geriatric concerns and care. It will be kept by nursing students long after they graduate as a guide to resources that will be valuable throughout their nursing careers. As a home care nurse working mainly with the geriatric community, I found the resources helpful in my practice. As an instructor, I found the book to be a very useful guide for teaching geriatrics." Score: 90, 4 Stars —Doody's Medical Reviews "[This] is a unique volume that effectively addresses the lack of gerontology case studies for use with undergraduate nursing students. Case studies are a pedagogically powerful approach to active learning that offer opportunities to apply content to clinical practice." —The Gerontologist "The case narrative approach of this book promotes active learning that is more meaningful to students (and practicing nurses) and more likely to increase the transfer of evidence into practice. An excellent resource for faculty (staff educators) to facilitate critical learning skills." —Liz Capezuti, PhD, RN, FAAN Dr. John W. Rowe Professor in Successful Aging Co-Director, Hartford Institute for Geriatric Nursing New York University College of Nursing Vivid case examples help guide nurses in developing appropriate interventions that include complementary and alternative health therapies and provide a basis for evaluating outcomes. Exercises interspersed throughout each case study include numerous open-ended and multiple-choice questions to facilitate learning and critical thinking. The text is unique in that some of the presented cases focus on psychosocial issues such as gambling addiction, hoarding behavior, emergency preparedness, and long-distance caregiving. Cases also depict geriatric clients who are living healthy, productive lives to counter myths and negative attitudes about older adults. Scenarios demonstrating ethical dilemmas prepare students to appropriately respond to "gray area" situations. The text is geared for AACN and NLN accreditation and is organized according to the needs of actual clinical settings. With cases that take place in the home and community or within primary, acute, and long-term care facilities, this book will be useful for courses specific to gerontology nursing or across any nursing curriculum. New to the Second Edition: A completely new section of Aging Issues Affecting the Family New cases addressing health care disparities, aging in place, and prevention of catheter-associated urinary tract infection Additional contemporary case studies The addition of Quality for Safety in Nursing Education (QSEN) initiatives A greater focus on prioritization and delegation of client's needs infused throughout exercises

Annotation. Based on real life scenarios, the Clinical Cases series presents quality case studies, complete with answers, to provide nursing students with an opportunity to explore scenarios they are likely to encounter in a variety of practice settings. Clinical Cases: Nursing Care Case Studies is perfect for use during exam preparation or as a study tool, providing an engaging approach to

learning and revision.

*Psychiatric Mental Health Case Studies and Care Plans* Elsevier Health Sciences

Thinking. Doing. Caring. Connect nursing theory to clinical practice with 46 in-depth, real-world case studies. For each case study, answer questions that call on you to recall facts, understand nursing concepts, apply critical thinking, and sharpen your clinical reasoning skills in common clinical situations.

Nursing Case Studies and Analyses Springer Publishing Company

Get the accurate, practical information you need to succeed in the classroom, the clinical setting, and on the NCLEX-RN® examination. Written by the foremost experts in maternity and pediatric nursing, the user-friendly Maternal Child Nursing Care, 6th Edition provides both instructors and students with just the right amount of maternity and pediatric content. This new edition includes updated case studies within Nursing Care Plans, as well as a new chapter on pediatric cancer. Focus on the family throughout emphasizes the influence of the entire family in health and illness. Expert authors of the market-leading maternity and pediatric nursing textbooks combine to ensure delivery of the most accurate, up-to-date content. Critical thinking case studies offer you opportunities to test and develop your analytical skills and apply knowledge in various settings. Nursing Care Plans include rationales for interventions and provide you with an overview and specific guidelines for delivering effective nursing care. Nursing Alerts highlight critical information that you need to know when treating patients. Guidelines boxes outline nursing procedures in an easy-to-follow format. Emergency boxes in the maternity unit guide you through step-by-step emergency procedures. Home Care boxes detail important information that you need to deliver care to patients and families in the home setting. Atraumatic Care boxes in the pediatric unit teach you how to provide competent and effective care to pediatric patients with the least amount of physical or psychological stress. Community Focus boxes emphasize community issues, provide resources and guidance, and illustrate nursing care in a variety of settings. Patient Teaching boxes in the maternity unit highlight important information nurses need to communicate to patients and families. Cultural Competence boxes equip you with the knowledge you need to deliver culturally competent care. Family-Centered Care boxes draw attention to the needs or concerns of families that you should consider to provide family-centered care. Medication Guides serve as an important reference of drugs and their interactions.

Nursing Care Case Studies Mosby

Leadership and Management Tools for the New Nurse John Wiley & Sons

The need for nurses is greater than ever before. There are no short-term solutions to this problem: as currently practicing nurses age and retire, so does the population as a whole, further increasing the need for health care services. Today, more than ever before, we need you, the nursing student, to succeed in your studies. Today, more than ever before, we need you, the nursing student, to enter the nursing profession. Today, more than ever before, we need you, the nursing student, to

see nursing as a career, not just a job. This book is dedicated to your success as a student and as a practicing nurse. We believe a strong foundation in understanding the common diseases and disorders that affect adult clients is necessary to provide effective nursing care. We believe that understanding the basis for nursing care activities is vital to providing individualized care for clients. We believe that client teaching is a vital nursing role at all levels and in all settings. *Medical-Surgical Nursing Care* provides a strong foundation for caring through its emphasis on pathophysiology, nursing care, and client teaching. Understanding comes not through memorization, but through practice and integration of new material into your thinking. *Medical-Surgical Nursing Care* promotes understanding in several ways. The writing style is clear, with a focus on readability. Its content is streamlined but thorough, focusing on what you need to know and to be able to do. Organization *Medical-Surgical Nursing Care* is organized to promote learning. Part One, *Medical-Surgical Nursing Practice*, focuses on concepts, issues, and nursing care applicable to caring for adults in many different situations and settings. Parts Two through Seven focus on diseases and disorders affecting adults. These disorders are organized by functional health patterns (for example, nutritional-metabolic, activity-exercise) and by affected body systems under each functional health pattern (for example, common skin problems, bowel disorders, cardiac disorders). Each chapter begins with a *Caring Tip* that provides words of wisdom from the lived experience of a practicing nursing or nurse educator. You will be able to use these tips as you move into and through your career in nursing. *Learning Outcomes* help focus and define your learning as you read and study the material. The structure and function of the affected body system is reviewed at the beginning of the chapter. Disorders affecting that body system are presented in a consistent format: the disorder is defined; its pathophysiology, signs and symptoms, and complications are explained; and Collaborative Care (including diagnostic tests, pharmacology, surgery, and other treatments) for the disorder is outlined. Nursing Care related to the disorder is presented in a nursing process format. When a disorder is major, very complex, or very common, all of the Nursing Process steps are provided. When it is not, the text provides an abbreviated, more focused discussion, similar to the focused assessment nurses perform. Because teaching is a vital nursing role, discussion of each disorder concludes with Discharge Considerations and teaching for the client and family. Case Studies following many major disorders bring the disorders to life. Clients rarely arrive in a health care setting as a pure medical diagnosis. As humans, clients bring all their roles and responsibilities as individuals, spouses, parents, children, workers, students, friends, and volunteers. They arrive as unique individuals influenced by their ethnicity, culture, and background. They arrive with psychosocial issues such as fear, guilt, or difficulty meeting financial responsibilities. They often arrive with other diseases and disorders complicating the current problem. The case studies in this text emphasize the holistic aspects of nursing care. Critical Thinking Questions conclude each case study. These questions allow you to practice your new found learning and to expand your thinking beyond the immediate focus of the disease or disorder presented. Additional Critical Thinking Self-Check Questions are provided on the CD-ROM throughout nursing care chapters. They provide more case scenarios for you to use to test your knowledge and thinking skills. These self-check questions focus on the nursing roles of collecting assessment data and implementing nursing care. Each case is matched with hints to guide your critical thinking. They will help you learn to individualize your

nursing care. Each chapter concludes with features to reinforce and enhance your learning. Key Terms by Topic list the boldfaced key terms in the text by the topic under which they were defined. Key Points provide a summary of chapter content with reminders that you can use throughout your nursing career. For Further Study is a handy listing of cross-references within the chapter and the topics to which they apply. An interactive Critical Thinking Care Map provides a brief case study, assessment data, and a nursing diagnosis for a specific client. We then ask you, the student, to sort the data and sample interventions, evaluate the results, and chart your findings. Finally, NCLEX-PN Review Questions and a Test-Taking Tip help you review the chapter material and practice your test-taking skills. Features Throughout each chapter, you will find consistent features to facilitate and reinforce your learning. To avoid interrupting your reading by reaching for your medical dictionary, Key Terms are presented in boldface type. They are defined in the text and the glossary at the end of the book. Other important or unfamiliar terms are italicized and defined in the text. Clinical Alerts within the text emphasize information critical to providing effective, safe clinical nursing care. Cultural Care Strategies, including nursing implications and self-reflection questions, prepare students to deliver culturally sensitive adult nursing care. Color-coded boxes organize highlighted information for quick retrieval: red Data Collection boxes for manifestations and risk factors of a disorder; blue Nursing Care boxes for nursing care related to specific tests or procedures; orange boxes highlighting Client Teaching; and green boxes focusing on specific Population Groups and Nutrition information. Nursing Care Checklists quickly summarize nursing care activities for particular procedures or surgeries. Procedure Checklists review key steps in performing previously learned nursing care procedures and provide Sample Documentation. Pharmacology Tables highlight nursing implications and client teaching for drugs used to treat particular disorders. *Interactive Case Studies for Maternity and Pediatric Nursing Care Printed Access Card* F.A. Davis Dillon delivers with a workbook that follows *Nursing Health Assessment: A Critical Thinking, Case Studies Approach*, 2nd Edition chapter by chapter. Pages are three-hole punched and perforated for ease of submission for educators' review. Answers appear in the back of the book. But it's far more than a workbook!

Cross- Cultural Perspectives in Medical Ethics, Second Edition, is an anthology of the latest and best readings on the medical ethics of as many of the major religious, philosophical, and medical traditions that are available today.

**Measuring Capacity to Care Using Nursing Data** Springer Publishing Company

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

**Unfolding Health Assessment Case Studies for the Student Nurse** Lippincott Williams & Wilkins

Perfect for: • Diploma of Nursing Students. Apply theory to practice with the Clinical Cases textbook series! Clinical Cases: Nursing Care Studies is the perfect textbook for nursing students completing their Diploma. This nursing book offers a variety of case studies based on common real-life examples that you are likely to encounter in practice. Written by Margaret Webb and Ellie Kirov, Nursing Care Studies focusses on key nursing care topics, including: Vital Signs, Skin Integrity and Wound Care, Community-based Care, General Health Assessment, Medications and Palliative Care. Benefit from the logical structure of this nursing book, where each case study begins with an introduction of the presenting condition and associated symptoms. As the scenario develops, more information is provided, such as the patient's condition, medications, tests and other important factors. Best of all, the conclusion of each case study emphasises patient outcomes and emphasises key points, providing you a great summary to reflect on. Make the most of Clinical Cases: Nursing Care Studies by using it in conjunction with Tabbner's Nursing Care: Theory and Practice, 6th Edition by Gabby Koutoukidis, Kate Stainton and Jodie Hughson as you progress through your Diploma of Nursing. Used together, these nursing textbooks provide a strong foundation for your knowledge of important themes and issues in nursing care. Support your nursing education by purchasing the other great titles available in the Clinical Cases textbook series. Other titles in this series: • Clinical

Cases: Fundamentals of Nursing Case Studies by Natasha Scully and Damian Wilson. • Clinical Cases: Medical-Surgical Nursing Case Studies by Janine Bothe. Other formats: This book is also available as an App via the Apple App Store

<https://itunes.apple.com/au/app/clinical-cases-nursing-care/id659030265?mt=8> • Easy-to-understand, logical layout. • 24 case studies covering key topics in nursing care. • Multiple choice questions to test your knowledge throughout the textbook. • Rationales provided for all answers. • References for further reading and research. • Designed as an exam preparation and revision tool.

**Gerontology Nursing Case Studies, Second Edition** National Academies Press

Complex pharmacologic information is simple to learn with this complete study resource! Designed to accompany Lehne's Pharmacology for Nursing Care, 9th Edition, this robust workbook features critical thinking study questions, case studies, and patient teaching scenarios that help you connect pharmacology concepts with their impact on patient care. Plus, an emphasis on priority nursing care with NCLEX examination-style review questions prepares you for success on the exam. NCLEX Examination-style questions are included in each chapter. NEW! NCLEX-style alternate format questions including prioritization questions, bolster your readiness for the NCLEX Exam while supporting review of core pharmacology content NEW! Increased emphasis on patient safety features questions on safe patient care that challenge you to select appropriate actions to prevent or remediate medication errors. NEW! Detailed rationales for all prioritization questions are included in the answer key and encompass explanations for both correct and incorrect responses.

**100+ Narratives for Learning** Mosby Incorporated

Oncology is rapidly changing due to advances in chemotherapy, biotherapy, hormonal therapy, genetics, and supportive care. This text assists the oncology nurse in keeping up to date with these changes through case studies, learning objectives, and references.

**A Case-Based Approach** LWW

This book uses the latest research findings to apply critical thinking processes for the development of diagnostic reasoning and the selection of patient outcomes and nursing interventions. Four chapters describe the meaning of intelligence, critical thinking, and application of critical thinking processes within nursing. The case studies and their ultimate resolution to intervention and outcome illustrate these processes by enabling repeated practice. Case studies are organized into four sections; problem diagnoses, risk diagnoses, health promotion diagnoses, and strength diagnoses. A companion website provides on-line resources.

**An Unfolding Case Study Review** Elsevier Health Sciences

Detailed and up-to-date, this new second edition offers practical case studies covering a wide variety of critical care problems. Each features questions and answers to help readers sharpen their critical-thinking skills and prepare for the CCRN exam. It features new chapters on blunt abdominal trauma and abdominal aortic aneurysm, and updated case studies reflect new treatment modalities and current critical care pharmacology.

**Medical Surgical Nursing Care** W B Saunders Company

Community health nurses are confronted with unique problems throughout their career. Students learning from CASE STUDIES IN COMMUNITY HEALTH NURSING PRACTICE are prepared for these challenges. This unique text and workbook teaches students to think critically and apply knowledge

to solve problems. As students explore each case in detail, they use problem-based learning techniques to apply their knowledge, ask the right questions, gather supporting data, sort through options, and determine optimal solutions with rationales and possible consequences. The problem-based learning approach in this text will help students develop creative and critical thinking skills and demonstrate problem-solving abilities. \* Includes 18 case studies representing various community health issues. Each case teaches students to apply what they already know and gather new information to determine solutions to real world and complex problems. \* Provides questions to guide case analysis that take the student through the steps of the problem-solving process. \* Employs a workbook-type layout in a lay-flat binding that allows ample room to take notes and write solutions to the cases. \* Supports individual, small group, or classroom use with its format and case-study approach.

#### Case Studies in Critical Care Nursing Elsevier Health Sciences

Home health care is an important aspect of community health and a growing area of healthcare services. *Clinical Case Studies in Home Health Care* uses a case-based approach to provide homehealthcare professionals, educators, and students with a useful tool for thoughtful, holistic care. The book begins with a thorough and accessible introduction to the principles of home health care, including a discussion of supporting theoretical frameworks and information on managing complexities, transitioning patients to home care, and preparation for the home visit. Subsequent sections are comprised entirely of case studies organized by body system. Though cases are diverse in content, each is presented in a consistent manner, incorporating relevant data about the patient and caregivers and the approach to patient care and promoting a logical approach to patient presentation. Cases also include helpful tips about reimbursement practices, cultural competence, community resources, and rehabilitation needs.

#### *Clinical Case Studies in Home Health Care* Springer Publishing Company

Mastering critical thinking skills can be challenging for student nurses. Case studies help but can be flat and predictable. Instead, this book uses unfolding case studies that provide new information as the reader goes along, teaching critical skills and the knowledge to apply what is learned in nursing school to real-life on-the-job situations.

#### *Leadership and Management in Nursing Test Success* Mosby

Features evidence-based, practical, and effective strategies for creating and maintaining optimal quality of life for older adults. This globally focused resource integrates sound research evidence, real-life case scenarios, and effective, practical strategies to address a key health care initiative of the 21st century: optimal quality of life for older adults. Distinguished by its broad outlook, the book includes contributions from an international cadre of widely published scholars and is designed for easy integration into traditional nursing education curricula. The book explores the experiences of older adults at home, in assisted living, and in nursing home environments, examining their complex and wide-ranging health, spiritual, and emotional needs. The book is organized into two sections that address quality of life issues. Section I broadly addresses quality of life issues across the full range of care environments, while Section II addresses some of the more specific issues and health conditions that have an impact on the quality of life of older adults. A detailed and multidimensional case study opens each chapter, including subjective and objective data focusing on the quality-of-

life domain being addressed. Articulation and definition of each quality-of-life issue are presented along with information on the incidence and prevalence of the problem. Several cases addressing issues older adults encounter in preventing and managing acute and chronic disease serve as a clinical resource guide, with an emphasis on clinical reasoning. Each chapter features a comprehensive, synthesized literature review, delivering the best evidence in the field and offering effective strategies for managing care issues. Generalist and advanced practice nursing roles in promoting quality of life, along with relevant cultural considerations, are covered in detail. Each chapter concludes with tips and strategies for the promotion of quality of life among older adults, accompanied by a list of critical thinking questions. Content is organized to be compatible with the Adult-Gero Nurse Practitioner Certification Test Plan. Key Features: Addresses key quality-of-life education and practice initiatives advanced by leading gerontology organizations worldwide. Includes detailed, multifaceted case studies reflecting extensive, current evidence-based literature. Describes practical, cost-effective strategies aimed at maintaining health. Disseminates the universally applicable perspectives of international scholars of global aging. Provides content compatible with the Adult-Gero Nurse Practitioner Certification Test Plan.

#### **A Critical Thinking, Case Studies Approach** Lippincott Williams & Wilkins

Immerse Yourself in the Role of a Pediatric Nurse. Develop the clinical judgment and critical thinking skills needed to excel in pediatric nursing with this innovative, case-based text. *Pediatric Nursing: A Case-Based Approach* brings the realities of practice to life and helps you master essential information on growth and development, body systems, and pharmacologic therapy as you apply your understanding to fictional scenarios based on real clinical cases throughout the pediatric nursing experience. Accompanying units leverage these patient stories to enrich your understanding of key concepts and reinforce their clinical relevance, giving you unparalleled preparation for the challenges you'll face in your nursing career. Powerfully written case-based patient scenarios instill a clinically relevant understanding of essential concepts to prepare you for clinicals. Nurse's Point of View sections in Unit 1 help you recognize the nursing considerations and challenges related to patient-based scenarios. Unfolding Patient Stories, written by the National League for Nursing, foster meaningful reflection on commonly encountered clinical scenarios. Let's Compare boxes outline the differences between adult and pediatric anatomy and physiology. Growth and Development Check features alert you to age and developmental stage considerations for nursing care. The Pharmacy sections organize medications by problem for convenient reference. Whose Job is it Anyway? features reinforce the individual responsibilities of different members of the healthcare team. Analyze the Evidence boxes compare conflicting research findings to strengthen your clinical judgment capabilities. How Much Does It Hurt? boxes clarify the principles of pediatric pain relevant to specific problems. Hospital Help sections alert you to specific considerations for the hospitalization of pediatric patients. Priority Care Concepts help you confidently assess patients and prioritize care appropriately. Patient Teaching boxes guide you through effective patient and parent education approaches. Patient Safety alerts help you quickly recognize and address potential safety concerns. Interactive learning resources, including Practice & Learn Case Studies and Watch & Learn Videos, reinforce skills and challenge you to apply what you have learned. Learning Objectives and bolded Key Terms help you maximize your study time. Think Critically questions instill the clinical

reasoning and analytical skills essential to safe patient-centered practice. Suggested Readings point you to further research for more information and clinical guidance.
