What habits are  
common among good

college writers? Good  
college writers are  
curious, engaged,  
reflective, and  
responsible. They read  
critically. They write  
with purpose. They  
tune into their  
audience. They  
collaborate and seek  
feedback. They know

credible evidence makes them credible researchers. They revise. The Bedford Handbook, based on surveys with more than 1,000 first-year college students, fosters these habits and offers more support than ever before for college reading and writing. New writing guides support students as they compose in an ever-wider variety of genres, including multimodal genres. New reading support encourages students to become active readers. Retooled research advice emphasizes inquiry and helps writers cite even the trickiest digital sources confidently and responsibly. Best of all, the Handbook remains a trusted companion for students because it is accessible,

comprehensive, and authoritative. Instructors benefit, too: A substantially revised Instructor's Edition includes Nancy Sommers's personal mentoring—more than 100 new concrete tips for teaching with the handbook. Finally, integrated digital content is easily assignable and helps students practice and apply the handbook's lessons.

**The Bluest Eye** Knopf In their only fully collaborative literary work, Michael Dorris and Louise Erdrich have written a gripping novel of history, suspense, recovery, and new beginnings. *The Crown of Columbus* chronicles the adventures of a pair of mismatched lovers--Vivian Twostar, a divorced, pregnant

anthropologist, and Roger Williams, a consummate academic, epic poet, and bewildered father of Vivian's baby--on their quest for the truth about Christopher Columbus and themselves. When Vivian uncovers what is presumed to be the most diary of Christopher Columbus, she and Roger are drawn into a journey from icy New Hampshire to the idyllic Caribbean in search of "the greatest treasure of Europe." Lured by the wild promise of redeeming the past, they are plunged into a harrowing race against time and death that threatens--and finally changes--their lives. A rollicking tale of adventure, *The Crown of Columbus* is also

contemporary love story and a tender examination of parenthood and passion.

Government of Canada ratified the United Nations Convention on the Rights of the Child, requiring governments at all levels to ensure that Canadian laws and practices safeguard the rights of children. A

Question of  
Commitment:

*Children's Rights in Canada* is the first book to assess the extent to which Canada has fulfilled this commitment. The editors, R. Brian Howe and Katherine Covell, contend that Canada has wavered in its commitment to the

rights of children and is ambivalent in the political culture about the principle of children's rights. A Question of Commitment expands the scope of the editors' earlier book, *The Challenge of Children's Rights for Canada*, by including the voices of specialists in particular fields of children's rights and by incorporating recent developments. *Recitatif* Purdue University Press

• From the acclaimed Nobel Prize winner—a powerful examination of our obsession with beauty and conformity that asks questions about race, class, and gender with characteristic subtlety and grace. In Morrison's acclaimed

first novel, *Pecola Breedlove*—an 11-year-old Black girl in an America whose love for its blond, blue-eyed children can devastate all others—prays for her eyes to turn blue: so that she will be beautiful, so that people will look at her, so that her world will be different. This is the story of the nightmare at the heart of her yearning, and the tragedy of its fulfillment. Here, Morrison's writing is "so precise, so faithful to speech and so charged with pain and wonder that the novel becomes poetry" (*The New York Times*).

This report discusses the findings of a nationwide study on the use of private prisons in the United States. The number of these prisons grew enormously between 1987 and 1998, with

proponents suggesting that allowing facilities to be operated by the private sector could result in cost reductions of 20%. The study examined the historical factors that gave rise to the higher incarceration rates, fueling the privatization movement, and the role played by the private sector in the prison system. It outlines the arguments, both in support of and opposition to, privatized prisons, reviews current literature on the subject, and examines issues that will have an impact on future privatizations. The report concludes that, rather than the projected 20-percent savings, the average saving from

privatization was only about 1 percent, and most of that was achieved through lower labor costs.

Nevertheless, there were indications that the mere prospect of privatization had a positive effect on prison administration, making it more responsive to reform.

R. Douglas Hurt's brief history of American agriculture, from the

prehistoric period through the twentieth century, is written for anyone coming to this subject for the first time. American Agriculture is a story of considerable achievement and success, but it is also a story of greed, racism, and violence. Hurt offers a provocative look at a history that has been shaped by the best and worst of human nature. Here is the background essential for understanding the complexity of American agricultural history, from the transition to commercial agriculture during the colonial period to the failure of government policy following World War II. Complete with maps, drawings, and over seventy splendid photographs, this

revised edition closes with an examination of the troubled landscape at the turn of the twenty-first century. It also provides a ready reference to the economic, social, political, scientific, and technological changes that have most affected farming in America and the contributions of African Americans, Native Americans, and women. This survey will serve as a text for courses in the history of American agriculture and rural studies as well as a supplementary text for economic history and rural sociology courses.

With his “deeply informed and

compassionate book...Dr. Epstein tells us that it is a ‘moral imperative’ [for doctors] to do right by their patients” (New York Journal of Books). The first book for the general public about the importance of mindfulness in medical practice, *Attending* is a groundbreaking, intimate exploration of how doctors approach their work with patients. From his early days as a Harvard Medical School student, Epstein saw what made good doctors great—more accurate diagnoses, fewer errors, and stronger connections with their patients. This made a lasting impression on him and set the stage for his life’s work—identifying the qualities and habits that distinguish master

clinicians from those who are merely competent. The secret, he learned, was mindfulness. Dr. Epstein “shows how taking time to pay attention to patients can lead to better outcomes on both sides of the stethoscope” (Publishers Weekly). Drawing on his clinical experiences and current research, Dr. Epstein explores four foundations of mindfulness—Attention, Curiosity, Beginner’s Mind, and Presence—and shows how clinicians can grow their capacity to provide high-quality care. The commodification of health care has shifted doctors’ focus away from the healing of patients to the bottom line. Clinician burnout

is at an all-time high. Attending is the antidote. With compassion and intelligence, Epstein offers “a concise guide to his view of what mindfulness is, its value, and how it is a skill that anyone can work to acquire” (Library Journal).

 NEW YORK TIMES BEST SELLER • A beautiful,

arresting story about race and the relationships that shape us through life by the legendary Nobel Prize winner—for the first time in a beautifully produced stand-alone edition, with an introduction by Zadie Smith “A puzzle of a story, then—a game.... When [Morrison] called *Recitatif* an ‘experiment’ she meant it. The subject of the experiment is the reader.” —Zadie Smith, award-winning, best-selling author of *White Teeth* In this 1983 short story—the only short story Morrison ever wrote—we meet Twyla and Roberta, who have known each other since they were eight years old and spent four months together as roommates in St.

Bonaventure shelter. Inseparable then, they lose touch as they grow older, only later to find each other again at a diner, a grocery store, and again at a protest. Seemingly at opposite ends of every problem, and at each other's throats each time they meet, the two women still cannot deny the deep bond their shared experience has forged between them. Another work of genius by this masterly writer, Recitatif keeps Twyla's and Roberta's races ambiguous throughout the story. Morrison herself described Recitatif, a story which will keep readers thinking and discussing for years to come, as "an experiment in the removal of all racial codes from a narrative about two characters

of different races for whom racial identity is crucial." We know that one is white and one is Black, but which is which? And who is right about the race of the woman the girls tormented at the orphanage? A remarkable look into what keeps us together and what keeps us apart, and how perceptions are made tangible by reality, Recitatif is a gift to readers in these changing times.

### **The Naked Employee**

Mango Media Inc. "The Yellow Wallpaper" is a short story by American writer Charlotte Perkins Gilman, first published in January 1892 in *The New England Magazine*.<sup>[1]</sup> It is regarded as an important early work of American feminist literature, due to its illustration of the attitudes towards mental and physical health of women in the 19th century. Narrated in the first person, the story is a collection of journal entries written

by a woman whose physician husband (John) has rented an old mansion for the summer. Forgoing other rooms in the house, the couple moves into the upstairs nursery. As a form of treatment, the unnamed woman is forbidden from working, and is encouraged to eat well and get plenty of air, so she can recuperate from what he calls a "temporary nervous depression - a slight hysterical tendency", a diagnosis common to women during that period

This book seeks to separate fact from fiction in the global-warming debate. The author begins by describing the history of the

Intergovernmental Panel on Climate Change (IPCC) and many other conferences, and their dire predictions on global temperatures, rainfall, weather and climate, while highlighting confusion and sensationalism in media reports. He then lays out the "heretical" scientific case of the sizable skeptical scientific community who challenge the accepted wisdom.

A new collection from David Sedaris is cause for jubilation. His recent move to Paris has inspired hilarious pieces, including *Me Talk Pretty One Day*, about his attempts to learn French. His family is another inspiration. *You Cant Kill the Rooster* is a portrait of his brother who talks incessant hip-hop slang to his bewildered father. And no one hones a finer fury in response to such modern annoyances as restaurant meals presented in ludicrous towers and cashiers with 6-inch fingernails. Compared by *The New Yorker* to Twain and Hawthorne, Sedaris has become one of our best-loved authors. Sedaris is an amazing reader whose

appearances draw hundreds, and his performances including a jaw-dropping impression of Billie Holiday singing *I wish I were an Oscar Meyer weiner* are unforgettable. Sedaris's essays on living in Paris are some of the funniest he's ever written. At last, someone even meaner than the French! The sort of blithely sophisticated, loopy humour that might have resulted if Dorothy Parker and James Thurber had had a love child. *Entertainment Weekly* on *Barrel Fever* Sidesplitting Not one of the essays in this new collection failed to crack me up; frequently I was helpless. *The New York Times Book Review* on *Naked*
