In the United States and Europe, the word "caliphate" has conjured historically romantic and increasingly pernicious associations. Yet the caliphate's significance in Islamic history and Muslim culture remains poorly understood. This book explores the myriad meanings of the caliphate for Muslims around the world through the analytical lens of two key moments of loss in the thirteenth and twentieth centuries. Through extensive primary-source research, Mona Hassan explores the rich constellation of interpretations created by religious scholars, historians, musicians, statesmen, poets, and intellectuals. Hassan

fills a scholarly gap regarding Muslim reactions to the destruction of the Abbasid caliphate in Baghdad in 1258 and challenges the notion that the Mongol onslaught signaled an end to the critical engagement of Muslim jurists and intellectuals with the idea of an Islamic caliphate. She also situates Muslim responses to the dramatic abolition of the Ottoman caliphate in 1924 as part of a longer trajectory of transregional cultural memory, revealing commonalities and differences in how modern Muslims have creatively interpreted and reinterpreted their heritage. Hassan examines how poignant memories of the lost caliphate have been evoked in Muslim culture, law, and politics, similar to the losses and repercussions experienced by other religious communities, including the destruction of the Second Temple for Jews and the fall of Rome for Christians. A global history, *Longing for the Lost Caliphate* delves into why the caliphate has been so important to

Muslims in vastly different eras and places.

What are we to make of the information society? Many prominent theorists have argued it to be the most profound and comprehensive transformation of economy, culture and politics since the rise of the industrial way of life in the 18th century. Some saw its arrival in a positive light, where the dreams of democracy, of 'connectivity' and 'efficiency' constituted a break with the old ways. But other thinkers viewed it more in terms of the recurrent nightmare of capitalism, where the processes of exploitation, commodification and alienation are given much freer rein than ever before. In this book Robert Hassan, a prominent theorist in new media and its effects, analyses and critically appraises these positions and forms them into a coherent narrative to illuminate the phenomenon. Surveying the works of major information society theorists from Daniel Bell to Nicholas Negroponte, and from Vincent Mosco to Manuel Castells, *The Information Society* is an invaluable resource for understanding the nature of the information society—as well as the meta-processes of neoliberal globalisation and the revolution in information technologies that made it possible.

There Will Come a Darkness Penguin

A dead Mossad agent, Nazi rocket scientists in Cairo, the Muslim Brotherhood, a corrupt American ambassador, and two missing Egyptian tank regiments. Something is about to blow up in the desert at noon on Thursday, and Richard Thomson, a burned-out CIA agent, is the only one who can stop it. 4.4 Stars on 182 reader reviews! While the world is focused on the Russian missiles in Cuba, no one notices the even more deadly ones being rolled out in the Egyptian desert pointed at Israel, no one, except Thomson. Already gnawed on by Langley and set-up by the Cairo police, Thomson thinks his day can't get much worse until someone leaves a dead body on the rear steps of his hotel with its head lopped off like a ripe melon. A message? No doubt about it. The body belongs to Mahmoud Yussuf, a fat, petty thief and wannabe spy who is peddling photographs of a long-abandoned RAF base in the Egyptian desert. Someone is trying to start another Arab-Israeli war, and it's all going to start at Noon on Thursday unless Thompson can stop them. This Cold War spy thriller will sweep you back to when John Kennedy is in the White House, Nikita Khrushchev rules the Kremlin, and Abdel, Gamal Nasser sits precariously in Cairo, threatened by the radical Islamist fringe of the Muslim Brotherhood. While the world focuses on Russian missiles in Cuba, no one notices the ones being rolled out in the Egyptian desert pointed at Israel, no one, except Thomson. Alone and on the run, treachery and double-dealing are the rule. No one believes his story -- not the CIA, the

US Ambassador, and most assuredly not Captain Hassan Saleh, Chief of the Homicide Bureau of the Cairo Police, who wants to hang Thomson for murder. Like *Night of the Generals*, this is a murder mystery wrapped inside an international political thriller. *Tick Toc, Tick Toc...*

"Thomas Jefferson's Corps of Discovery included Captains Lewis and Clark and a crew of 28 men to chart a route from St. Louis to the Pacific Ocean. All the crew but one volunteered for the mission. York, the enslaved man taken on the journey, did not choose to go. Slaves did not have choices. York's contributions to the expedition, however, were invaluable. The captains came to rely on York's judgement, determination, and peacemaking role with the American Indian nations they encountered. But as York's independence and status rose on the journey, the question remained what status he would carry once the expedition was over. This is his story."--Provided by publisher.

From Pulitzer Prize finalist Annie Jacobsen, the untold USA Today bestselling story of the CIA's secret paramilitary units. Surprise . . . your target. Kill . . . your enemy. Vanish . . . without a trace.

When diplomacy fails, and war is unwise, the president calls on the CIA's Special Activities Division, a highly-classified branch of the CIA and the most effective, black operations force in the world. Originally known as the president's guerrilla warfare corps, SAD conducts risky and ruthless operations that have evolved over time to defend America from its enemies. Almost every American president since World War II has asked the CIA to conduct sabotage, subversion and, yes, assassination. With unprecedented access to forty-two men and women who proudly and secretly worked on CIA covert operations from the dawn of the Cold War to the present day, along with declassified documents and deep historical research, Pulitzer Prize finalist Annie Jacobsen unveils -- like never before -- a complex world of individuals working in treacherous environments populated with killers, connivers, and saboteurs. Despite Hollywood notions of off-book operations and external secret hires, covert action is actually one piece in a colossal foreign policy machine. Written with the pacing of a thriller, *Surprise, Kill, Vanish* brings to vivid life the sheer pandemonium and chaos, as well as the unforgettable human will to survive and the intellectual challenge of not giving up hope that define paramilitary and intelligence work. Jacobsen's exclusive interviews -- with members of the CIA's Senior Intelligence Service (equivalent to the Pentagon's generals), its counterterrorism chiefs, targeting officers, and Special Activities Division's Ground Branch operators who conduct today's close-quarters killing operations around the world -- reveal, for the first time, the enormity of this shocking, controversial, and morally complex terrain. Is the CIA's paramilitary army America's weaponized strength, or a liability to

its principled standing in the world? Every operation reported in this book, however unsettling, is legal.

A revelatory look inside the world's most dangerous terrorist group. Initially dismissed by US President Barack Obama, along with other fledgling terrorist groups, as a “jayvee squad” compared to al-Qaeda, the Islamic State of Iraq and Syria (ISIS) has shocked the world by conquering massive territories in both countries and promising to create a vast new Muslim caliphate that observes the strict dictates of Sharia law. In *ISIS: Inside the Army of Terror*, American journalist Michael Weiss and Syrian analyst Hassan Hassan explain how these violent extremists evolved from a nearly defeated Iraqi insurgent group into a jihadi army of international volunteers who behead Western hostages in slickly produced videos and have conquered territory equal to the size of Great Britain. Beginning with the early days of Abu Musab al-Zarqawi, the founder of ISIS's first incarnation as “al-Qaeda in Iraq,” Weiss and Hassan explain who the key players are—from their elusive leader Abu Bakr al-Baghdadi to the former Saddam Baathists in their ranks—where they come from, how the movement has attracted both local and global support, and where their financing comes from. Political and military maneuvering by the United States, Iraq, Iran, and Syria have all fueled ISIS's astonishing and explosive expansion. Drawing on original interviews with former US military officials and current ISIS fighters, the authors also reveal the internecine struggles within the movement itself, as well as ISIS's bloody hatred of Shiite Muslims, which is generating another sectarian war in the region. Just like the one the US thought it had stopped in 2011 in

Iraq. Past is prologue and America's legacy in the Middle East is sowing a new generation of terror.

Architecture for the Poor describes Hassan Fathy's plan for building the village of New Gurna, near Luxor, Egypt, without the use of more modern and expensive materials such as steel and concrete. Using mud bricks, the native technique that Fathy learned in Nubia, and such traditional Egyptian architectural designs as enclosed courtyards and vaulted roofing, Fathy worked with the villagers to tailor his designs to their needs. He taught them how to work with the bricks, supervised the erection of the buildings, and encouraged the revival of such ancient crafts as claustra (lattice designs in the mudwork) to adorn the buildings.

While the loss of a loved one through either death, separation, or divorce is a normal human experience, it can arouse underlying conflicts that trigger pathological reactions. For clinicians working with individuals who suffer from such pathological grief, this volume integrates theory, practice, and research to describe a time-limited, interpretive group therapy approach. Demonstrated to be successful in a large-scale controlled clinical trial, the approach provides an innovative alternative to such traditional forms of treatment as individual psychotherapy or group counseling. The volume begins with a review of epidemiological data, an examination of specific issues such as the distinction between normal and abnormal reactions to loss, and a summary of major psychoanalytic theories of pathological grief. Also discussed are societal changes that have affected the resources available to loss patients. Then, a step-by-step description of the Short-Term Group Therapy Program is provided. It includes patient selection and preparation, group composition, and therapist technique. Clinical material illustrates themes and roles as they evolve from the beginning of treatment through termination. The clinical trial research that was conducted as part of the program is described in detail and its main outcome findings are discussed. In addition, results concerning the patient characteristic known as psychological mindedness and the process variable known as psychodynamic work are presented.

Finally, the book addresses future directions concerning the group treatment of loss patients. This practical volume, with its detailed instructions and review of research results, will be an invaluable resource to all professionals in psychiatry, psychology, social work, occupational therapy, and nursing who are interested in group forms of psychotherapy and/or problems associated with loss. Clinical researchers will also find the book of interest, and it will serve as a valuable text for graduate level courses that focus on psychotherapy techniques, group psychotherapy, and approaches that deal with special patient populations.

This "astonishing and deeply poignant" (The Washington Post) memoir of one man's search for a beloved family friend explores the depth of Iranian culture and the sweep of its history, and transcends today's news headlines to remind us of the humanity that connects us all. Growing up in Tehran in the 1960s, Terence Ward and his brothers were watched over by Hassan, the family's cook, housekeeper, and cultural guide. After an absence of thirty years and much turmoil in Iran, Ward embarks on a quixotic pilgrimage with his family in search of their lost friend. However, as they set out on this improbable quest with no address or phone number, their only hope lies in their mother's small black and white photograph taken decades before. Crossing the vast landscape of ancient Persia, Ward interweaves its incredibly rich past, while exploring modern Iran's deep conflicts with its Arab neighbors and our current administration. Searching for Hassan puts a human face on the long-suffering people of the Middle East with this inspirational story of an American family who came to love and admire Iran and its culture through their deep affection for its people. The journey answers the question, "How far would you go for a friend?" Including a revised preface and epilogue, this new and updated edition continues to demonstrate that Searching for Hassan is as relevant and timely as ever in shaping conversations and ways of thinking about different cultures both in the US and around the world.
