The truck's role in American society changed dramatically from the 1960s through the 1980s, with the rise of off-roaders, the van craze of the 1970s and minivan revolution of the 1980s, the popularization of the SUV as family car and the diversification of the pickup truck into multiple forms and sizes. This comprehensive reference book follows the form of the author's popular volumes on American cars. For each year, it provides an industry overview and, for each manufacturer, an update on new models and other news, followed by a wealth of data: available powertrains, popular options, paint colors and more. Finally, each truck is detailed fully with specifications and measurements, prices, production figures, standard equipment and more.

Blood Highways is the heart-wrenching account of the biggest product liability case in history: the Ford-Firestone fiasco. At the center of the story are two people: Tab Turner, a charismatic trial attorney from Arkansas, who has made a career out of forcing Ford and other automakers to own up to knowingly trade human lives for profits; and Donna Bailey, a single mother and outdoor enthusiast who fought back from the brink of death to confront those ultimately responsible for her accident. Weaving together harrowing depictions of the accidents and their consequences with the stories of the men and women who labor to police the auto industry and its reckless cost-

cutting, Blood Highways will transform the way you view corporations, the government, the courts, and the media. Above all, this book shows the price the public pays in wrecked and mangled lives when companies focus more on shaving costs than making quality products.
