Master moving averages This book will give you a great understanding of the power of moving averages. Easy to understand explanations of complex topics Detailed, annotated trading charts Access to a thriving trading community From the foreword: Today I am a successful and profitable stock trader and financial educator, and I can honestly tell you that

I owe it all to the simple trading principles that I learned by listening to, and then reading, the first edition of "Moving Averages 101" by Steve and Holly Burns. The book taught me a new way to approach the markets. When I combined moving averages and good risk to reward setups discussed in this book, it created the potential for large wins and small losses. My trading results improved immediately. I experienced better results with less stress, because I stopped trying to predict the market or make decisions based on my opinions. Instead of worrying about what the market might do in the future, I learned to let the moving averages be my guide. I am fortunate enough to have seen Steve Burns place trades daily for the last two and a half years using the same strategies and approaches that he will teach you in this book. Steve really does practice what he preaches and teaches, and his results have been amazing. I have seen him ride profitable long-term trends to the upside, and even more impressively, stay completely in cash and out of large market drawdowns and crashes. I regularly see him make new equity highs when the market is not anywhere close to all-time highs. This second edition is great because it includes many more chart examples, which is helpful if you are a visual learner like I am. In this book, you will learn powerful concepts that if internalized and put into practice, will provide you with an approach that can make you money in the market for years to come. I feel so fortunate that I found this book back in 2016 and I would like to sincerely thank Steve and Holly Burns for taking the time to write it. My only regret is that I did not find this book sooner. Best of luck to all of you and Happy Trading. Gregory W. Gossett -

 What New Trader U students are saying: "It's simple, buy this book. It's an incredible value add for the money. Easy reading and direct to the point. In depth education on popular moving averages. This book is an extension from the New Trader U website which I also highly recommend. You get direct access to a seasoned trading veteran who has been there and done that. The cost is reasonable and the value is priceless." - Tim M.
 "Steve once again delivers on the message of building a strong foundation for which all your future trading is built upon. When focusing on the method, many market gurus or books talk about moving averages and to buy and sell there but the why's are missing. This book give an excellent explanation of the why's. You'll get a better understanding of the risk/reward of your purchase decisions using the information gained in this book. Also, I see few books that have better explained to me the questions I had regarding moving averages for the price it's selling at." - Frederick M Robles

Essentials of Technical Analysis for Financial Markets Independently Published

To invest successfully or trade in Stocks, Options, Forex, or even Mutual Funds, it is imperative to know AND understand price and market movements that can only be learned from Technical Analysis. You should NEVER attempt Trading or Investing without it! My 25 years experience has taught me that 'every book on the market' regarding Charting and Technical Analysis is seemingly worthless. All seem to find yet another creative way to tell you to "Buy Low and Sell High." And they offer NO in-depth understanding or analysis about WHO is buying and WHO is selling, and when. Point is, anyone, experienced or not, can show you a picture of a Chart and tell you to buy at the bottom and sell at the top. That is simple 'hindsight,' and is always 20/20. This book is different! It is IN-DEPTH - EXPLAINED and you WILL learn price movements and technical analysis from this information! You will understand and recognize tops and bottoms in the

market and in particular stocks, AS they are forming. This is highly valuable information, and you should NEVER attempt to trade or invest without this knowledge. Mutual Funds? Most people think they do not need this information because they have a Mutual Fund. That could not be farther from the truth. Investing your hard-earned money should be done with your own knowledge of market direction, when to buy, and when to move your money to safety. Without this knowledge you are at the mercy of a salesperson hungry to earn a commission. Thus, invariably entering the market at the wrong time and in the wrong investment. No one else has your best interest in mind. So learn to protect your money or keep it in the bank. It's that simple. The next move is yours.
