 This report represents an inventory of urban transit research and development (R & D) activities that were completed and/or underway during the calendar year. The purpose of this inventory is to provide a brief overview of ongoing R & D in Canada. Projects have been grouped into categories of similar activity. Each project description includes the following essential information: project

title; project description, including objectives and status; organizations involved in the project, either for its funding or its conduct; and key contact person for further information.

The most comprehensive guide to highway diesel engines and their management systems available today, MEDIUM/HEAVY DUTY TRUCK ENGINES, FUEL & COMPUTERIZED MANAGEMENT SYSTEMS, Fourth Edition, is a user-friendly resource ideal for aspiring, entry-level, and experienced technicians alike. Coverage includes the full range of diesel engines, from light duty to heavy duty, as well as the most current diesel engine management electronics used in the industry. The extensively updated fourth edition features nine new chapters to reflect industry trends and technology, including a decreased focus on outdated hydromechanical fuel systems, additional material on diesel electric/hydraulic hybrid technologies, and information on the principles and practices underlying current and proposed ASE and NATEF tasks. With an emphasis on today's

computer technology that sets it apart from any other book on the market, this practical, wide-ranging guide helps prepare you for career success in the dynamic field of diesel engine service.
