"Originally developed to  
help staff, clients, and  
consultants prepare and  
implement operations  
supported by the Bank  
Group, this Handbook  
updates and replaces the  
Environmental Guidelines  
issued in 1988 and  
reflects changes both in  
technology and in

pollution management policies and practices. It focuses attention on the environmental and economic benefits of preventing pollution and emphasizes cleaner production and good management techniques."--BOOK JACKET.

In the context of a war for talent, hospitality business leaders are competing to attract, develop, and retain high performers. The challenge is crucial in the tourism

and hospitality sectors, whose competitive advantage relies on its workforce. Their human resource management (HRM) systems should contribute to increasing individual and organizational performance. Yet, HRM practices exhibit big discrepancies between small family-owned independent establishments and large corporate groups and chains owned by shareholders. In particular, the ongoing purchase of independent

hotels by finance-based companies like private equity or pension funds sets the scene for HRM challenges at both individual and organizational levels. Hotel Starlac is an independent and small 5-star hotel located in Geneva, Switzerland.

An Environmental Impact Assessments (EIA) is a procedure for evaluating the impact of proposed activities on the

environment. In modern Africa, EIAs are a growing reality and a matter of law in 22 sub-Saharan African countries. This volume examines various aspects of EIA legislation in these countries, including: definitions and prescribed activities; public participation and consultation; the review process and the quality of EIA reports; monitoring and enforcement; compatibility; and transboundary issues. It highlights the role and degree of public participation for the

further development of EIA law and policy. *Supplement to the Official Journal of the European Communities* Springer "The original Tourist Gaze was a classic, marking out a new land to study and appreciate. This new edition extends into fresh areas with the same passion and insight of the object. Even more essential reading!" - Nigel Thrift, Vice-Chancellor, Warwick University This new edition of a seminal text restructures, reworks and remakes the groundbreaking previous

versions making this book even more relevant for tourism students, researchers and designers. 'The tourist gaze' remains an agenda setting theory. Packed full of fascinating insights this major new edition intelligently broadens its theoretical and geographical scope to provide an account which responds to various critiques. All chapters have been significantly revised to include up-to-date empirical data, many new case studies and fresh concepts. Three new

chapters have been added which explore: photography and digitization embodied performances risks and alternative futures This book is essential reading for all involved in contemporary tourism, leisure, cultural policy, design, economic regeneration, heritage and the arts.

This book offers a clear description of all the balsamic vinegars and/or

similar products produced in the world, their differences in composition, quality and use. This encompasses all the steps for the production of Traditional Balsamic Vinegar: grape composition, crushing, concentration of the must, alcoholic and acetic fermentation, ageing, sensorial properties and quality of the final product. This book covers extensively all the balsamic vinegars, especially the industrial ones that have a really large market and

diffusion.

La mondialisation, la digitalisation et la récente crise sanitaire ont profondément remodelé le paysage de l'industrie hôtelière. Au carrefour de ces multiples défis et opportunités, l'hospitality management, qui englobe la gestion d'un établissement hôtelier et de ses ressources humaines, matérielles et informationnelles, est plus que jamais le pilier essentiel pour la réussite

des établissements hôteliers. À travers une approche à la fois théorique et opérationnelle, cet ouvrage explore en profondeur les concepts fondamentaux de cette industrie, les défis pratiques rencontrés par les professionnels, ainsi que les enjeux émergents du secteur. Ce que vous allez apprendre : Comment contrôler les coûts pour assurer la rentabilité d'un établissement tout en maintenant la qualité des services. Les méthodes à

utiliser pour prévoir les revenus d'un hôtel et ajuster sa stratégie en conséquence. La gestion des défis spécifiques liés à la réglementation et à la conformité dans le secteur hôtelier. Comment optimiser l'expérience du client pour le fidéliser. Comment maintenir une présence numérique efficace tout en gérant les risques associés à la réputation en ligne de l'établissement. Les + De nombreux témoignages d'experts de l'hôtellerie et du tourisme. Des

entraînements et exemples pratiques. Des ressources numériques pour aller plus loin. Le guide indispensable et exhaustif pour maîtriser les complexités de la gestion hôtelière et exceller dans l'art de l'hospitalité !

 This Palgrave Handbook offers the first international comparative study into the efficiency of the industrial organization of the global wine industry. Looking at several important

vineyards of the main wine countries, the contributors analyze differences in implementation and articulation of three key stages: grape production, wine making and distribution (marketing, selling and logistics). By examining regulations, organization theory, industry organizational efficiency and vertical integration, up to date strategies in the sector are presented and appraised. Which models are most efficient? What are the most relevant

factors for optimal performance? How do reputation and governance impact the industry? Should different models co-exist within the wine countries for global success? This comprehensive volume is essential reading for students, researchers and professionals in the wine industry.

The field of Strategic Human Resource Management (SHRM) has

burgeoned over the past thirty years. Over this time there has been a shift towards a strategic conception which posited workers as 'assets' rather than 'costs'. These 'human resources' were reconceptualised as a key source of competitive advantage. As such, these assets were to be treated seriously: selected with care, trained and developed, and above all, induced to offer commitment. The concept of 'human capital' came to the fore, and in the decades following these

developments, research output has been voluminous. Strategic Human Resource Management: A Research Overview, authored by global research leaders, provides an expert summary of this crucial element of organizational performance. This new shortform book develops the argument that one of the crucial elements of organizational performance is the way work is organized in skill and talent packages both within an organization's boundary and across

global competency clusters. Secondly, it focuses on current and emergent challenges. The 'package' of HR approaches has changed over time and patterns can be observed. This new volume pays special regard to the HR implications arising from radically altering contexts - economic, social, and technological. This concise volume covers crucial themes of lasting interest, and as such is essential reading for business scholars and professionals.

"The applied research indicates that, to improve awareness, park education programs should be targeted specifically to the user groups primarily through outreach programs. Further, the Park's management programs should be highlighted, particularly the beneficial, tangible products and services (benefits) the Park provides to each user group... The closer the tie between reef

conditions and business earnings, the greater the users' support for reef conservation." Coral reefs are sometimes referred to as "canaries of the sea" because of their early warning ability to show near-shore oceanic stress. Because of their biological diversity, they are also called "rainforests of the sea." Coral reefs are vital to the well being of millions of people. Coral reef managers and government officials trying to save their valuable national resources have turned to

research on coral reefs for help. The research presented in this publication merits a great deal of notice because the output is useful for decision support and training tools in integrated coastal zone management (ICZM). The work on cost-effectiveness analysis has developed integrated economic and ecological models, relying extensively on fuzzy logic procedures to model impacts and effects of interventions within the reef environment. By

contrast, the marine system valuation work provides economic valuations of coral reefs, demonstrating the use of different modeling methods and treating key policy issues within this context. This publication will interest coastal zone experts and managers worldwide

This is an essential aid in the initial design and planning of a project. The relevant building type is located by a

comprehensive index and cross reference system, a condensed commentary covers user requirements, planning criteria, basic dimensions and other considerations of function, siting aspect etc. A system of references based on an extensive bibliography supports the text. In every section plans, sections, site layouts, design details and graphs illustrated key aspects of a building type's design. Most illustrations are dimensioned or scaled - the metric system of

measurement is used throughout, and the equivalent in feet/inches can easily be read either off a graphic scale on the page or from the built-in conversion table. The illustrations are international in origin and include both well know and less famous designers. Architects Data is primarily a handbook of building types rather than of construction techniques and details. However its treatment of components (such as doors and windows) and of spaces for building services is

extremely thorough, since consideration of this data is an essential element of the planning process. The opening pages of basic data on man and his buildings cover critical subjects such as scale, drawing practice, noise, light and space for the same reason. Particular attention has also been paid to the implications of energy conservation, means of escape from fire and the needs of the elderly and the disabled. **SCAD Bulletin** Routledge This cutting edge and comprehensive book with

contributions from the star faculty of Cornell University's School of Hotel Administration offers the latest thinking on the best practices and strategies for hospitality management.
