HUFFMAN ZION

Democratic Approaches Routledge

In 2002 the International Labour Organization issued a report titled 'Decent work and the informal economy' in which it stressed the need to ensure appropriate employment and income, rights at work, and effective social protection in informal economic activities. Such a call by the ILO is urgent in the context of countries such as India, where the majority of workers are engaged in informal economic activities, and where expansion of informal economic activities is coupled with deteriorating working conditions and living standards. This book explores the informal economic activity of India as a case study to examine typical requirements in the work-lives of informal workers, and to develop a means to institutionalise the promotion of these requirements through labour law. Drawing upon Amartya Sen's theoretical outlook, the book considers whether a capability approach to human development may be able to promote recognition and work-life conditions of a specific category of informal workers in India by integrating specific informal workers within a social dialogue framework along with a range of other social partners including state and non-state institutions. While examining the viability of a human development based labour law in an Indian context, the book also indicates how the proposals put forth in the book may be relevant for informal workers in other developing countries. This research monograph will be of great interest to scholars of labour law, informal work and workers, law and development, social justice, and labour studies.

Poverty alleviation is high on the global policy agenda, its importance being emphasised by its place as the first of the United Nation's Millennium Development Goals. As a potentially significant source of economic growth in developing countries, tourism may also play a major role in poverty reduction and alleviation under the right circumstances. The incorporation of tourism into development policy and Poverty Reduction Strategies has special poignancy for those Least Developed Countries where natural resources exist to support a tourism industry and there are limited development alternatives. This book offers a holistic, explicit and detailed introduction to the relationship of poverty and tourism within the context of developing countries. The book is divided into distinct sections, progressing from an evaluation of the key concepts of poverty, tourism and development; to the causal factors of poverty; to the mechanisms of how tourism is being implemented in policy and practice to reduce poverty and finally to an analysis of the relationship between tourism to poverty alleviation in the future. The adopted analytical approach of the key themes is multi-disciplinary, incorporating tourism studies, human geography, political economy, economics, development and environmental studies. It integrates examples and original case studies from varying geographical developing regions including Africa, South Asian and East Asia and the Pacific, to lend practical insights into tourism's role in poverty alleviation. The text will be of particular interest to higher education students from tourism studies, geography, political economy, environmental and development studies, and sociology backgrounds. It will also be of relevance to government and policy makers, alongside those who have a more general interest in poverty alleviation.

Comprehensive student-friendly resources designed for teaching Cambridge International AS and A Level English Language (syllabus 9093 for first examination in 2015). The core aim of this Coursebook is to help students to develop and apply the key skills they need to achieve in AS and A Level

English Language. They will build the skills needed for assessment through frequent activities. Divided into two distinct parts for AS and A Level studies, the book covers a wide range of reading skills, such as understanding aspects of style, voice and tone. It also addresses the conventions of key kinds of writing and spoken language, from scripted speeches to travel articles, and looks at how they can capture these conventions in their own work.

Human Rights in Turkey Oxford University Press

Why does North Korea routinely turn to provocation to achieve foreign policy goals? Are the actions of the volatile Kim regime predictable, based on logical responses to the conditions faced by North Korea? This book, an examination of the "Hermit Kingdom" over the past 50 years, explains why the Democratic People's Republic of Korea uses hostility and coercion as instruments of foreign policy. Using three case studies and quantitative analysis of more than 2,000 conflict events, the author explores the relationship between North Korea's societal conditions and its propensity for external conflict. These findings are considered in light of diversionary theory, the idea that leaders use external conflict to divert attention from domestic affairs. Analyzing the actions of an isolated state such as North Korea provides a template for conflict scholarship in general.

CTET Practice Workbook Paper 2 - Social Studies (10 Solved + 10 Mock papers), English Edition, contains 10 challenging Mock Papers with 10 Past Solved Papers. The Mock Tests follows the exact pattern as per the latest CTET paper. The book also contains the solution to the past CTET papers of June 2011, Jan & Nov 2012, July 2013, Feb & Sep 2014, Feb & Sep 2015 and Feb & Sep 2016 Papers. The languages covered in the tests are English (1st language) and Hindi (2nd language). Each Practice Set in the book contains sections on Child Development & Pedagogy, English, Hindi and Social Studies/ Social Science. The question papers have been set very diligently so as to give a real-feel of the actual TET. The book is also useful for other State TETs - UP TET, Rajasthan TET, Haryana TET, Bihar TET, Uttarakhand TET etc.

10 YEAR-WISE CTET Paper 1 Solved Papers (2011 - 2018) - English Edition Springer

Instead of segregating children with special needs from the rest, Diversity, Special Needs, and Inclusion in Early Years Education argues for inclusiveness in educational institutions, through changes in curriculum and teaching methods. The book presents case studies from various countries as well as theoretical frameworks, models, approaches and projects on diversity and inclusion to effective implementation of programmes and practices for young children. Each chapter of the book has a unique contribution to understanding the aspects of inclusive education taken from international experience. This edited volume is for professionals and researchers in the field of special education, policy makers, parents and teachers, and school management. It would be of interest to people working on diversity and inclusive education as well as in early childhood education organisations. NGOs working in the area of special education will find this particularly useful.

The State and the Advocate Routledge

Mad Dogs and Englishness connects English popular music with questions about English national identities, featuring essays that range across Bowie and Burial, PJ Harvey, Bishi and Tricky. The later years of the 20th century saw a resurgence of interest in cultural and political meanings of Englishness in ways that continue to resonate now. Pop music is simultaneously on the outside and inside of the ensuing debates. It can be used as a mode of commentary about how meanings of Englishness circulate socially. But it also produces those meanings, often underwriting claims about English national cultural distinctiveness and superiority. This book's expert contributors use trans-national and trans-disciplinary perspectives to provide historical and contemporary commentaries about pop's complex relationships with Englishness. Each chapter is based on original research, and the essays comprise the best single volume available on pop and the English imaginary.

The naïve language expert: How infants discover units and regularities in speech Routledge

Until now, there has been very little research into the use of online dictionaries. In contrast, the market for online dictionaries is increasing both for academic lexicography and for commercial lexicography, with sales figures for printed reference works in continual decline. This has led to a demand for reliable empirical information on how online dictionaries are actually being used and how they could be made more user-friendly. The volume Using Online Dictionaries makes a substantial contribution to closing this research gap. It is divided into four parts: The first part contains articles on fundamental issues: a research review of the empirical studies on digital dictionaries which have already been carried out, and a brief methodological guideline for lexicographical researchers who are interested in conducting their own empirical research. The second part contains the results of two studies that focus on general questions about the use of online dictionaries. It presents empirical data on contexts of dictionary use, on expectations and demands regarding online dictionaries. Furthermore, innovative features, such as the use of multimedia elements or the option of a user-adaptive interface and questions of design were assessed empirically. The third part of this volume comprises more specific studies of online dictionaries: an eye-tracking study evaluating the new web design of the dictionary portal OWID and a log file study which tries to get to the bottom of the following question: Do dictionary users look up frequent words, or put differently, is there a connection between how often a word is looked up and how often it appears in a corpus? In the last chapter of this thematic section, the question of how users judge the combination of a written paraphrase and an additional illustration in illustrated online dictionaries is addressed. The last part focuses on the use of monolingual dictionaries, in particular the German online dictionary elexiko. In this context, two online questionnaire-based studies were carried out. The empirical studies were conducted in the form of online surveys combining questionnaires and experimental elements and in the form of laboratory studies using eye-tracking technology as well as using observational methods such as log file analyses. Regarding the comprehensive research framework, this volume can be relevant to lexicographers, metalexicographers and linguists who are interested in the use of (online) dictionaries and in the development and exploration of lexicographical data for the internet, as well as linguists interested in empirical methods. It addresses a broad expert audience by presenting an academic subject which is currently the focus of much discussion.

Literature Education in the Asia-Pacific Disha Publications

Posthumanism and the Massive Open Online Course critiques the problematic reliance on humanism that pervades online education and the MOOC, and explores theoretical frameworks that look beyond these limitations. While MOOCs (massive open online courses) have attracted significant academic and media attention, critical analyses of their development have been rare. Following an overview of MOOCs and their corporate means of promotion, this book unravels the tendencies in research and theory that continue to adopt normative views of user access, participation, and educational space in order to offer alternatives to the dominant understandings of community and authenticity in education.

Rules, Norms and NGO Advocacy Strategies Edinburgh University Press

When it comes to talking about democracy in China, Chinese nationalists argue that it cannot solve China's problems, while Chinese liberals remain unduly silenced. But China is facing a national identity crisis, compounded by Tibet and Taiwan, where significant proportions of both populations do not identify with the Chinese nation-state. Could democracy realistically address the problems in China's national identity? Baogang He opens up a dialogue in which Chinese liberals can offer viable alternatives in defence of key democratic principles and governance. He upholds the search for a political space in which democratic governance in China can feasibly be developed.

Ensuring Equality Routledge

Low Carbon Development: Key Issues is the first comprehensive textbook to address the interface between international development and climate change in a carbon constrained world. It discusses the key conceptual, empirical and policy-related issues of low carbon development and takes an international and interdisciplinary approach to the subject by drawing on insights from across the natural sciences and social sciences whilst embedding the discussion in a global context. The first part explores the concept of low carbon development and explains the need for low carbon development in a carbon constrained world. The book then discusses the key issues of socio-economic, political and technological nature for low carbon development, exploring topics such as the political economy, social justice, financing and carbon markets, and technologies and innovation for low carbon development. This is followed by key issues for low carbon development in policy and practice, which is presented based on cross-cutting issues such as low carbon energy, forestry, agriculture and transportation. Afterwards, practical case studies are discussed from low carbon development in low income countries in Africa, middle income countries in Asia and Latin America and high income countries in Europe and North America. Written by an international team of leading academics and practitioners in the field of low carbon development, this book is essential reading for students, academics, professionals and policy-makers interested in the fields of low carbon development, climate change mitigation, climate policy, climate change and development, global environmental change, and environment and development.

SAGE Publishing India

There is much controversy over the development of new dams for hydropower, where concerns for environmental protection and the livelihoods of local people may conflict with the goals of economic development. This book analyses the opportunities and barriers that NGOs and civil society actors face when conducting advocacy campaigns against such developments. Through a comparison of two NGO coalitions in Cambodia and Vietnam advocating against the Xayaburi hydropower dam on the Mekong River, the book explores the intricate interactions of formal and informal rules and norms and how they influence advocacy strategies. A framework for analysis is proposed which serves as a tool for analysis by civil society actors. The author generates fresh insights into the way in which opportunities and barriers are created for NGOs to influence state-centric decision-making processes. The book also discusses Mekong riparian states' negotiation process over the Xayaburi hydropower dam in detail, providing an analysis of the Mekong River's governance under the 1995 Mekong Agreement. The book concludes by suggesting ways to improve the engagement of civil society actors in the governance of transboundary rivers and development projects.

14 YEAR-WISE CTET Paper 1 Solved Papers (2011 - 2020) - 3rd English Edition World Scientific

Oil, an integral part of the contemporary global economy, is considered a driving force behind the 2003 invasion of Iraq. Hydrocarbon reserves in Iraq have a significant role to play in global supply, with oil revenue accounting for more than 90% of Iraqi government income. This book provides a comprehensive insight into the key foundations of Iraq's oil industry and assists in the development of a core area of domestic law to promote economic recovery following years of instability. It addresses the development of oil legislation and the formation of contracts since the US and allied occupation of Iraq in 2003. Legislation is assessed against the framework of the constitution along with the different types of oil agreements and their terms. The book looks at three main aspects of oil legislation, beginning with the validity and interpretation of the constitution as any subsequent legislation governing oil policy will be based upon this. The work then discusses whether the draft oil and gas law of 2007 and any subsequent oil legislation, including the law implemented by the Kurdish Regional Government in 2007, is valid. Finally, the book analyses the legitimacy of oil agreements entered into by the central and regional governments and whether these contain terms beneficial to the state and contracting party. Providing an in-depth analysis of the origins and development of the legal framework of the oil industry in Iraq, the book acts as both a reference source and a springboard for future research across a range of legal, economic and policy perspectives. It will appeal to practitioners and academics working in energy law and international investment law, as well as policy-makers, legal advisors and those working in governments and energy companies.

Case studies on development policy in Asia Disha Publications

People with disabilities are among the most adversely affected during conflict situations or when natural disasters strike. They experience higher mortality rates, have fewer available resources and less access to help, especially in refugee camps, as well as in post-disaster environments. Already subject to severe discrimination in many societies, people with disabilities are often overlooked during emergency evacuation, relief, recovery and rebuilding efforts. Countries party to the UN Convention on the Rights of Persons with Disabilities must take all necessary measures to ensure the protection and safety of people with disabilities during situations of armed conflict, humanitarian emergencies, and natural disasters. Such aid should be designed to support preparedness, response, recovery and rebuilding. This book includes perspectives from around the globe and explores the implications at the policy, programme, and personal level, discussing issues such as: How can national laws, policies, and regulations provide guidance, methods and strategies to integrate and coordinate inclusive emergency management? What should people with disabilities know in order

to be prepared for emergency situations? What lessons have we learned from past experiences? What are the current shortfalls (physical and cultural) that put people with disabilities at risk during emergencies and what can be done to improve these situations (e.g. through new technologies and disaster planning)? How does disability affect people's experiences as refugees and other displaced situations; what programmes and best practices are in place to protect and promote their rights during their period of displacement? How must disabled people with disabilities be factored in to the resettlement and rebuilding process; does an opportunity for ensuring universal access exist in the rebuilding process? What is the impact of disasters and conflicts on such special populations as disabled women, disabled children, and those with intellectual disabilities? Spotting a pressing issue that has long been neglected in emergency planning fields, this innovative book discusses how to meet the needs of people with disabilities in crises and conflict situations. It is an important reference for all those working in or researching disability and inclusion, and emergency and disaster management, both in developed and developing countries.

Indonesia Matters Literature Education in the Asia-Pacific Policies, Practices and Perspectives in Global Times

This book documents the lesser-known varieties of English which have been overlooked and understudied within the canon of English linguistics.

Posthumanism and the Massive Open Online Course Disha Publications

Teacher education in a financial crisis – what are the consequences and how can probity be maintained? Education, like most other parts of everyday life, is experiencing the challenges brought about by global financial constrictions. This book presents the experiences and views of practising teacher educators from multiple countries and continents on how the melt-down in world economics has affected and will continue to affect teacher education and concomitant experiences in schooling. The ramifications are seen to extend into every aspect of teacher preparation, continuing staff development and teacher support, and there are significant implications for the quality of teaching and learning, and the ethos and standing of the process of education as a whole. Drawing on educational theory and social, political, and economic discourses, the book addresses issues such as policy, philosophy, organisation, funding, resources, modes of teaching and learning, curricular change, recruitment and retention, amongst others, and provides a snap-shot across diverse contexts. It aims to provide an evaluative, analytical but reflective picture of teacher education in the light of the world economic crisis, whilst exploring good practice and suggesting future strategies to develop the quality of teacher education and professional support, teaching and learning. The volume provides an insight into the need for a new paradigm for teacher education: one that involves teacher educators in devising a discourse of positive and radical change. It will be a valuable resource for teacher educators, educational leaders, policy makers, educational commentators and teachers seeking to engage with the scholarship of teaching as a means to engage in continuous professional development.

Informal Workers in India Routledge

A comprehensive analysis of China's efforts to build and utilize soft power as a distinctive part of its foreign policy This volume examines the evolution and application of China's soft power with particular focus on various strategic initiatives such as cultural and public diplomacy, Confucius institutes, development assistance and infrastructure building, media collaborations and healthcare diplomacy. This is to emphasize cooperation and partnerships while advancing the theory of harmonious development through these initiatives across the world. Employing an alternative perspective, it analyses the strategic benefits and limitations of China's soft power policies, and compares them with similar policies by India for identifying the differences and applications.

Iraq's Oil and Gas Industry Bloomsbury Publishing USA

Indonesia is the fourth most populous country in the world after China, India and the United States. It is also the world's largest Muslim majority

country and the third largest democracy. Its economy is currently the 10th largest on the global scale. Indonesia is recognized as an emerging power, and a respected member of the international community. It plays an important role not only in the Asia-Pacific region, but also in the world at large. Indonesia has defied the grim predictions about its imminent collapse following the ouster of Suharto in 1998. Its ability to rebuild and reinvigorate itself into its current status is one of the most impressive stories of the late 20th and early 21st century. Its journey since the fall of Suharto is inspiring at a time when the world has seen many failing nations, recurring economic crises, and growing radicalism and terrorism. Yet, the Indonesian story receives far less attention than the BRICS (Brazil, Russia, India, China, and South Africa). The Indonesian story suggests a different pathway to emerging power status. This pathway is based not so much on military or economic resources. Rather, it lies in the ability of a country to develop a positive, virtuous correlation among three factors: democracy, development and stability, while pursuing a foreign policy of restraint towards neighbours and active engagement with the world at large. This is the key lesson from the story of Indonesia that this book seeks to present. It analyses Indonesia's foreign policy and international role under the democratic regime, with particular focus on its role as a leader of ASEAN, its relationship with the major powers of the Asia Pacific, and its place in the global order of the 21st century. Contents: Why Indonesia Matters? Democracy, Development and Stability: Creating a Virtuous Cycle Indonesia and the Regional Architecture Indonesia and the Major Powers Indonesia as a Global Actor A Nation on the Move: Indonesian Voices Readership: General public, students, policy makers, and think tanks intellectuals. Key Features: First book that recognizes Indonesia as an emerging power First book in a long time on overall Indonesian foreign policy Among the first to study impact of democratization on foreign policy of Indonesia Keywords: Indonesia; Rising Powers; ASEAN; Asia Pacific Security Reviews: "Indonesia today offers an inspiring example of how democracy, development and stability can be made to work together to enhance a nation's prestige and influence on the global stage. Amitav Acharya's *Indonesia Matters* is an insightful account of the foreign policy of the world's largest Muslim country, demonstrating how democratic transformation strengthened Indonesia's leadership in ASEAN, the Asia Pacific, and the world at large." Surin Pitsuwan Former Foreign Minister of Thailand and Secretary-General of ASEAN (2008-12) "Can a major new power rise in the community of nations without threatening its neighbours, destabilizing existing arrangements, and producing an arms race? This is a major question for this century, after the past one in which Germany and Japan established such alarming precedents. China and India do not provide much reassurance that we are wiser than we were. Indonesia, however, with one of the lowest arms expenditures in the world either per capita or in relation to GNP looks a promising case for an alternative model. This book is a very timely study of a critical issue for our times." Anthony Reid Emeritus Professor College of Asia and the Pacific Australian National University "Amitav Acharya has produced a timely and illuminating examination of Indonesia's foreign policy since the establishment of democracy after Suharto's period in power. Drawing on extensive interviews and keen observations, Amitav skilfully traces the evolution of Indonesia's diplomacy from its modest regional roots to the rarefied world of global engagement. This is an important book and a necessary read for all those who follow Indonesia's remarkable ascent." Kurt Campbell Assistant Secretary of State for East Asian and Pacific Affairs (2009-13) "Acharya has provided an excellent contribution in the discourse on Indonesia's foreign policy. He has shown the unique pathway of the country in achieving its current place in regional and global politics through the virtuous cycle of democracy, development, and stability." The Indonesian Quarterly

The Legal and Contractual Framework Frontiers E-books

What have been the biggest successes in educational technology – and why have they succeeded when others have failed? *Educational Visions* shows how innovations including citizen science, learning at scale, inclusive education, learning design and analytics have developed over decades. The book is shaped by the visions pursued by one research group for the past 40 years. It outlines the group's framework for innovation and shows how this can be put into practice to achieve long-term results that benefit both students and teachers at every educational level.
