The Illustrated Lyrics of Matt Pike Doubleday Books for Young Readers "But the point of Burke's work, and the significance of his achievement, is not that he points out that religion and language affect each other, for this has been said before, but that he proceeds to demonstrate how this is so by reference to a specific symbolic context. After a discussion 'On Words and The Word,' he analyses verbal action in St. Augustine's Confessions. He then discusses the first three chapters of Genesis, and ends with a brilliant and profound 'Prologue in Heaven,' an imaginary dialogue between the Lord and Satan in which he proposes that we begin our study of human motives with complex theories of transcendence,' rather than with terminologies developed in the use of simplified laboratory equipment. . . . Burke now feels, after some forty years of search, that he has created a model of the symbolic act which breaks through the rigidities of the 'sacred-secular' dichotomy, and at the same time shows us how we get from secular

and sacred realms of action over the bridge of language. . . . Religious systems are systems of action based on communication in society. They are great social dramas which are played out on earth before an ultimate audience, God. But where theology confronts the developed cosmological drama in the 'grand style,' that is, as a fully developed cosmological drama for its religious content, the 'logologer' can be further studied not directly as knowledge but as anecdotes that help reveal for us the quandaries of human governance." --Hugh Dalziel Duncan from Critical Responses to Kenneth Burke, 1924 - 1966, edited by William H. Rueckert (Minneapolis: University of Minnesota Press, 1969). Linking Government Data provides a practical approach to addressing common information management issues. The approaches taken are based on international standards of the World Wide Web Consortium. Linking Government Data gives both the costs and benefits of using linked data techniques with government data; describes how agencies can fulfill their missions with less cost; and recommends how intra-agency culture must change to allow public presentation of linked data. Case studies from early adopters of linked data approaches in international governments are presented in the last section of the book.

Linking Government Data is designed as a professional book for those working in Semantic

Web research and standards development, and for early adopters of Semantic Web standards and techniques.

Enterprise architects, project managers and application developers in commercial, not-for-profit and government organizations concerned with scalability, flexibility and robustness of information management systems will also find this book valuable. Students focused on computer science and business management will also find value in this book.

This is a retrospective of musical poetry by heavy metal guitarist and frontman, Matt Pike, which spans twenty years beginning in 1998 with the album Art of Self Defense up to the latest release, the 2019 Grammy-Award winning record, Electric Messiah. Every chapter features brand-new artistic interpretations from the minds and hearts of an incredible cast of illustrators, tattooers, printmakers, and painters. Pike has been trusted since the beginning to depict his vision. The cast of artists are Arik Roper, David V. D'Andrea,

Santos, Brian Mercer, Skinner, Jondix, Stash, Tim Lehi, Jordan Barlow, and Derrick Snodgrass created brand new, never before seen works specifically inspired by each album, including one large illustration to define the chapter ahead and two additional vignettes that are directly inspired by the songs. Each has their own bold and iconic style that perfectly compliments the breadth of Pike's various works. These prolific artists transport the reader further into a far-away landscape of ominous Lovecraftian entities, shrouded in wondrous and esoteric darkness. Together, they have redefined the way we perceive Underground Doom Metal these past twenty years and it is our honor to showcase them together along with the incredible written word of Pike.

Billy Casper had a higher winning percentage than Arnold Palmer, he won twice as many times on the PGA Tour as Gary Player, and during his career he finished in the top twenty-five more consistently than Jack Nicklaus. And yet, when

golf historians write about the legends of the game, with special attention paid to the above-listed "Big Three," his name is often left out of the discussion, or is at best an afterthought. In this fascinating autobiography, Casper tells his life story, shining candid insight into the man who quietly collected fifty-one PGA Tour victories, the seventh highest total in history. *Head on a Pike* John Wiley & Sons

Laying the Foundation: Digital Humanities in Academic Libraries examines the library's role in the development, implementation, and instruction of successful digital humanities projects. It pays special attention to the critical role of librarians in building sustainable programs. It also examines how libraries can support the use of digital scholarship tools and techniques in undergraduate education. Academic libraries are nexuses of research and technology; as such, they provide fertile ground for cultivating and curating digital scholarship. However, adding digital humanities to library service models requires a

clear understanding of the resources and skills required. Integrating digital scholarship into existing models calls for a reimagining of the roles of libraries and librarians. In many cases, these reimagined roles call for expanded responsibilities, often in the areas of collaborative instruction and digital asset management, and in turn these expanded responsibilities can strain already stretched resources. Laying the Foundation provides practical solutions to the challenges of successfully incorporating digital humanities programs into existing library services. Collectively, its authors argue that librarians are critical resources for teaching digital humanities to undergraduate students and that libraries are essential for publishing, preserving, and making accessible digital scholarship.

A safety pin was all that kept Spectacular Bid from becoming the eleventh Thoroughbred to take the Triple Crown. This work examines Spectacular Bid from his humble beginnings -- he was born in a mud puddle on a horse farm in Versailles, Kentucky -- to his recognition as one of the greatest American racehorses. On the morning of the 1979

Belmont Stakes, Spectacular Bid stepped on a safety pin in his stall, injuring his foot. He had impressively won the first two races -- the Kentucky Derby and the Preakness -- but finished third in the Belmont, most likely due to his injury, making him one win shy of becoming the sport's third straight Triple Crown champion. But that loss did not prevent him from becoming one of horse racing's greatest competitors. After taking two months to recover, the battleship gray colt would go on to win 26 of 30 races during his career, with two second-place finishes and one third. He was voted the tenth greatest Thoroughbred of the twentieth century according to Blood-Horse magazine, and A Century of Champions places him ninth in the world and third among North American horses -- even ahead of the renowned Man o' War. This horse biography tells the story of the honest and not-so-glamorous colorful characters surrounding the champion -- including Bud Delp, the brash and cocky trainer who was distrustful of the Kentucky establishment, and Ron Franklin, the nineteen-

year-old jockey who buckled under the stress and pressure associated with fame -- and how they witnessed firsthand the splendor and triumphs of Spectacular Bid. Including contemporary newspaper accounts of Bid's exploits and interviews with key players in his story, this is an encompassing look into the legacy of one of horse racing's true champions.
