ROMAN MONROE

An Insider's Guide to Cases in Clinical Medicine Elsevier Health Sciences

The second edition of this book is a practical revision guide for postgraduate students preparing for clinical examinations in internal medicine. Authored by an experienced postgraduate examiner, the book presents a series of short and OSCE cases presented in a uniform format, offering guidance on examination techniques, common mistakes made by candidates, and typical presentation of findings. Divided into seven sections, the book begins with advice on how to prepare for and pass clinical examinations. The remaining chapters cover cases relevant to different systems of the body – cardiovascular; respiratory; abdominal; neurological; endocrine, rheumatologic, connective tissue and skin; and eye and fundus. Each case provides a summary of diagnosis, differential diagnosis, management, and further information often required in examinations. The questions and model answers are similar to those most frequently encountered in examinations. The comprehensive text is enhanced by illustrations and figures to assist learning and will be useful not only to candidates preparing for postgraduate clinical examinations, but also to undergraduate students. Key points Practical revision guide for postgraduate students preparing for clinical examinations in internal medicine Questions and model answers similar to those encountered in examinations Authored by experienced postgraduate examiner Previous edition (9789386150035) published in 2016

Everything is covered, from respiratory arrest and asthma to environmental effects and abnormal chest X-rays. Anatomy, physiology and the relevant pathological background feature in the basic science section, with important advice on

the approach to the patient. The self-assessment section at the end is crucial to testing your understanding, giving you the best possible preparation. For further information, visit www.clinicalcasesuncovered.com

Kumar and Clark's Clinical Medicine E-Book Jaypee Brothers Medical Publishers

It is vitally important for medical students and junior doctors to grasp an understanding of 'real-life medicine'. This innovative book of cases shows how a particular presentation may progress, and the different complications that may arise and emerge over time, which may be missed by the 'snapshot in time' approach taken by many problem-based volumes. The content reflects the average length of stay for a patient in hospital, in which their situation can change in a multitude of ways, and the management of chronic conditions may also need to be adapted as complications arise.

Demonstrates the real bedside experiences that medical students can expect, in whichever simple or complex way that they may present Cases selected from a range of sub-specialties for comprehensive coverage across the curriculum Illustrates the complicated, progressive problems that will be seen while practicing as a doctor with detailed diagrams and diagnostic imagery to aid understanding Shows, with timepoints, how differential diagnoses may change as more information becomes available and new symptoms arise Describes a typical initial hospital stay, and subsequent presentations to the general practitioner and hospital readmission The Authors Andrew Solomon, BM BCH MA(Hons) DM FRCP, is a Consultant Physician, East and North Hertfordshire NHS Trust, Stevenage, UK. Julia Anstey, BSc (Hons) MBBS, is a Foundation Doctor, Somerset NHS Foundation Trust, Taunton, UK. Liora Wittner, MBBS BSc, is a Resident in Internal Medicine, Shamir Medical Centre, Be'er Ya'akov, Israel. With contributions from Priti Dutta, MBBS BSc FRCR, Consultant Radiologist, Royal Free London NHS Foundation Trust, London, UK.

Clinical Cases CRC Press

This unique book presents a wealth of information on common presentations and illnesses, presented as medical case studies. It is useful for exam preparation, as a quick reference guide for working doctors, and as an interesting read for all those interested in medicine. 250 Clinical Cases covers a wide variety of conditions, providing in-depth insights into the most relevant topics, classified by system. Cases are accompanied by common viva voce examination questions as well as more advanced level questions that will help the reader develop a deeper understanding. Now in its sixth edition, the book has been fully updated to reflect current evidence and relevance for working doctors. It will help everyone, from medical students to consultants, to find the hidden

clinical gems and historical background they need to achieve true clinical excellence. 250 clinical cases in print – provides a comprehensive overview of all relevant topics Conversational and accessible style – suitable for medical students Based on the latest evidence – provides an ideal quick reference guide 'Ward round' type question and answer section - ideal for exam preparation Cases alphabetised by system for easy navigation Easily portable size – fits into any medical bag Self-assessment by system Interesting medical emergency presentations Procedures for the core medical curriculum Topics updated for clinical relevance Multiple choice questions replaced with open answer questions

Short Cases in Clinical Exams of Internal Medicine CRC Press

Presented as a selection of long and short cases, this book is a practical guide to the diagnosis and management of neurological disorders and diseases for trainees. Each case is explained in question and answer format as it would be on clinical ward rounds, with emphasis on accurate diagnosis based on history taking and clinical findings. Divided into seven sections, each featuring several cases, the book covers higher mental functions/cerebral hemisphere, cranial nerves, spinal cord, ataxia, peripheral neuropathy, neuromuscular junction disorders, and extrapyramidal syndrome. The text is further enhanced by clinical images, diagrams and tables, and concludes with a section of 'pearls for viva voce examination'. Key points Practical guide to diagnosis and management of neurological disorders Presented as a selection of long and short cases, each in question and answer format Emphasis on accurate diagnosis based on history taking and clinical findings Features section of 'pearls for viva voce examination'

Publisher's Note: Products purchased from 3rd Party sellers are not guaranteed by the Publisher for quality, authenticity, or access to any online entitlements included with the product. Introducing an innovative, systematic approach to understanding differential diagnosis, Frameworks for Internal Medicine helps students learn to think like physicians and master the methodology behind diagnosing the most commonly encountered conditions in internal medicine.

An Aid to the Medical Long Case Elsevier India

This handbook presents reviews of long cases of surgery in short for the benefit of students of MBBS final year. Provides information on the best of questions and tests with references based on the clinical cases drawn from the most important textbooks of surgery. Contains 10 long-cases giving an apt direction and guidance to write precise and correct answers on questions that are frequently asked by external examiners. The text helps to have a quick glance through the important cases, their history and relevant discussion points. It acquaints with the latest investigations, most recent classifications and current trends in management. It highlights the checklist of most-read topics about which questions are raised in clinics and examinations

Clinical Dermatology Elsevier Health Sciences

A collection of short cases arranged by clinical area, emphasising the key diagnostic features of clinical conditions as commonly presented in the short case part of the Final MB and MRCP examinations. Also included are likely instructions or commands expected from the examiner for each condition, and the key points which the candidate must tell the examiner. In June 2001 the MRCP short cases exam is being replaced with a new OSCE-style exam called PACES (Practice

Assessment of Clinical Examination Skills) and this book will take full account of this change.

Graber and Wilbur's Family Medicine Examination and Board Review, Fourth Edition Elsevier Health Sciences

This useful new book enables students to apply the theoretical knowledge gained in their medicine classes to clinical cases. Students will improve their diagnostic skills as they are taken simply and logically through the steps of generating a differential diagnosis, weighing up evidence to refine a hypothesis, and constructing a management plan. Author Samy Azer guides readers to use self-directed learning to identify their learning needs and ultimately develop a deeper understanding of internal medicine. Designed to complement and enhance recommended undergraduate medicine textbooks, this book is easy to follow and written simply, making it suitable for students who speak English as a second language. More than 50 clinical cases, covering the core undergraduate medicine curriculum Case discussions using a logical and scientific approach to help students achieve their own diagnoses Model answers for comparison, to improve learning outcomes Summary of fundamental points for examination revision Useful up-to-date resources Short-answer and multiple-choice questions to test knowledge Diagrams and tables to deepen understanding and consolidate essential concepts Includes an Enhanced eBook version with purchase. The enhanced eBook allows the end user to access all of the text, figures, and references from the book on a variety of devices

Short and Long Cases in Medicine Jaypee Brothers Medical Publishers

Davidson's 100 Clinical Cases was awarded First Prize in Medicine in the 2009 British Medical Association Medical Book Awards. This book reflects the real world in which doctors practise medicine. The selection of clinical problems guides the reader, step by step, through the correct path in the maze between the presenting complaint of a patient and the final diagnosis. The text emphasises the value of interpreting available clinical and investigative information in a logical way before considering a definitive diagnosis. The 100 cases are based on the 'presenting problems' of Davidson's Principles and Practice of Medicine. The book provides an international outlook reflecting the differences in the practice of medicine in the developing world and in low-resource settings, and addresses the epidemiological, economic and other reasons for many of these important differences. The cases are written by a team of senior doctors, from 12 countries, with considerable teaching experience. The book now includes 100 cases all closely linked to the 'presenting problems' sections of the latest 21st Edition of Davidson's Principles and Practice of Medicine. In this expanded new edition there are many new cases including aluminium phosphide poisoning; occupational lung disease; tremor; and drug interactions.

Kumar & Clark's Cases in Clinical Medicine E-Book Lippincott Williams & Wilkins

Using an easily accessible, highly templated format, Clinical Cases in Tropical Medicine, 2nd Edition, provides more than 100 realistic scenarios for tropical infectious diseases. Full-color photographs and maps, a convenient question-and-answer presentation, and succinct summary boxes help you identify and understand the tropical diseases you're likely to encounter. This up-to-date 2nd Edition

is an excellent resource and study tool for infectious diseases fellows, doctors preparing for exams in tropical medicine, primary care doctors with patients who are global travelers, and global health nurses and practitioners alike. Offers realistic scenarios for encountering patients in rural, resource-poor settings, presenting cases as "unknowns," just as in a real clinic or emergency situation. Covers newly emerging diseases such as Zika virus, severe fever with thrombocytopenia syndrome (SFTS), and knowlesi malaria. Features topics in migrant medicine of particular importance to clinicians in non-tropical countries, including louse-borne-relapsing fever, spinal brucellosis, and hyperreactive malarial splenomegaly. Includes "classic" tropical diseases such as African trypanosomiasis, chagas, leprosy, and yaws. Reflects the use of novel diagnostics used in resource-poor settings, as well as developing drug resistance in relevant cases. Provides a useful index and map that organize cases geographically, for a targeted approach to study. Serves as a companion to Manson's Tropical Diseases, with a reading list at the end of each case referring to the corresponding chapter in the larger text.

Davidson's 100 Clinical Cases E-Book CRC Press

The #1 review book for the Family Medicine Board Examination – updated with a new full-color design! The renowned Family Practice Examination and Board Review is now Graber and Wilbur's Family Medicine Examination & Board Review, the perfect way to prepare for the primary and recertification exam in family medicine and for licensure exams. This engagingly written study guide has been completely updated with a new full-color design and is enhanced by powerful new learning aids, including 50 additional questions to the already comprehensive final exam, and chapter-ending clinical pearls that consolidate high-yield information. You will also, of course, find the humor, wit, and approachable tone that have brought the book legions of enthusiastic – and appreciative – fans. New to this edition! Full color layout Clinical pearls at the end of each chapter to highlight key takeaways 50 brand new final exam questions Numbered cases for easy reference Outstanding features from the previous edition: More than 350 progressive case studies that reflect the realities of clinical practice and prepare you for your exams 29 chapters based on body system and elements of patient care A comprehensive final exam (nearly 200 questions) with answers referenced to pages in the book Detailed answer explanations that describe not only why an answer is correct, but why the other answers are wrong Comprehensive coverage of ALL topics on the boards and recertifying exam Super-effective learning aids such as Quick Quizzes, Helpful Tips, learning objectives, clinical pearls, and more Color photographs of conditions most easily diagnosed by appearance An outstanding refresher for primary care physicians, physician assistants, and nurse practitioners

Short and Long Cases in Clinical Medicine CRC Press

A solid knowledge base and good clinical skills don't necessarily guarantee examination success in the long case OSCE. This book is the ultimate guide for medical students needing to combine their

knowledge and skills with an ability to interpret the clinical findings, the proficiency to present them clearly and the confidence to deal with the examiners questions. Adopting a proven, highly effective approach, this revision aid uses role play with simulated patients to hone clinical examination and presentation skills. The fifty cases are divided into six areas: cardiology, respiratory, abdomen, neurology, musculoskeletal and surgery. Written by successful candidates and examiners, the guide poses a number of important and commonly asked examination questions for each case to assist in preparation and confidence, and model answers are provided to ensure an understanding of exactly what is required. Working in groups or independently, students will welcome the large, colourful format, the breakdown of marking schemes, an overview of examiners expectations, a guide to presenting clinical findings and innumerable 'insider' tips throughout. See accompanying video here: <https://www.youtube.com/watch?v=Cvr4y-NykUU>

Long Cases in General Surgery Jaypee Brothers Medical Publishers Pvt Limited

100 Cases in Clinical Medicine is an indispensable revision tool for medical students preparing for clinical examinations or OSCEs. Using scenarios which mimic daily life, the cases will interest students in clinical problems and help them develop their clinical reasoning skills, with each case presenting details of a patient's medical history and the key findings of a clinical examination, together with initial investigation results for evaluation. Key questions then prompt the student to evaluate the patient, and reach a decision regarding their condition and the possible management plan, while the answer pages will help the student to understand the processes that a clinician goes through in dealing with the problems presented. Contents are organised to provide a quick review of each body system, with a selection of cases relevant to that specific system, then the majority are presented randomly to mimic real life in a GP surgery or emergency department. New to this edition: a review of each body system as well as random cases; new page design with a second colour used throughout; and brought up-to-date with 25% new cases.

Cases in Clinical Medicine CRC Press

This book with 139 clinical cases, emphasises on simplification of facts, clarity of expression and giving a practical approach to various clinical problems.

Surgery Long Cases in Short JP Medical Ltd
