Internet-Based Organizational Memory and Knowledge Management IGI Global

"This book explores the impacts and perspectives of the COVID-19 on education as well as research while schools are operating mostly via online digital platforms"--

Handbook of Research on Urban- Rural Synergy Development Through Housing, Landscape, and Tourism Information Science Reference

A variety of applications have been developed in order to engage with society. These tools have enabled computer scientists to capture large sets of unstructured data for machine learning and make the information widely available in academia. Techniques for Coding Imagery and Multimedia: Emerging Research and Opportunities is a pivotal reference source featuring the latest scholarly research on ways researchers code imagery and multimedia for research purposes, as well as describe some of the applied methods for research value. Including coverage on a wide variety of topics such as linguistic analysis, gender communication, and mass surveillance, this book is an important resource for researchers, academics, graduate students, and professionals seeking current research on best ways to globally expand multimedia research and imagery.

The business ecosystem within Asia is undergoing a transformation post COVID-19. Green issues, inclusion, and strategic disruptors in companies and economies have become rising topics in Asian businesses, causing such a change. This has the potential to be an evolution for Asian businesses, creating new business models for economic growth in Asia. The Handbook of Research on Big Data, Green Growth, and Technology Disruption in Asian Companies and Societies presents a rich collection of chapters exploring and discussing the emerging topics, challenges, and success factors in business, big data, innovation, and technology in Asia. This book will explore the changes made in the transition towards greener and sustainable societies and economies. Covering topics including information technologies, open innovation, and green issues, this book is essential for researchers, academicians, students, politicians, policymakers,

corporate heads of firms, senior general managers, managing directors, information technology directors and managers, and libraries.

International Journal of Open Source Software and Processes IGI Global

The International Journal of Open Source Software and Processes (IJOSSP) publishes high-quality peer-reviewed and original research articles on the large field of open source software and processes. This wide area entails many intriguing question and facets, including the special development process performed by a large number of geographically dispersed programmers, community issues like coordination and communication, motivations of the participants, and also economic and legal issues. Beyond this topic, open source software is an example of a highly distributed innovation process led by the users. Therefore, many aspects have relevance beyond the realm of software and its development. In this tradition, IJOSSP also publishes papers on these topics. IJOSSP is a multi-disciplinary outlet, and welcomes submissions from all relevant fields of research and applying a multitude of research approaches.

Our understanding of the concept of narrative has undergone a significant transformation over time, particularly today as new communication technologies are developed and popularized. As new narrative genres are born and old ones undergo great change by the minute, a thorough understanding can shed light on which storytelling elements work best in what format. That deep understanding can then help build strong, satisfying stories. The Handbook of Research on Narrative Interactions is an essential publication that examines the relationships between types of narratives in a shifting and widening scope of storytelling forms. While highlighting a wide range of topics including contemporary culture, advertising, and transmedia storytelling, this book is ideally designed for media professionals, content creators, advertisers, entrepreneurs, researchers, academicians, and students.

The internet of things (IoT) has massive potential to transform current business models and enhance human lifestyles. With the current pace of research, IoT will soon find many new horizons to touch. IoT is now providing a base of technological advancement in various realms such as pervasive healthcare, smart homes, smart cities, connected logistics, automated supply chain, manufacturing units, and many more. IoT is also paving the path for the

emergence of the digital revolution in industrial technology, termed Industry 4.0. *Transforming the Internet of Things for Next-Generation Smart Systems* focuses on the internet of things (IoT) and how it is involved in modern day technologies in a variety of domains. The chapters cover IoT in sectors such as agriculture, education, business and management, and computer science applications. The multi-disciplinary view of IoT provided within this book makes it an ideal reference work for IT specialists, technologists, engineers, developers, practitioners, researchers, academicians, and students interested in how IoT will be implemented in the next generation of smart systems and play an integral role in advancing technology in the future.

For many years, there has been a quest to discover the best teaching and learning methods in order to strengthen the classroom and the mind.

Researchers now know more than ever before about the brain's impact on learning, historical triggers that lead to deep learning, and how to scale education with technology. Yet much of what is known is under-utilized in the classrooms of today, if leveraged at all. *Education 3.0 and eLearning Across Modalities* showcases effective practices based on innovative initiatives, research, and practitioner experiences from the past two decades. The effective practices of multi-modal learning, which are well known to practitioners but largely unknown to the general

academic, are explained in detail while making each technique approachable and attainable regardless of institution, size, or modality. Covering topics such as distance learning, modern learning technologies, and learning innovation, this book is essential for teachers, educational software developers, IT consultants, instructional designers, curriculum developers, graduate students, undergraduate students, academicians, administrators, higher education faculty, and researchers.

Cultural competence in education promotes civic engagement among students. Providing students with educational opportunities to understand various cultural and political perspectives allows for higher cultural competence and a greater understanding of civic engagement for those students. The *Handbook of Research on Citizenship and Heritage Education* is a critical scholarly book that provides relevant and current research on citizenship and heritage education aimed at promoting active participation and the transformation of society. Readers will come to understand the role of heritage as a symbolic identity source that facilitates the understanding of the present and the past, highlighting the value of teaching. Additionally, it offers a source for the design of didactic proposals that promote active participation and the critical conservation of heritage. Featuring a range of topics such as educational policy, curriculum design, and political science, this book is ideal for educators, academicians, administrators, political scientists, policymakers, researchers, and students.

As it stands, there is currently a void in education literature in how to best prepare preservice teachers to meet the needs of individualized learners across multiple learning platforms, social/economical contexts, language variety, and special education needs. The subject is in dire need of support for the ongoing improvement of administrative, clinical, diagnostic, and instructional practices related to the learning process. The *Handbook of Research on Reconceptualizing Preservice Teacher Preparation in Literacy Education* stimulates the professional development of preservice and inservice literacy educators and researchers. This book also promotes the excellence in preservice and inservice literacy both nationally and internationally. Discussing topics such as virtual classrooms, critical literacy, and teacher preparation, this book serves as an ideal resource for tenure-track faculty in literacy education, clinical faculty, field supervisors who work with preservice teacher educators, community college faculty, university faculty who are in the midst of reconceptualizing undergraduate teacher education curriculum, mentor teachers working with preservice teachers, district personnel, researchers, students, and curricula developers who wish to understand the needs of preservice teacher education.

Handbook of Research on Asian Perspectives of the Educational Impact of COVID-19 IGI Global

It has quickly become apparent in the past year that online learning is not only an asset, but it is critical to the continued education of youth during times of crisis. However, districts and schools across the nation are in need of guidance and practical, research-backed approaches to distance and hybrid learning. The current COVID-19 crisis has demonstrated that effective learning in K-12 is possible, but many districts struggled and continue to struggle in achieving that reality. There is also the growing consensus that even if things "return to normal," distance and blended learning strategies should continue to be employed in many ways across the K-12 environment. *Designing Effective Distance and Blended Learning Environments in K-12* provides key insights into the ways that school districts and educators from across the world have effectively designed and implemented distance and blended learning approaches to enable and enhance student learning. The diverse collection of authors from various demographics and roles in school systems will benefit readers across a wide spectrum of school community stakeholders. There will also be an emphasis on how research and theory is put into practice, along with an honest discussion of what strategies and actions were successful as well as those that were less so. This book is essential for professionals and researchers working in the field of K-12 education, particularly superintendents, curriculum developers, professional learning designers, school

principals, instructional technology specialists, and teachers, as well as administrators, researchers, academicians, and students interested in the effective practices being used in blended learning approaches.

Advanced Topics in Information Resources Management, Volume 5 Engineering Science Reference

The Internet is quickly moving from a marketing tool in which businesses and organizations promote sales and awareness, to a core element of any information system architecture. The advent of the Internet as a fundamental infrastructure for the delivery of advanced business systems has opened up a wide range of questions for the design and development of such systems. *Internet-Based Organizational Memory and Knowledge Management*

provides a multidisciplinary view of the wide range of ideas on innovative Internet information systems as they related to organizational memory and knowledge. Using the Internet as the primary architectural base, this book presents results and challenges of Internet-based knowledge management systems.

Advanced Topics in Information Resources Management is a series of books that features the most current research findings in all aspects of information resources management. From successfully implementing technology change to understanding the human factors in IT utilization, these

volumes address many of the managerial and organizational applications and implications of information technology in organizations. Advanced Topics in Information Resources Management, Volume 5 is a part of this series. Advanced Topics in Information Resources Management, Volume 5 provides information technology researchers, scholars, educators, and practicing managers with the latest research on managing the technological, organizational, and human aspects of information utilization and management. This volume presents current trends and challenges in implementing and strengthening information resources strategies in organizations worldwide.
