Unit readiness starts with safe operations. This pamphlet is written for the additional duty safety officer/noncommissioned officer (ADSO/NCO) at

company-level ground units. The ADSO/NCO assists the commander with safety responsibilities when there is no assigned safety officer (SO) by table of organization and equipment or table of distribution and allowances. This pamphlet provides guidance in applying policies and procedures and necessary information for managing a unit safety program. Separate chapters discuss how to establish and maintain a unit safety program, apply the risk management (RM) process, conduct safety surveys, report and investigate accidents, ensure safety in tactical operations, and promote safety in garrison and off-duty activities, including privately owned vehicle (POV) and privately owned motorcycle (POM) accident prevention.

This book, Department of the Army Pamphlet DA PAM 700-127 Logistics: Integrated Product Support Procedures, supports the Army's implementation of performance-based life cycle product support, including performance-based logistics, and provides implementing guidance for planning, developing, acquiring and sustaining well defined performance-based product support strategies (PBPSS) that meet the Soldier's requirements for Army materiel and software throughout its life cycle. Army Regulation (AR) 700-127 provides policies and requirements for integrated product support (IPS). This pamphlet should be used in conjunction with AR 700-127 to ensure consistent application of Army policy when developing and implementing a PBPSS for materiel and software. This pamphlet guides implementation of PBPSS requirements; describes the process that the materiel developer (MATDEV) will use to develop and integrate a PBPSS consistent with the system engineering process; identifies the framework (12 IPS elements) used to develop the PBPSS; describes the product support manager's (PSM) role and relationships with stakeholders in developing and executing the PBPSS; defines metrics to measure the product support system performance; and stresses the importance of ensuring that contract requirements are accurately identified and included in solicitations and contracts.

This publication, Department of the Army Pamphlet DA PAM 70-3 Army Acquisition Procedures March 2014, provides Army acquisition procedures for all aspects of the materiel acquisition process. In addition to covering Army implementation of the Department of Defense (DOD) 5000-series acquisition guidance, the pamphlet provides Army unique procedures used in the materiel acquisition process. The information in this pamphlet applies to acquisition systems development, both weapon systems and Automated Information Systems (AISs). It includes but is not limited to weapon systems; command, control, communications, and computers/information technology systems; national security systems; special access programs (unless specifically excepted per program charter); computer resources integral to those items or systems; system and nonsystem training aids, devices, simulations, and simulators; embedded training; embedded testing; instrumentation, targets, and threat simulators; and clothing and individual equipment. The information applies to command, control, communications, and computers/information technology systems where the Army is the executive agent for another organization or Service or where a command, control, communications, and computers/information technology system is developed cooperatively with other governments unless such governments can assure their compliance with published U.S. Army acquisition policies and procedures. Unless specifically excluded, the procedures in this pamphlet apply to all Acquisition Categories (ACATs) I through III, including highly sensitive classified acquisition programs, automated information systems, and clothing and individual equipment. The portions of this pamphlet pertaining to the Army's acquisition, logistics, and technology workforce management apply to Active Army, Department of the Army civilians, the Army National Guard of the United States, and Army Reserve personnel serving in designated acquisition positions.

Department of the Army Pamphlet DA PAM 700-28 Independent Logistics Assessments July 2019 provides a standard framework for assessing the status and/or health of the logistics program in preparation for key milestone decision reviews in the materiel acquisition process. The use of this pamphlet provides guidance for uniform independent logistics assessments (ILAs) across all commodity types (for example; Major Automated Information System (MAIS), combat vehicles, aircraft, electronic, or training equipment) thereby reducing subjectivity in the process. This guidance may be applied to any Acquisition Category (ACAT) program; however, each ILA criterion should be carefully tailored to individual program requirements. This pamphlet is intended for use by personnel involved in systems acquisition, materiel fielding or materiel transfer. The primary authority for conducting ILAs is derived from AR 700-127. While certain aspects of computer resources support are covered by this pamphlet, the use of general purpose information management area (IMA) nondevelopmental item (NDI) equipment, services, and systems that are not embedded in or integral to a materiel system fall under the purview of AR 25-1. The IMA includes the disciplines of automation, telecommunications, records management, printing and publishing, and visual information.
