In 1735, five Maroon boys are ready to be initiated as warriors. They have prepared long and hard for this day, and must now pass a sequence of tests. How the boys approach this, the most important day of their lives, says much about how they will

respond to the challenges ahead. When they encounter a Redcoat troop in the forest near their village, the defence of the village and surrounding Maroon communities will depend on these boys, their training, courage, and intelligence. On this occasion, their community depends on them for its survival, but their initiation as warriors also teaches them lifelong lessons about loyalty, responsibility, trustworthiness and friendship.

Subsequent sections cover cardiovascular and cerebrovascular diseases, major forms of cancer, diseases of the respiratory tract, metabolic and digestive diseases, musculoskeletal diseases, neurodegenerative diseases, and finally, three infectious diseases that often manifest as chronic conditions. Special sections in each chapter focus on controversial topics that can serve as a launching point for classroom discussion of molecular mechanisms of disease pathogenesis and the relevant epidemiologic issues pertaining to the prevention and control of chronic diseases.
