'Fascinating ... not only a history of graffiti, but also a history of the 18th century through lost voices of the people who lived through it.' The Times What if walls could talk? For historian Madeleine Pelling, they can - if you know where to look. A brilliant new cultural history of the long eighteenth

century, Writing on the Wall is told through the marks its citizens left behind, bringing into focus lost voices from the highest to the lowest in society. From the centre of London to the islands of the Caribbean, Pelling goes in search of graffiti, evidence of how ordinary people experienced the world-changing events that defined their lives - from political prisoners to sex workers, homesick sailors, Romantic poets and the artisans of the industrial revolution. Here are lives, loves, triumphs and failures, scratched into the walls of prisons and latrines, chalked up on doors and etched into windows. The names of their creators may be lost to history, but together they tell the real story of Britain's most rebellious and transformative century.

Python 101 Springer

Spanning more than a millennium, this anthology gathers literary sources from across the entire region of Southeast Asia. Its 24 selections derive from a variety of genres and reflect the diverse range of cultural influences the region has experienced. The literary excerpts illustrate the impact of religious and ideological currents from early Buddhism to Islam and Roman Catholicism. The selections reveal how cultural influences from South Asia, China, the Arabic world, and Europe arrived in Southeast Asia and left their marks in the realms of literature, society, and culture. The readings include religious works, folklore, epic poems, short stories, and the modern novel. They range from the Cambodian medieval version of

the Ramayana to the 16th century Javanese tales to modern Thai short stories and include selections from Cambodia, Thailand, Indonesia, Laos, Philippines, and Burma.

Careless Wishes Editions Quae

In 1967, Canada celebrated the 100th anniversary of its founding with a spectacular party, and the whole world was invited. Montreal's Expo 67 was the first world's fair held in Canada, and it was a huge success, attracting over 50 million visitors. The 1,000-acre site was built on two man-made islands in the St. Lawrence River and incorporated 90 futuristic pavilions created by some of the world's greatest architects and designers. Over 60 countries were represented, along with many private, corporate and thematic pavilions, all brought together under the theme "Man and his World." With performers and entertainers of all varieties, restaurants, cultural attractions, exhibitions and a world-class amusement park, Expo 67 was literally the party of the century, exceeding all expectations.

A Successful Transformation? Lulu.com New Challenges helps students become more effective learners and better citizens of the world through personal development. The information-driven approach in New Challenges encourages teenagers to think about the world around them and provides lively achievable tasks, building their confidence, creativity, participation and performance. With New Challenges teachers make lessons educational, successful and fun!

Students move from a beginner level into secondary methodology which then prepares them for a more formal learning environment. Levels 1 and 2 cover the key objectives in the Council of Europe's Waystage level (A2), corresponding to CESOL's KET exam. Levels 3 and 4 cover all the key objectives in the Council of Europe's Threshold level (B1), corresponding to CESOL PET exam, as well

as some of the objectives in the Vantage level (B2). The Workbook and Multi-ROM include preparation and practice for these exams. Themes are: * related to students' own world (friends, shopping, films, neighbours, holidays, sport) * cross-curricular (science and technology, history) * develop citizenship education (belonging and identity, diversity, awareness of disability) * about other cultures around the world (lifestyles, charity concerts, technology) Organisation: * Get Ready page introduces topics * first lesson presents grammar through reading texts and practice * second lesson develops reading, presents vocabulary and practises speaking * third lesson develops the story with a focus on speaking and listening * Across Cultures lessons with reading, speaking project work * Your Challenge writing tasks and Understanding Grammar spots * the end of every module has a language check and learner development spot * Fact or Fiction texts extend students' language by deciding whether information is true or false * Time Out magazine with fun activities like puzzles, games and reading for pleasure. Triumph T120/T140 Bonneville Routledge
 Discussing some of the most vexing criticism of communicative planning theory (CPT), this book goes on to suggest how theorists and planners can respond to it. Looking at issues of power, politics and ethics in relation to planning, this book is for both critics and advocates of CPT, with lessons for all. With severe criticisms being raised against CPT, the need has arisen to systematically think through what responsibilities planning theorists might have for the end-uses of their theoretical work. Offering inventive proposals for amending the shortcomings of this widely adhered planning method, this book reflects on what communicative planning theorists and practitioners can and should do differently.

Mastering Power BI Routledge
 The spearhead of a highly successful export drive, a winning production racer and the top 'street fighter' of its day, the Triumph Bonneville retains a special place in the hearts of motorcyclists worldwide. Motorcycle expert Steve Wilson offers personal recollections from those who have tuned, raced and restored Bonnevilles; details of the Bonnie's racing

successes; buying and tuning tips; and technical specifications to deliver this detailed study of the machine and the men who helped make it a motorcycle icon.

This book is dedicated to addressing the major challenges in fighting COVID-19 using artificial intelligence (AI) and machine learning (ML) – from cost and complexity to availability and accuracy. The aim of this book is to focus on both the design and implementation of AI-based approaches in proposed COVID-19 solutions that are enabled and supported by sensor networks, cloud computing, and 5G and beyond. This book presents research that contributes to the application of ML techniques to the problem of computer communication-assisted diagnosis of COVID-19 and similar diseases. The authors present the latest theoretical developments, real-world applications, and future perspectives on

this topic. This book brings together a broad multidisciplinary community, aiming to integrate ideas, theories, models, and techniques from across different disciplines on intelligent solutions/systems, and to inform how cognitive systems in Next Generation Networks (NGN) should be designed, developed, and evaluated while exchanging and processing critical health information. Targeted readers are from varying disciplines who are interested in implementing the smart planet/environments vision via wireless/wired enabling technologies.

Detailed Design of Ship Propellers

Arcadia Publishing

System Identification is a special section of the International Federation of Automatic Control (IFAC)-Journal Automatica that contains tutorial papers regarding the basic methods and procedures utilized for system identification. Topics include modeling and identification; step response and frequency response methods; correlation methods; least squares parameter estimation; and maximum likelihood and prediction error methods. After analyzing the basic ideas concerning

the parameter estimation methods, the book elaborates on the asymptotic properties of these methods, and then investigates the application of the methods to particular model structures. The text then discusses the practical aspects of process identification, which includes the usual, general procedures for process identification; selection of input signals and sampling time; offline and on-line identification; comparison of parameter estimation methods; data filtering; model order testing; and model verification. Computer program packages are also discussed. This compilation of tutorial papers aims to introduce the newcomers and non-specialists in this field to some of the basic methods and procedures used for system identification.

Expert Choice to build Business Intelligence landscapes and dashboards for Enterprises
KEY FEATURES ● In-depth knowledge of Power BI, demonstrated through step-by-step exercises. ● Covers data modelling, visualization, and implementing security with complete hands-on training. ● Includes a project that simulates a realistic business environment from start to finish.
DESCRIPTION Mastering Power BI covers the entire Power BI implementation process. The readers will be able to understand all the concepts covered in this book, from data modelling to creating powerful - visualizations. This book begins with the concepts and terminology such as Star-Schema, dimensions and facts. It explains about multi-table dataset and demonstrates how to load these tables into Power BI. It shows how to load stored data in various formats and create relationships. Readers will also learn more about Data Analysis Expressions (DAX). This book is a must for the developers wherein they learn how to extend the

usability of Power BI, to explore meaningful and hidden data insights. Throughout the book, you keep on learning about the concepts, techniques and expert practices on loading and shaping data, visualization design and security implementation. WHAT YOU WILL LEARN ● Learn about Business Intelligence (BI) concepts and its contribution in business analytics. ● Learn to connect, load, and transform data from disparate data sources. ● Start creating and executing powerful DAX calculations. ● Design various visualizations to prepare insightful reports and dashboards. WHO THIS BOOK IS FOR This book is for anyone interested in learning how to use Power BI desktop or starting a career in Business Intelligence and Analytics. While this covers all the fundamentals, it is recommended that the reader be familiar with MS-Excel and database concepts. TABLE OF CONTENTS 1. Understanding the Basics 2. Connect and Shape 3. Optimize your datamodel 4. Data Analysis Expressions (DAX) 5. Visualizations in Power BI 6. Power BI Service 7. Securing your application
Reviving Critical Planning Theory Simon

Become a Python Programming Expert With Ease! Python is a simple yet powerful programming language that can enable you to start thinking like a programmer right from the beginning. It is very readable and the stress many beginners face about memorizing arcane syntax typically presented by other programming languages will not affect you at all. Conversely, you will be able to concentrate on learning concepts and paradigms of programming. This book shall introduce you to an easy way to learn Python in just 7 days and in this time, be able to complete your own projects! By reading the book and implementing what you learn herein, you will realize just why major institutions like NASA, Google, Mozilla, Yahoo, Dropbox, IBM, Facebook and many others prefer to use python in their core products, services and business processes. Let's begin.

ColdFusion Presents: New Thinking

Manchester University Press

The title that the authors have chosen for

this book, *The Causes and Cures of Criminality*, suggests that it may be just another book speculating on the sociological evils that need to be put right for "everything in the garden to be lovely." If this is the expectation, the reader could not be more mistaken. The recurrent theme, in fact, is a strong accent on psychological experiments. Both authors have tackled the theoretical and practical side of crime through an exhaustive literature review of past experimental work. Hans J. Eysenck has concentrated on the constitutional and biological theory of criminality, whereas Gisli Gudjonsson has concerned himself more with a review of ongoing research into therapy and possible prevention of antisocial behavior. Part I goes into considerable detail on the causes of criminality, stressing much of the strangely neglected area of individual differences in personality. Research studies point to a very heavy involvement of heredity in the causation of criminality, but the authors are careful to acknowledge that much can be done environmentally to discourage a life of crime once those persons who are at risk have been identified.

Motor Auto Repair Manual Longman

"Fairies Afield" is a children's fantasy story written by Mary Louisa Molesworth, a well-known English children's author in the late nineteenth and early twentieth century. The book, published in 1902, is part of Molesworth's wide body of work, which includes a number of novels and stories for children. The story follows two siblings, Tottie and Tittie, as they go on a fantastic journey into the world of fairies. The children discover a secret road in the woods that leads them to the world of the fairies, where they meet a variety of wonderful creatures and participate in quirky and enchanting adventures. The kids become friends with fairies, elves, and other mystical creatures as they explore this magical realm. Like children's books from the Victorian and Edwardian eras, the story is full with endearing moments and soft moral messages. The narratives of Molesworth highlight kindness, amazement, and inventiveness. "Fairies Afield" perfectly encapsulates the essence of beloved children's books with its themes of friendship, magic, and youthful innocence. For those who appreciate classic stories of magic and

adventure, the novel is still enjoyable.

Python BPB Publications

"Let the wicked be ashamed, and let them be silent in the grave." These ominous words are the last threat that Sir Edward Grey receives from his killer. Before he can show them to Nicholas Brisbane, the private inquiry agent he has retained for his protection, he collapses and dies at his

London home, in the presence of his wife, Julia, and a roomful of dinner guests.

Prepared to accept that Edward's death was due to a long-standing physical infirmity, Julia is outraged when Brisbane visits and suggests that her husband was murdered. It is a reaction she comes to regret when she discovers damning evidence for herself, and realizes the

truth. Determined to bring the murderer to justice, Julia engages the enigmatic Brisbane to help her investigate Edward's demise. Dismissing his warnings that the investigation will be difficult, if not impossible, Julia presses forward, following a trail of clues that lead her to even more unpleasant truths, and ever closer to a killer who waits expectantly for her arrival.
