The Complete Story
Veloce Publishing Ltd
This book tells the complete BMW 5 series story, in the pre Bangle classic era, covering e12, e28, e34 and e39 models, the enthusiast cars that invented the modern sports sedan and created BMW's ultimate driving machine image. Follow the evolution of BMW's middle child through the decades in all major markets. Marvel at the mystique of BMW's motorsport and exotic tuner cars reaching the 180mph milestone on V8 power. Consider BMW's phoenix-like rise from the ashes of WWII, regaining its sports, luxury reputation, and powering on to become the ultimate business machine under chairman Eberhard von Kuenheim. This new edition features 150 new pictures, new specification tables, updated text, a new "Meet the Tuners" section, and a new "easy use" index. The book also contains a foreword by Allen Hardy (America's first BMW tuner), and a contribution from Kevin Bird of Birds, the UK's first BMW Hartge tuning agent.

Restoration Tips and Techniques Brooklands Books

An exclusive look at one of the world's most successful and controversial companies, and the mysterious family behind it. BMW is arguably the most admired carmaker in the world. It's financial performance is the envy

of its competitors, and BMW products inspire near-fanatical loyalty. While many carmakers struggle with falling sales, profits and market share, demand for BMWs continues to grow, frequently outpacing production. Now, David Kiley-Detroit Bureau Chief at USA Today and author of *Getting the Bugs Out*, which covered Volkswagen's demise and rebirth, goes inside the fabled German automaker to see how it does what it does so well. With unprecedented access to BMW executives, Kiley goes behind the walls of BMW's famed "Four Cylinders" headquarters in Munich at a time when the company is in its most aggressive, and some say riskiest, expansion in its history and when some of the company's new products, like the 7 Series sedan and Z4 roadster, are for the first time drawing as many barbs from critics as bouquets. Kiley covers intimate details of the boardroom drama surrounding the company's nearly disastrous acquisition and subsequent sale of the British Rover Group and its expansion into selling MINI and Rolls Royce cars. Besides being a world-class carmaker, BMW is

also considered one of the smartest consumer marketing companies and Kiley explores the extraordinary value and management of the BMW brand mystique. He also takes a revealing look at the mysterious and ultra-private Quandt family of Bad Homburg Germany, which owns a controlling stake in BMW: Johanna and Susanne Quandt, two of the wealthiest women in Europe and Stefan Quandt, one of the wealthiest bachelors on the continent. David Kiley (Ann Arbor, MI) is the Detroit Bureau Chief at USA Today who has covered the auto industry for 17 years. He has been featured on Nightline, CNBC, CNN, MSNBC, NPR and the Today show. He is also the author of *Getting the Bugs Out: The Rise, Fall, and Comeback of Volkswagen in America* (0-471-26304-4), also available from Wiley. [BMW Buyer's Guide](#) Veloce Publishing

Relive the first one hundred years of Germany's best two- and four-wheeled rides. Established in 1916, BMW is one of the auto and motorcycle industry's oldest and most-respected car and motorcycle manufacturers. Over the past century, the company went through myriad developments. The BMW Century chronicles this remarkable transportation company through images of the cars and motorcycles it manufactured, from the 1923 R32 motorcycle to sleek electric cars of today. This handsome volume is filled with images, history, and in-depth looks at the incredible machines BMW created year after year. The BMW Century showcases how the

company's new visionary team systematically rebuilt BMW in the post-World War II years into the spectacular success we know today - that is, a company with sales projected to be upwards of two million cars annually by 2016, led by its 3-series, the best-selling luxury-performance car in the world. BMW's motorcycle division is no less legendary. It began with the 1923 avant-garde R32, which featured a 180-degree, horizontally opposed twin, the engine configuration that would become BMW's hallmark. Along the way, BMW would use that configuration to power groundbreaking machines like the R90S, R100RS, and R80GS. Beginning in 1983, they would add three- and four-cylinder machines to their offerings, culminating in today's spectacular S1000RR sport bike. From the pre-war motorcycles to the iconic R-series twins of the 1970s and 80s to the mighty M-series cars and superbikes of today, The BMW Century offers a full review of German engineering at its finest. The book is illustrated with hundreds of historic, contemporary, and racing

photographs - many sourced from BMW's archives - and detailed text relating the BMW's full history. This is the one volume no BMW aficionado can be without. *Automotive Designers 1890 to 1990* Motorbooks International

BMW's M5 was a simple concept: a production 5 Series saloon re-developed for high performance by the Motorsport division. The M5 was the car that really initiated the legend of the M-cars from BMW; the letter M had been applied to a high-performance BMW as early as 1978,

but that year's M1 was an exotic supercar. It had the right image, but the M1 was never going to bring in major profits. The M5 was much simpler in concept. It was and remains a production 5 Series saloon, redeveloped for ultra-high performance.

Manufacturing costs were minimized, allowing BMW to price the car more attractively and still bring in healthy profits. This new book charts the development of the M5 across five generations. For all fans of the BMW M5, this book provides essential background, and is packed with the facts and details that make the M5 legend come alive. The M5 is still in production and remains the benchmark high-performance saloon wherever it is sold. This is essential background reading for all BMW M5 fans and motoring enthusiasts and is superbly illustrated with 211 colour photographs.

BMW 5 Series McFarland Ercole Spada is an Italian car designer. He is perhaps most notable for designs made during the 1960s for the Zagato design studio - he designed sports cars for Aston Martin, Ferrari, Maserati, and Fiat among many others. When Spada started his career he was absolutely unknown to car enthusiasts or to the industry as a whole.

Nevertheless, the young designer was instantly tasked with conceptualising cars for famous companies like Aston Martin, Alfa Romeo, and Lancia. Ever since then, companies with a 'sporty' identity have relied upon his creations, the main reason for this being that he knows how to combine aerodynamics, functional efficiency and

aesthetics in one complete package. This book tells his story.
