Over the last two decades, functional heads have been one of the privileged objects of research in generative linguistics. However, within this line of inquiry, two alternative approaches have

developed: while the cartographic project considers crosslinguistic evidence as crucial for a complete mapping of functional heads in universal grammar, minimalist accounts tend to consider structural economy as literally involving a reduction in the number of available heads. In this volume, some of the most influential linguists who have participated in this long-lasting debate offer their recent work in short, self-contained case studies. The contributions cover all the

main layers of recently studied syntactic structure, including such major areas of empirical research as grammaticalization and language change, standard and non-standard varieties, interface issues, and morphosyntax. Functional Heads attempts to map aspects of syntactic structure according to the cartographic approach, and in doing so demonstrates that the differences between cartography and minimalism are perhaps more superficial than substantial.

Select Comedies BRILL
 Renowned for his work within the fields of Numismatics, Archaeology, Egyptology and Coptic studies, Georg Zoëga was a figure of outstanding importance both in Rome and in Europe, at the end of the

eighteenth century. Although highly valued by his contemporaries, Zoëga's scientific legacy fell almost entirely into oblivion with the end of the Enlightenment. The *Forgotten Scholar: Georg Zoëga (1755-1819): At the Dawn of Egyptology and Coptic Studies* represents an exceptional occasion to rediscover the largely unknown scientific legacy of this Danish scholar consisting of hundreds of letters, drawings, sketches, notes, and other documents, mainly preserved in the Royal Library and in the Thorvaldsen Museum of Copenhagen.

Select Comedies ... with explanatory Italian notes, by J. Millhouse. (The School for Scandal. The Rivals.) Second Milan edition Feltrinelli Editore

This volume assembles 50 contributions presented at the XVII International Colloquium on Latin Linguistics. They embrace essential topics of Latin linguistics with different theoretical and methodological approaches: phonetics, syntax, etymology and semantics, pragmatics and textual analysis. It is a useful resource for the study of comparative and general linguistics, not only for linguists but also for scholars of classical philology.

This volume addresses the teaching and learning of vocabulary in Italian L2 from different points of view, defining an updated and heterogeneous framework. The articles focus on wide-ranging topics:

advances in acquisitional linguistics research, studies on interlanguage, results of psycholinguistic research, the role of teaching technologies, the use of multimedia lexicographic tools, new attention to languages for specific purposes, analysis of interactions on social networks. Each of these topics is treated specifically referring to the lexical dimension and to the possible applicative effects on the teaching of Italian L2. Il volume affronta da diversi punti di vista il tema della didattica del lessico in italiano L2, definendone un quadro aggiornato ed eterogeneo. I contributi sono incentrati su argomenti di ampio respiro: l'avanzamento delle ricerche di linguistica acquisizionale, gli studi sull'interlingua, i risultati della ricerca psicolinguistica, il ruolo delle tecnologie educative, l'uso di strumenti lessicografici multimediali, la nuova attenzione alle lingue specialistiche, l'analisi dei processi comunicativi sui social. Ciascuno di questi temi è trattato con specifico riferimento alla dimensione lessicale e alle possibili ricadute applicative per la didattica dell'Italiano L2. *Rivista di grammatica generativa* Armando Editore
