LEONIDAS TIMOTHY

The Blood Star Donzelli Editore

World War II stories on Italian women in the Resistance as heroines and traitors, and the way they exploited their femininity. In *Red Flag*, a woman hides guns by covering them with a soiled sanitary napkin.

The Birth of the Clinic Berghahn Books

Risky behavior can be an expression of a normal, genetically influenced personality trait--sensation seeking. In this fascinating and accessible book, the author offers a comprehensive view of the role of sensation seeking in a wide range of behaviors, from

risky driving sports through substance use, sex, crime, or other antisocial behaviors.

English Medium Instruction Da Capo Press

While thousands of books on baking are in print aimed at food service operators, culinary art instruction, and consumers, relatively few professional publications exist that cover the science and technology of baking. In *Bakery Products: Science and Technology*, nearly 50 professionals from industry, government, and academia contribute their perspectives on the state of baking today. The latest scientific developments, technological processes, and engineering principles are described as they relate to the essentials of baking. Coverage is extensive and includes: raw materials and ingredients, from wheat flours to sweeteners, yeast, and functional additives; the principles of

baking, such as mixing processes, doughmaking, fermentation, and sensory evaluation; manufacturing considerations for bread and other bakery products, including quality control and enzymes; special bakery products, ranging from manufacture of cakes, cookies, muffins, bagels, and pretzels to dietetic bakery products, gluten-free cereal-based products; and specialty bakery items from around the world, including Italian bakery foods. Blending the technical aspects of baking with the freshest scientific research, Bakery Products: Science and Technology has all the finest ingredients to serve the most demanding appetites of food science professionals, researchers, and students.

Biodiversity Change and Human Health Rizzoli Publications
A provocative exploration of intellectual exchange across four centuries of European history by the author of *When the World Spoke French* In this fascinating study, preeminent historian Marc Fumaroli reveals how an imagined "republic" of ideas and interchange fostered the Italian Renaissance, the Enlightenment, and the French Revolution. He follows exchanges among Petrarch, Erasmus, Descartes, Montaigne, and others from the fifteenth through the eighteenth centuries, through revolutions in culture and society. Via revealing portraits and analysis, Fumaroli traces intellectual currents engaged with the core question of how to live a moral life--and argues that these men of letters provide an example of the exchange of knowledge and ideas that is worthy of emulation in our own time. Combining scholarship, wit, and reverence, this thought-provoking volume represents the culmination of a lifetime of scholarship.

Partisan Wedding Springer Science & Business Media
Currently 868 million people are undernourished and 195 million

children under five years of age are stunted. At the same time, over 1 billion people are overweight and obese in both the developed and developing world. Diseases previously associated with affluence, such as cancer, diabetes and cardio-vascular disease, are on the rise. Food system-based approaches to addressing these problems that could enhance food availability and diet quality through local production and agricultural biodiversity often fall outside the traditional scope of nutrition, and have been under-researched. As a consequence, there remains insufficient evidence to support well-defined, scalable agricultural biodiversity interventions that can be linked to improvements in nutrition outcomes. Agricultural biodiversity is important for food and nutritional security, as a safeguard against hunger, a source of nutrients for improved dietary diversity and quality, and strengthening local food systems and environmental sustainability. This book explores the current state of knowledge on the role of agricultural biodiversity in improving diets, nutrition and food security. Using examples and case studies from around the globe, the book explores current strategies for improving nutrition and diets and identifies key research and implementation gaps that need to be addressed to successfully promote the better use of agricultural biodiversity for rural and urban populations and societies in transition.

Studi sul lavoro A&C Black

There are no more respected voices in the environmental movement than these authors, true counselors on the direction of twenty-first-century business. With hundreds of thousands of books sold worldwide, they have set the agenda for rational, ecologically sound industrial development. In this inspiring book

they define a superior & sustainable form of capitalism based on a system that radically raises the productivity of nature's dwindling resources. Natural Capitalism shows how cutting-edge businesses are increasing their earnings, boosting growth, reducing costs, enhancing competitiveness, & restoring the earth by harnessing a new design mentality. The authors offer dozens of examples of businesses that are making fourfold or even tenfold gains in efficiency, from self-heating & self-cooling buildings to 200-miles-per-gallon cars, while ensuring that workers aren't downsized out of their jobs. This practical blueprint shows how making resources more productive will create the next industrial revolution

Women Migrants From East to West Associazione italiana editori
This book is about the history of food in Europe and the part it has played in the evolution of the European cultures over two millennia. It has been a driving force in national and imperial ambition, the manner of its production and consumption a means by which the identity and status of regions, classes and individuals have been and still are expressed. In this wide-ranging exploration of its history the author weaves deftly between the classes, regions and nations of Europe, between the habits of late antiquity and the problems of modernity. He examines the interlinked evolutions of consumption, production and taste, to show both what these reveal of the varied cultures and peoples of Europe in the past and what they suggest about the present.

Mozart's Opera Il Flauto Magico State University of New York Press

Ernesto Macaro brings together a wealth of research on the

rapidly expanding phenomenon of English Medium Instruction. Against a backdrop of theory, policy documents, and examples of practice, he weaves together research in both secondary and tertiary education, with a particular focus on the key stakeholders involved in EMI: the teachers and the students. Whilst acknowledging that the momentum of EMI is unlikely to be diminished, and identifying its potential benefits, the author raises questions about the ways it has been introduced and developed, and explores how we can arrive at a true cost-benefit analysis of its future impact. "This state-of-the-art monograph presents a wide-ranging, multi-perspectival yet coherent overview of research, policy, and practice of English Medium Instruction around the globe. It gives a thorough, in-depth, and thought-provoking treatment of an educational phenomenon that is spreading on an unprecedented scale." Guangwei Hu, National Institute of Education, Singapore
Additional online resources are available at www.oup.com/elt/teacher/emi
Ernesto Macaro is Professor of Applied Linguistics at the University of Oxford and is the founding Director of the Centre for Research and Development on English Medium Instruction at the university.

Sensation Seeking and Risky Behavior Harvard Business Press

Negli ultimi anni è iniziata una nuova epoca spesso definita come Epoca della Complessità., segnata e condizionata da numerose discontinuità sociali, economiche, ambientali, tecnologiche e geopolitiche. Questi fenomeni, oltre a condizionare le strategie di sviluppo delle imprese, hanno contribuito a modificare i paradigmi tradizionali delle politiche di marketing e di retailing. In

particolare, le aziende si sono dovute confrontare con nuovi modelli di consumo e di shopping, con nuovi canali di vendita, con nuovi assetti competitivi, con nuove strutture organizzative, con una nuova configurazione del «potere» di marketing tra produttori e distributori. Il libro analizza gli scenari commerciali e l'impatto che tali scenari stanno avendo sulle strategie sia di retailing delle insegne commerciali sia di trade marketing delle marche industriali. Fra questi scenari quelli più significativi riguardano: la nuova gerarchia tra brand loyalty e store loyalty, il ruolo centrale del punto di vendita come media di comunicazione, lo sviluppo delle politiche di shopper marketing, la crescente rilevanza degli investimenti di trade marketing rispetto agli investimenti di consumer marketing, il riposizionamento competitivo e la crescente concentrazione dei Gruppi distributivi e la concorrenza e l'integrazione tra i canali di vendita fisici (offline) e canali di vendita digitali (online).

Rapporto sullo stato dell'editoria in Italia, 2007 Island Press

Piero Camporesi is one of the most original and exciting cultural historians in Europe today. In this remarkable book he examines the imaginative world of poor and ordinary people in pre-industrial Europe, exploring their everyday preoccupations, fears and fantasies. Camporesi develops the startling claim that many people in early modern Europe lived in a state of almost

permanent hallucination, drugged by their hunger or by bread adulterated with hallucinogenic herbs. The use of opiate products, administered even to children and infants, was widespread and was linked to a popular mythology in which herbalists and exorcists were important cultural figures. Through a careful reconstruction of the everyday imaginative life of peasants, beggars and the poor, Camporesi presents a vivid and disconcerting image of early modern Europe as a vast laboratory of dreams. Bread of Dreams is a rich and engaging book which provides a fresh insight into the everyday life and attitudes of people in pre-industrial Europe. Camporesi's vision is breathtaking and his work will be much discussed among social and cultural historians. This edition includes a Preface by Roy Porter, Professor of the History of Medicine at the Wellcome Institute for the History of Medicine.

Diversifying Food and Diets OECD Publishing

Biodiversity Change and Human Health brings together leading experts from the natural science and social science realms as well as the medical community to explore the explicit linkages between human-driven alterations of biodiversity and documented impacts of those changes on human health. The book utilizes multidisciplinary approaches to explore and address the complex interplay between natural biodiversity and human health and well-being. The five parts examine health trade-offs between competing uses of biodiversity (highlighting synergistic situations in which conservation of natural biodiversity actually promotes human health and well-being); relationships between biodiversity and quality of life that have developed over ecological and evolutionary time; the effects of changing

biodiversity on provisioning of ecosystem services, and how they have affected human health; the role of biodiversity in the spread of infectious disease; native biodiversity as a resource for traditional and modern medicine Biodiversity Change and Human Health synthesizes our current understanding and identifies major gaps in knowledge as it places all aspects of biodiversity and health interactions within a common framework. Contributors explore potential points of crossover among disciplines (both in ways of thinking and of specific methodologies) that could ultimately expand opportunities for humans to both live sustainably and enjoy a desirable quality of life.

Musei e gallerie d'Italia University of Missouri Press

Employing the considerable archaeological and historical skills in her armory, Susan Piddock tries to lift the lid on the lunatic asylums of years gone by. Films and television programs have portrayed them as places of horror where the patients are restrained and left to listen to the cries of their fellow inmates in despair. But what was the world of nineteenth century lunatic asylums really like? Are these images true, or are we laboring under a misunderstanding?

Industria italiana delle conserve alimentari Scribner

An impassioned and hopeful manifesto on the need for equitable, sustainable, and delicious food, with systematic solutions for

addressing the national food crisis "Petrini builds a case against fast food and offers ways to bring back the balance between nature and our table."—Bon Appetit By now most of us are aware of the threats looming in the food world. The best-selling Fast Food Nation and other recent books have alerted us to such dangers as genetically modified organisms, food-borne diseases, and industrial farming. Now it is time for answers, and Slow Food Nation steps up to the challenge. Here the charismatic leader of the Slow Food movement, Carlo Petrini, outlines many different routes by which we may take back control of our food. The three central principles of the Slow Food plan are these: food must be sustainably produced in ways that are sensitive to the environment, those who produce the food must be fairly treated, and the food must be healthful and delicious. In his travels around the world as ambassador for Slow Food, Petrini has witnessed firsthand the many ways that native peoples are feeding themselves without making use of the harmful methods of the industrial complex. He relates the wisdom to be gleaned from local cultures in such varied places as Mongolia, Chiapas, Sri Lanka, and Puglia. Amidst our crisis, it is critical that Americans look for insight from other cultures around the world and begin to build a new and better way of eating in our communities here.

Parliamo Italiano Workbook and Lab Manual Princeton University Press

Based on the oral histories of eighty migrant women and thirty additional interviews with 'native' women in the 'receiving' countries, this volume documents the contemporary phenomenon of the feminisation of migration through an exploration of the lives of women, who have moved from Bulgaria

and Hungary to Italy and the Netherlands. It assumes migrants to be active subjects, creating possibilities and taking decisions in their own lives, as well as being subject to legal and political regulation, and the book analyses the new forms of subjectivity that come about through mobility. Part I is a largely conceptual exploration of subjectivity, mobility and gender in Europe. The chapters in Part II focus on love, work, home, communication, and food, themes which emerged from the migrant women's accounts. In Part III, based on the interviews with 'native' women – employers, friends, or in associations relevant to migrant women – the chapters analyse their representations of migrants, and the book goes on to explore forms of intersubjectivity between European women of different cultural origins. A major contribution of this book is to consider how the movement of people across Europe is changing the cultural and social landscape with implications for how we think about what Europe means. The Republic of Letters John Wiley & Sons

From the famous, funny, and irreverent wine author, a personal journey into the new and old world of natural wine"

Tradition in Evolution. The Art and Science in Pastry Little, Brown

"Like the great German critic Walter Benjamin, Rosenberg is a master of dialectics whose sense of art is continuous with his sense of society, and (also like Benjamin) bears no taint of

compromised, out-of-work radicalism. Instead, his radicalism is very much at work, enabling him to spot and skewer fallacies, false logic and the camouflaged nudity that is a large part of the art emperor's new wardrobe. [The De-definition of Art] detects with great sensitivity the forces that are deflecting and pressuring art in the direction of esthetic and moral nullity."—Jack Kroll, Newsweek

The Secrets of Montalbano's Table John Wiley & Sons
Stepping out of her beloved trunk full of bread crumbs, dust, spider webs, books, and ragged funeral ornaments, the young protagonist of Paola Masino's most controversial novel realizes that her fate is already sealed. She will have to conform to society's expectations of a woman: her wild imagination will have to be controlled, her intelligence kept at bay. In short, she will have to become a Housewife. Subject to Fascist censorship before its first publication in 1945, *Birth and Death of the Housewife* offers a surrealist criticism of Fascism and the rigid notion of womanhood it promoted. In her depiction of a woman's struggle to play a role that simply does not correspond to her desires, Masino expresses a frustration and a rebellious instinct rarely found among her contemporaries. Defying interpretations and standing alone among the heroines of twentieth-century Italian literature, Masino's *Housewife* remains an uncomfortable, enigmatic figure whose impudent determination to challenge the bulwarks of traditional female roles reaches beyond historical boundaries and resonates powerfully with contemporary readers.
