 This report will be of interest to managers of public transportation
 and school bus systems, transportation planning and operations
 professionals, policy makers, and others interested in the
 potential for coordinating or integrating school bus and public
 transportation services in non-urban areas. The report identifies

and discusses issues associated with such coordination or
 integration, and provides 13 case studies of communities that
 have successfully coordinated or integrated some aspect of
 school and public transportation services. The report also
 provides an implementation guide that suggests "next steps" for
 non-urban communities seeking to give serious consideration to
 the coordination or integration of school and public transportation
 services.

I've been following advances in Electric Cars for nearly 50 years and advances in Hybrids for 15. I started following Electric Cars while writing a paper in History Class in 7th grade on current events. I started following Hybrids when the Honda Insight was released in 1999. I also started following Fuel Cell Cars about that same time. The Xybrid expands on Hybrid technologies, discussing new, potential, and conceptual technologies. If you're interested in cars, and especially if you're interested in Hybrids and Electric Cars, then this book is for you, whether you understand how cars work or not. Rating G; Reading Level Medium 8th Grade; Longest Word: Experimentation
