Historiography* Wiley-  
Blackwell

It is often said that  
criminal procedure should

ensure that the defendant  
is a subject, not just an  
object, of proceedings.  
This book asks to what  
extent this can be said to  
be true of international  
criminal trials. The first  
part of the book aims to  
find out the extent to  
which defendants before  
international criminal

courts are able to take an  
active part in their trials.  
It takes an in-depth look  
at the procedural regimes  
of international courts,  
viewed against a  
benchmark provided by  
national provisions  
representing the main  
traditions of criminal  
procedure and by

international human rights law. The results of this comparative endeavour are then used to shed light, from a practical point of view, on the oft-debated question whether (international) criminal trials should be used as a tool for writing history or whether, as claimed by Martti Koskenniemi, pursuing this goal leads to a danger of “show trials”.  
Body and Meaning in Poetry Routledge  
 The Common European Framework of Reference for Languages (CEFR) and

its Companion Volume have established themselves as an indispensable reference point for all aspects of second and foreign language education. This book discusses the impact of the CEFR on curricula, teaching/learning and assessment in a wide range of educational contexts, identifies challenges posed by the Companion Volume and sheds light on areas that require further research and development. Particular attention is paid to three features of the

two documents: their action-oriented approach, their focus on plurilingualism, and the potential of their scales and descriptors to support the alignment of curricula, teaching/learning and assessment. The book suggests a way forward for future engagement with the CEFR, taking account of new developments in applied linguistics and related disciplines.

 The present volume, which is the 5th in the

Nigerian Linguists Festschrift Series, is devoted to Professor Munzali A. Jibril, a celebrated icon in university administration, and an erudite Professor of English Linguistics. The title of this special edition was specifically chosen to crown Professor Jibril's academic prowess in both English and indigenous Nigerian languages, and to mark and laud his official departure from active university lectureship. 72 assessed papers are included from the many submitted.

Papers cover the main theme of the volume, i.e. the interaction between English and indigenous Nigerian languages, and there are a number of papers on other secular areas of linguistics such as: language and history, language planning and policy, language documentation, language engineering, lexicography, translation, gender studies, language acquisition, language teaching and learning, pragmatics, discourse and conversational analysis, and literature in English

and African languages. There is also a rich section devoted to the major 'traditional' fields of linguistics - phonology, morphology, syntax and semantics.

A System Sui Generis AK Press

Focuses almost wholly on living speech, with poetry the only form of written language included.

The Spirit of Love; A Short Confutation of Dr.

Warburton's Defence; Of Justification by Faith and Works, Volume 8

Routledge

'A splendid work of art, In

Defence of the Ordinary returns drama, pleasure and awakening to everyday life ... in the tradition of cultural critics like Ashis Nandy and Umberto Eco... The book is one of a kind.' - Prathama Banerjee is a noted historian of the global south and Professor at Centre for the Study of Developing Societies (CSDS), New Delhi. '[A] flâneur of our everyday spheres of life, [the author] excavates the multiple layers of social, political and artistic thinking and

experimentation ... with an unparalleled lightness of prose worthy of a Balthasar Gracián and Georg Lichtenberg.' - Ramin Jahanbegloo is a philosopher and Vice Dean and Director at Mahatma Gandhi Centre for Peace Studies, O.P. Jindal Global University, India. '[The] book builds an engaging web of thoughts about things which are ordinary but in their very ordinariness hide deep social truths... Dev Nath Pathak brings a lightness to his critical eye while reminding us of

how much of the ordinary has been forgotten in academic pursuits.' - Sundar Sarukkai is a renowned philosopher and thinker in contemporary India. In Defence of the Ordinary is laced with light humour, soaked in serious sarcasm and powered with poetic polemics. Informed by sources such as psychoanalysis, philosophy, yoga, anthropology, popular cinema, folk songs and everything that is part of an ordinary living, it is a sociologist's sincere

ruminations on the layered ordinariness. The book invites us to rethink the ways of seeing, understanding, enacting, emoting and relating with provocative ideas like why we don't value ordinariness and how our pursuit of extraordinary is misleading us into mishaps. The key objective of the human existence is that of the book too, namely, awakening the dormant potentials of emancipation every day rather than waiting for an occasional charisma

induced by a holy book or a secular gimmick or an orchestrated leadership. The EU Overseas Countries and Territories Springer  
With the loss of many of the world's languages, it is important to question what will be lost to humanity with their demise. It is frequently argued that a language engenders a 'worldview', but what do we mean by this term? Attributed to German politician and philologist Wilhelm von Humboldt (1767-1835), the term has since been

adopted by numerous linguists. Within specialist circles it has become associated with what is known as the Sapir-Whorf hypothesis which suggests that the nature of a language influences the thought of its speakers and that different language patterns yield different patterns of thought. Underhill's concise and rigorously researched book clarifies the main ideas and proposals of Humboldt's linguistic philosophy and demonstrates the way his

ideas can be adopted and adapted by thinkers and linguists today. A detailed glossary of terms is provided in order to clarify key concepts and to translate the German terms used by Humboldt. *In Defence of the Ordinary* Multilingual Matters Provides a postmodern theory of poetry that sees rhythm as its essential quality  
Discovering Sociolinguistics Macmillan International Higher Education  
 Arguing that it is possible to increase both the role

of Parliament in defence decision-making and government control of defence resource planning, this book focuses in detail on the management of Britain's defence by Francis Pym, John Nott and Michael Heseltine.  
A Handbook of Public Speaking for Scientists and Engineers M & J Grand Orbit Communications  
 As globalisation continues languages are disappearing faster than ever, leaving our planet's linguistic diversity leaping

towards extinction. The science of how languages are acquired is becoming more advanced and the internet is bringing us new ways of teaching the next generation, however it is increasingly challenging for minority languages to survive in the face of a handful of hegemonic 'super-tongues'. In *Speak Not*, James Griffiths reports from the frontlines of the battle to preserve minority languages, from his native Wales, Hawaii and indigenous American nations, to southern China

and Hong Kong. He explores the revival of the Welsh language as a blueprint for how to ensure new generations are not robbed of their linguistic heritage, outlines how loss of indigenous languages is the direct result of colonialism and globalisation and examines how technology is both hindering and aiding the fight to prevent linguistic extinction. Introducing readers to compelling characters and examining how indigenous communities

are fighting for their languages, Griffiths ultimately explores how languages hang on, what happens when they don't, and how indigenous tongues can be preserved and brought back from the brink.

**Innovative Strategies for Heritage Language Teaching**

Edinburgh University Press

This accessible textbook offers students the opportunity to explore for themselves a wide range of sociolinguistic issues relating to the Spanish language and its role in

societies around the world. It is written for undergraduate students who have a sound practical knowledge of Spanish but who have little or no knowledge of linguistics or sociolinguistics. It combines text with practical exercises and discussion questions to stimulate readers to think for themselves and to tackle specific problems. In Part One Clare Mar-Molinero discusses the position of Spanish as a world language, giving an historical account of its

development and dominance. Part Two examines social and regional variation in Spanish, and investigates dialects, language attitudes, and style and register, particularly in the media. The author also questions the relationship between gender and language. Part Three focuses on current issues, particularly those arising from language policies and legislation, especially in the education system, in Spain, Latin America and the USA.

This book aims to find out whether French, one of the great languages of the world, is in crisis or not. It traces the history and development of language defence in France and examines the sometimes contradictory attitudes of French people to their

beloved language. It assesses the necessity for and the usefulness of the many activities in defence of French and suggests what its future might be.  
**Multilingualism in the English-Speaking World** Routledge  
George Orwell set out 'to make political writing into an art', and to a wide extent this aim shaped the future of English literature - his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to

understanding totalitarianism. While 1984 and Animal Farm are amongst the most popular classic novels in the English language, this new series of Orwell's essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In Politics and the English Language, the second in the Orwell's Essays series, Orwell takes aim at the language used in politics, which, he says, 'is designed to make lies sound truthful and murder respectable, and

to give an appearance of solidity to pure wind'. In an age where the language used in politics is constantly under the microscope, Orwell's Politics and the English Language is just as relevant today, and gives the reader a vital understanding of the tactics at play. 'A writer who can - and must - be rediscovered with every age.' — Irish Times  
**In Defence of the Letter Double-U** Wipf and Stock Publishers  
 With the acceptance of international criminal

procedure as a self-sustaining discipline and as the tribunals established to try the most serious crimes in the former Yugoslavia, Sierra Leone, and Rwanda have completed or are beginning to wind up their activities, the time is ripe for a critical evaluation of these international criminal tribunals and their legacy. By examining the due process standards embraced by the five contemporary international criminal tribunals, the author

draws conclusions about how the right to a fair trial should be interpreted in international criminal law. This volume addresses key conceptual questions on fairness, including: should international criminal tribunals set the highest standards of fairness, or is it sufficient for their practice to be 'just fair enough'? To whom does the right to a fair trial attach, and can actors such as the prosecution and victims be accurately said to benefit from that right? Does fairness require the

full realization of a number of guarantees owed to the accused under the statutory frameworks of international criminal tribunals, or should we instead be concerned with the fairness of the trial 'as a whole'? What is the interplay between domestic and international courts on questions of procedural fairness? What are the elements of fairness in international criminal proceedings? And what remedies are available for breaches of fair trial

rights? Through an in-depth exploration of the right to a fair trial, the author concludes that international criminal tribunals should have a role in setting the highest standards of due process protection in their procedures, and that in so doing, they can have a positive impact on domestic justice systems.

**Underground Passages**  
Bloomsbury Publishing  
Discovering  
Sociolinguistics introduces readers to the field of Sociolinguistics and hands them the tools to start

their own sociolinguistic research project. The first two parts of the book present this broad field and the second two parts lay out the practicalities and steps needed to do actual sociolinguistic investigations. The book is introductory in nature and covers the common core of topics and theories in the field. It give much attention to cultural variation and examples from across the world.  
*Theory and Practical Applications* New York : Random House  
 A lively challenge to

postmodern opinion that reveals satisfying and reliable certainties.  
*The Defendant in International Criminal Proceedings* John Lovell  
 This book examines how sovereignty works in the context of European integration and postcolonialism. Focusing on a group of micro-polities associated with the European Union, it offers a new understanding of international relations in the context of modern sovereignty. This book offers a systematic and

comparative analysis of the Overseas Countries and Territories (OCTs), the EU and the four affected Member States: UK, France, the Netherlands and Denmark.  
 Contributors explore how states and state-like entities play 'sovereignty games' to understand how a group of postcolonial entities may strategically use their ambiguous status in relation to sovereignty. The book examines why former colonies are seeking greater room to manoeuvre on their own,

whilst simultaneously developing a close relationship to the supranational EU. Methodologically sophisticated, this interdisciplinary volume combines interviews, participant observation, textual, legal and institutional analysis for a new theoretical approach to understanding the strategic possibilities and subjectivity of non-sovereign entities in international politics. Bringing together research on European integration and

postcolonial theory, European Integration and Postcolonial Sovereignty Games will be of interest to students and scholars of International Relations, EU studies, Postcolonial studies, International Law and Political Theory. The Defence of French John Benjamins Publishing The testing and assessment of second language learners is an essential part of the language learning process. Glenn Fulcher's Testing Second Language Speaking is a state-of-the-art volume that considers

the assessment of speaking from historical, theoretical and practical perspectives. The book offers the first systematic, comprehensive and up-to-date treatment of the testing of second language speaking. Written in a clear and accessible manner, it covers: Explanations of the process of test design Costing test design projects How to put the test into practice Evaluation of speaking tests Task types for testing speaking Testing learners with disabilities It

also contains a wealth of examples, including task types that are commonly used in speaking tests, approaches to researching speaking tests and specific methodologies that teachers, students and test developers may use in their own projects. Successfully integrating practice and theory, this book demystifies the process of testing speaking and provides a thorough treatment of the key ethical and technical issues in speaking evaluation.

With Annotations, Commentaries, Precedents of Indictments, &c Routledge

What is 'Hispanic Studies'? This companion gives a concise and accessible overview of the discipline as taught today

and suggests new directions for future developments. 'Hispanic Studies' is broadly concerned with the languages and cultures of the vast 'Hispanic' world, extending chronologically from Roman Hispania to today, and geographically from Roman Hispania to today, and geographically from California in the North to Patagonia in the South, and from Majorca in the East to the Andes in the West. This essential book provides all the necessary introductory information on the subject

and will be especially useful for students who have already started courses in Spanish / Hispanic Studies, or who are considering doing so in the future. Written by a team of leading scholars each with established teaching experience this

collection of short essays explores topics as diverse as the history of the Spanish language, Islamic Andalusia, race and class in the Spanish Golden Age, Catalan nationalism, the Madrid 'movida', Latin America cinema, tango in Argentina, Evita Per n, 'testimonio' and the

cultural significance of the US-Mexican border. The emphasis is on literature and texts, including film and photography. In addition, the book includes time-lines, summary boxes and suggestions for further reading.
