Routledge

McFarlane, Hopkins, and Nield's Land Law is the most succinct, analytical textbook available in this subject area. These experienced and respected authors have used their unique approach to land law to provide a consistent structure with which students and lecturers can tackle the topics. The approach arms students with the tools needed to analyse content covered in classes and exams autonomously by demonstrating how to consider rules in isolation before looking at the full picture. This method helps students make links across topics. The concise treatment allows students to concentrate on building an in-depth, sophisticated grasp of the core principles. The authors' direct writing style and contextual outlook guides readers through

the depth and detail and gives lucidity to abstract rules. The use of significant cases to exemplify rules in practice and diagrams for visual learners gives additional clarity to concepts that are particularly difficult to imagine. Students are encouraged to test their knowledge by answering end-of-chapter questions and to widen their research by referring to the resources suggested in the further reading lists accompanying each chapter.  "A masterly book" —Nassim Nicholas Taleb, author of *The Black Swan* "A classic" —Simon Kuper, *Financial Times* An economist explains five laws that confirm our worst fears: stupid people can and do rule the world Throughout history, a powerful force has hindered the growth of human welfare and happiness. It is more powerful than the Mafia or the military. It

has global catastrophic effects and can be found anywhere from the world's most powerful boardrooms to your local bar. It is human stupidity. Carlo M. Cipolla, noted professor of economic history at the UC Berkeley, created this vitally important book in order to detect and neutralize its threat. Both hilarious and dead serious, it will leave you better equipped to confront political realities, unreasonable colleagues, or your next dinner with your in-laws. The Laws: 1. Everyone underestimates the number of stupid individuals among us. 2. The probability that a certain person is stupid is independent of any other characteristic of that person. 3. A stupid person is a person who causes losses to another person while deriving no gain and even possibly incurring losses themselves. 4. Non-stupid people always underestimate the damaging power of stupid individuals. 5. A stupid person is the most dangerous type of person.

 The Boundaries of Australian Property Law offers a unique perspective on real property law in Australia. As the

overwhelming majority of land interests in Australia now fall under the Torrens title system, this book's particular focus on the development and operation of the Torrens system in Australia is both timely and welcome. Addressing the prescribed Priestly 11 requirements for a property law subject in Australia, this informative and academically rigorous book includes carefully selected statutory material and case law from all Australian jurisdictions, as well as the United Kingdom. The general law system is also discussed and referred to where necessary, to give context and depth to the analysis of real property law. Written by prominent real property law academics from law schools around Australia, and edited by Hossein Esmaeili and Brendan Grigg, this text is a modern and much-needed addition to real property law literature.

**Contested histories and current struggles** Trafford Publishing

Emphasises the importance of land as a resource, rather than a cultural construct, exploring the ways property, land and identity are linked.

The core principles of land law are articulated clearly in this new textbook, providing a framework through which students can gain a sophisticated understanding of the modern land law system. Emma Lees' expertise in research and teaching ensures all topics are thoroughly explained in a friendly and accessible style. The textbook uses a unique structure: "Chapter Goals" outline the key learning objectives while the core "Principles" are summarised to conclude each chapter with a comprehensive overview of the topic at hand. Key cases are explained while examples illustrate problems and possible solutions. Students understand how to accurately apply the core principles to land law scenarios, while also conducting their own critical analysis of the subject area. The author's enthusiasm is imbued in the writing style; students actively engage with the key debates and at the same time develop an appreciation of the subject as a whole. A comprehensive interpretation of this subject, *The Principles of Land Law* is the ideal companion to a course in land law. Online resources Bimonthly updates on recent law changes.

 Gray and Gray's *Elements of Land Law* remains the definitive authority on the subject and provides an interesting, reasoned and critical account of the fundamental principles or elements of the modern law of real property. This fourth edition has been restructured to reflect a 21st century vision of land law in which registration of title comprises the primary regime and in which the law of realty is increasingly infiltrated by environmental law, human rights law and European law. The book covers not only the Land Registration Act 2002, but also recent case law developments and the many statutory initiatives in the law of leases, commonholds, mortgages and land access which took effect in 2003 and 2004. An emphasis is placed on integrating the rational development of English law within a comparative common law context; and the book also links the contemporary law of land with important themes of modern property jurisprudence.  
 Cambridge University Press  
 Academically rigorous yet welcoming and fully attuned to the needs of the student

reader, Chris Bevan's *Land Law* represents a new breed of textbook, blending traditional and contemporary teaching approaches to guide its readers to a confident understanding of the subject. With its lively, engaging writing style - in which the author's enthusiasm is always apparent - and distinctive way of speaking directly to students, anticipating their questions and areas of confusion, Bevan's book does not simply set out the law but actively teaches it. Clear explanations are complemented by frequent, carefully-crafted visual aids, conveying key concepts in ways that all students can understand, and topics are broken down into sections that are easy to digest and navigate. This book maintains a critical emphasis and encourages students to consider and understand the law in context (both within society and their degree), not just in the abstract. "Key case" boxes offer concise insights on leading cases that pique students' interest, spurring them to conduct their own reading of primary material, and although the book reflects on historical background in order to make sense of today's law, its overriding perspective is

forward-looking, epitomised in the "Future directions" conclusions for each chapter which consider future implications and likely reforms. Balancing brevity with detail and rigour with accessibility, *Land Law* is a truly modern textbook that supports and motivates its readers, allowing them to reap the rewards an understanding of this complex but fascinating subject will bring. Online resources  
 The published text will be accompanied by extensive online resources containing a test bank of questions, animated diagrams, "Wider debates" podcasts from the author, "Leading lawyers" perspectives' videos, advice on answering essay and problem questions, updates on changes in the law and new cases, as well as links to useful websites.

 "Land Law Reform examines the widespread efforts to reform land law in developing countries and countries in transition, drawing in particular upon the experience of the World Bank and the Rural Development Institute. The book considers the role of land law reform in the development process and analyzes how the World Bank has sought to support

these legal changes in client countries. It reviews the experience with reform of laws affecting land access and rights in achieving gender equity, identifies opportunities for reinforcing environmentally sustainable development through land law reform, and examines from both growth and poverty alleviation perspectives the effectiveness of reforms to formalize property rights and liberalize land markets. The concluding chapter recommends some basic priorities for land law reforms. John W. Bruce is a senior counsel in the Legal Vice-Presidency of the World Bank, and a former director of the Land Tenure Center of the University of Wisconsin-Madison. He has published extensively on land law and land policy in developing countries. Renee Giovarelli, David Bledsoe, Leonard Rolfes, and Robert Mitchell are staff attorneys with the Rural Development Institute of Seattle, Washington, a nonprofit organization that promotes and advises on land-related policy and legal reform in developing and transition countries. All have done fieldwork and advised extensively on land law reform and have published widely on this topic."

### **Land Law** Doubleday

'Here is a book whose breadth of purpose and depth of learning are breathtaking.' Peter Butt, [2005] 69 Conv 363 Gray & Gray's Elements of Land Law is the definitive textbook on the subject. The book offers comprehensive coverage of the law in this area. The authors provide an insightful and thought-provoking commentary on the modern development of the subject and go on to explore how land law functions in today's society. The book includes an analysis of recent legislation and case law in England and Wales. There are also references to significant cases from Australia, New Zealand, the United States and Canada, coupled with a detailed account of reforms currently proposed by the English Law Commission. The book demonstrates a thorough understanding of the social and political context of land law and guides the reader through the sometimes difficult terminology of the subject. This fifth edition continues to balance up-to-date coverage of the key issues in land law with a critical survey of cutting-edge research. Building on the strengths of previous editions, the book ensures that excellent

scholarship is accessible to an even wider readership: more chapters of shorter length offer the possibility of readers 'dipping' into topics in a non-linear way. A fresh, new format and text design support the re-structuring of content and aid navigability. Readers wanting to explore areas of interest in more depth are encouraged to do so by the exemplary footnoting and referencing. The book is accompanied by an online resource centre providing updates and web links between editions. This facility also contains illustrative material such as photographs relating to relevant cases discussed in the book. A podcast of the authors introducing the subject will excite students new to the subject area.

This monograph is concerned with two foundational principles of English property

law: the principle of relativity of title and the principle that possession is a source of title. It is impossible to understand the relationship between possession and ownership in English law unless one has a sound understanding of these principles. Yet the principles have been interpreted in different ways by judges, practitioners, and academics. The volume seeks to illuminate this area of law by addressing four questions. What is possession? What

is the nature of the title acquired through possession? What are the grounds of relativity of title? And, what is the relationship between relativity of title and ownership? Drawing on the analysis of the law concerning relativity of title and the acquisition of proprietary interests through possession, the author also implies that the architecture of land law and the law of personal property have many similarities.
