"This is a rather strange book, as tends to be true of Memoirs. They of course have to be autobiographical, and are sometimes little more than that, but (to my mind, at least) a Memoir should be more than that: It should be about the life and times of the author. In my case, the life and times of the author comes down to what I like to call the author's adventures. In my case, too, those adventures are both what are ordinarily

called adventures and what are sometimes called intellectual adventures. Put otherwise, the true hero of this tale is not Mel Kohn, but an academic field, Sociology. It is the story of the wonderful adventures I have had in a long lifetime of doing research, in this country and in several others, in the marvelous field of sociology. There are other ways of having adventures in sociology, in teaching or in administration for example, but in my case it was research. The basic theme of the entire book is an examination of the life of one sociologist - me - whose life illustrates a remarkable range of

adventures, entirely contrary to most readers' expectations of what life in this professional domain entails. Moreover, half of my working life was spent working for a governmental organization, half for a university, suggesting that the adventures were there to be pursued no matter which of the primary career paths open to a sociologist one pursued. My argument is that a career in sociological research can lend itself to an exciting life of adventure, as it certainly did for this sociologist. I speak not of sociological teaching, nor of sociological activities of any other sort, as necessarily leading to an adventurous life. I only argue that sociological research can,"--

John A. Walker Jr. was a Chief Warrant
Officer and communications specialist
for the US Navy. In 1985, he was
arrested for selling classified secrets to
the Soviet Union. Upon his arrest it was
revealed that he had been acting as a
spy from 1968 to 1985 and that his son,
brother, ex-wife, and an acquaintance
had also participated in the espionage
ring. Altogether, their actions constituted
one of the most serious security
breaches in US history. In 1990, the New
York Times stated, Mr. Walker provided
enough code-data information to alter
significantly the balance of power
between Russia and the United

States. What motivated a career naval
officer to become a spy during the
height of the Cold War? Over the years,
statements by Walker have been
reported in various books, newspapers,
and other media outlets, but Walker has
never told his own story-till now. Walker
has decided to make public a private
document that he originally wrote for his
children to explain his actions. Among
the reasons he gives for publishing this
work is the following statement: As I grew
older, I came to understand that the
wars that had taken place during my
entire life were just a symptom of a
larger national policy. I watched my
uncles and aunt go off to World War II,
my brother to Korea, and myself to
Vietnam, all of which were waged on
foundations of lies. Voltaire said that

history is a lie agreed upon by historians. How true. I cannot classify myself as a visionary or idealist, but just a simple citizen who became angry by the government lies. I did conclude that the US system of government was broken, so I felt justified in breaking some rules in order to help save it.... Why did I feel responsible or qualified to end the pattern of perpetual war? I cannot answer my own questions. But then, my insane stunt seemed to have worked. By the admission of both the US and the USSR, I provided the most extensive intelligence ever to the Soviets. With my material in hand, the Soviet government eventually realized the US planned no attack upon them, so my actions have contributed greatly to the Soviet Union's decision to end the Cold War. John A.

Walker Jr. (Springfield, MO) is currently serving a life sentence for the crime of espionage at the US Medical Center for Federal Prisoners.

This eminently practical book includes the tips survivors share with one another - the little coping strategies that can make a huge difference in the physical and emotional comfort of the patient and family. The hopeful and encouraging approach avoids the pitfalls of "statistics" and "scientific prognosis" to focus instead on maximum joy and peace of heart for each patient, regardless of the stage of illness. **Cancer: The Adventure of Your Life** includes the important issues (like losing hair, dealing with insurance companies, or handling visitors) that doctors pass over lightly because they are not life-threatening. The simply-written

explanations are meant for the lay person, although professional caregivers will find new insights, too. There is an extensive treatment of the emotional components of the cancer journey, including fear, grieving, and loneliness, along with specific suggestions for both patients and family members to adapt to this new reality with a health-nurturing life view. Every effort has been made to make the book convenient and easy-to-use for patients, including large print format, stand-alone chapters, and chapter summaries. The book is a valuable resource for cancer center libraries, waiting rooms, and physicians' offices. The most common response of cancer patients after reading the book is, " I wish every newly-diagnosed patient had access to this. If only I had known

that I was not alone in my fears and concerns!"

This is that rarest of books, the one you grab when the house is on fire, or you're about to be marooned on a desert island with nothing else to read. Sven Hedin was not only one of the greatest explorers of the nineteenth century, he was also a brilliant storyteller. Nowhere does the Swedish author tell a tale of excitement, adventure, danger, travel, and hair-raising escape like he does in *My Life as an Explorer*. Written in an engaging anecdotal style, Hedin explains

how he first went to Persia in 1885. Even this first trip was full of mishaps, as he nearly lost his life riding across the snow-covered Elbruz mountains during a fierce snow-storm. Yet Hedin miraculously survived and went on to meet the Shah of Persia. Thus was set the pattern for his remarkable future, which was one part royalty and ten parts danger. *My Life as an Explorer* regales the reader with almost more adventure than one can bear to read. Hedin raids the burial grounds of a secret Asian sect. He courts disaster with the Emir of Bokhara. He climbs accursed mountains in China, discovers lost cities in the Gobi desert, infiltrates Tibet, outwits Torgut bandits, and of course becomes close friends with royalty from Peking to London, including the rulers of both the

Russian and British empires. In short Hedin lived a life so full of adventure and escape that merely reading about it is exhausting. Illustrated with dozens of his own drawings, this remains the single most exciting adventure travel book written in the early twentieth century.

At nineteen, I went to a seance where I was told by a famous clairvoyant that I would meet a man much older than myself, be married within months and travel to an ancient land. 'Poppycock', I thought until the idea began to appeal to

me. I worked at my father's photography studio, but I wanted to be a singer at Covent Garden and make my mark in the world. The day I bumped into Augustus, I knew immediately it was him. I have always known things beyond explanation. Nothing prepared me for the extreme conditions of life in the Yucatan with rebels, murder and ravages of disease which became my daily ritual. Augustus had a theory of the origins of man and the ancient land of Atlantis. Our work was ground breaking as we decoded the messages and ancient images on the stoneS in Chichen Itza. Years of hard work would eventually see me known throughout the archaeological world alongside my husband. In Victorian times, this was quite a feat and I am proud to be Alice Dixon Le Plongeon.
