Cows Can Moo! Can You?

John Wiley & Sons

Award-winning author Temple Grandin is famous for her groundbreaking approach to decoding animal behavior. Now she extends her expert guidance to small-scale farming operations.

Grandin's fascinating explanations of how herd animals think — describing their senses, fears, instincts, and memories — and how to analyze their behavior, will help you handle your livestock more safely and effectively. You'll learn to become a skilled observer of animal movement and behavior, and detailed illustrations will help you set up simple and efficient facilities for managing a small herd of 3 to 25 cattle or pigs, or 5 to 100 goats or sheep.

Know Your Cows Simon and Schuster

Find out about chirping chicks, fluffy ducklings and all their farmyard friends. Then learn how to build a model farm, make a wooly sheep and even

mix up a tasty milkshake.

The Secret Life of Cows

DK Readers Pre-Level 1 Imagine putting together a big breakfast using the eggs straight from your own chickens, or bacon straight from the pig. This is a sort of ideal that many dream of, but few ever get to experience. Now with *The Ultimate Guide to Raising Farm Animals*, that dream can be turned into a reality, and also be so much more. In *The Ultimate Guide to Raising Farm Animals*, you will learn how to take care of chickens, pigs, sheep, cows, and other livestock. Each chapter will be dedicated to a different animal, and you will not only learn how to take care of them, but also what sort of things you

can get from them. If you want to save money, become more self-sufficient, or enjoy healthier locally sourced food, *The Ultimate Guide to Raising Farm Animals* is the book you need.

"Do cows lay eggs? Do bees make wool? This book gets readers thinking all about farm animals through a series of true or false questions. Turn the pages to reveal the answers and learn fascinating farm animal facts." --Back cover.

Farm Animals Storey Publishing

Leading animal rights activist Gene Baur examines the real cost of the meat on our plates -- for both humans and animals alike -- in this provocative and thorough examination of the modern farm industry. Many people picture cows, sheep, pigs, and chickens as friendly creatures who live happily within the confines of a peaceful family farm, arriving as food for humans only at the end of their sun-drenched lives. That's what Gene Baur had been told -- but when he first visited a stockyard

he realized that this rosy depiction couldn't be more inaccurate. Amid the stench, noise, and filth, his attention was drawn in particular to one sheep who had been cast aside for dead. But as Baur walked by, the sheep raised her head and looked right at him. She was still alive, and the one thing Baur knew for sure that day was that he had to get her to safety. Hilda, as she was later named, was nursed back to health and soon became the first resident of Farm Sanctuary -- an organization dedicated to the rescue, care, and protection of farm animals. The truth is that farm production does not depend on the family farmer with a small herd of animals but instead resembles a large, assembly-line factory. Animals raised for human consumption are confined for the entirety of their lives and often live without companionship, fresh air, or even adequate food and water. Viewed as production units rather than living beings with feelings, ten billion farm animals are exploited specifically for food in the United States every year. In Farm Sanctuary, Baur provides a

thoughtprovoking investigation of the ethical questions involved in the production of beef, poultry, pork, milk, and eggs -- and what each of us can do to stop the mistreatment of farm animals and promote compassion. He details the triumphs and the disappointments of more than twenty years on the front lines of the animal protection movement. And he introduces us to some of the special creatures who live at Farm Sanctuary -- from Maya the cow to Marmalade the chicken -- all of whom escaped horrible circumstances to live happier, more peaceful lives. Farm Sanctuary shows how all of us have an opportunity and a responsibility to make a better life for ourselves and animals as well. You will certainly never think of a hamburger or chicken breast the same way after reading this book. [Hobby Farm Animals](#) Houghton Mifflin Harcourt Take a colorful, close-up tour of farms and meet the animals that live there. Accompanied by a read-along audio track, more than 70 colorful photos showcase all kinds of farm animals—from

ducks to donkeys, horses to hens, cows to pigs. Snapshot Picture Library books include a read-along feature: Children can read along with an audio track, following the highlighted words on each page. Perfect for pre-readers and early readers! Kids will enjoy learning fun facts about farm animals, and the more than 70 beautiful color photographs will delight anyone who loves farm animals, especially toddlers, preschoolers, and elementary-school children. 64 pages 70 color photos

Farm Animals Coloring

i5 Publishing Gregarious or shy, curious or placid, playful or retiring, all the animals in Traer Scott's newest collection have one thing in common: a sparkling personality! This whimsical, soulful, and personal photo collection focuses on the lives of the farm animals we often take for granted. Scott introduces us to barnyard animals both familiar and lesser known, from cows, pigs, sheep, and chickens to Dolly the woolly llama, Bianca the Sicilian miniature donkey, Percy the Indian peafowl, and Justice the yak. Some of the animals are kept as pets; others are denizens

of farm sanctuaries that Scott has visited. She shares her anecdotes about a Texas longhorn steer whose best friends are a trio of goats, a turkey who likes to snack on grapes and watermelon, and many others. Lively captions provide information on each breed, to round out this enchanting tribute to our four-legged (and winged) friends from the farm.

Temple Grandin's Guide to Working with Farm Animals Maple Tree

"Within a day of receiving this book, I had consumed it... Absorbing, moving, and compulsively readable."—Lydia Davis In this affectionate, heart-warming chronicle, Rosamund Young distills a lifetime of organic farming wisdom, describing the surprising personalities of her cows and other animals At her famous Kite's Nest Farm in Worcestershire, England, the cows (as well as sheep, hens, and pigs) all roam free. They make their own choices about rearing, grazing, and housing. Left to be themselves, the cows exhibit temperaments and interests as diverse as our own. "Fat Hat" prefers men to women; "Chippy Minton" refuses to sleep

with muddy legs and always reports to the barn for grooming before bed; "Jake" has a thing for sniffing the carbon monoxide fumes of the Land Rover exhaust pipe; and "Gemima" greets all humans with an angry shake of the head and is fiercely independent. An organic farmer for decades, Young has an unaffected and homely voice. Her prose brims with genuine devotion to the wellbeing of animals. Most of us never apprehend the various inner lives animals possess, least of all those that we might eat. But Young has spent countless hours observing how these creatures love, play games, and form life-long friendships. She imparts hard-won wisdom about the both moral and real-world benefits of organic farming. (If preserving the dignity of animals isn't a good enough reason for you, consider how badly factory farming stunts the growth of animals, producing unhealthy and tasteless food.) This gorgeously-illustrated book, which includes an original introduction by the legendary British playwright Alan Bennett, is the summation of a life's work, and a

delightful and moving tribute to the deep richness of animal sentience.

Feeding Farm Animals, Principally in Reference to Dairy Cows (Classic Reprint) Simon and Schuster

Clinical examination is a fundamental part of the process of veterinary diagnosis. Without a proficient clinical examination and an accurate diagnosis it is unlikely that the treatment, control, prognosis and welfare of animals will be optimised. This book will assist veterinary students in their understanding of farm animal clinical examination and act as a quick reference for clinicians who are called upon to examine an unfamiliar species. It will also provide a more detailed account for experienced clinicians in their continuing professional development. The authors provide a simple, explicit and reliable method of examining cattle, sheep, pigs and goats of all ages in the search for diagnostic information.

Farm Animal Coloring Book for Girl Kids

Smithmark Publishers
Readers will learn about one of their favorite farm animals--cows! This title is informative--telling readers what cows eat, what they look like, and how we use cow products every day. The text is very simple, which will reinforce early reading skills. Aligned to Common Core Standards and correlated to state standards. Abdo Kids is a division of ABDO.

Raising Chickens, Goats, Pigs, Sheep, and Cows Princeton Architectural Press

A second edition of the beloved guide to farm

animals. When the going gets tough, the tough . . . start raising their own food. In the first full-color guide of its kind, author and small farm owner Laura Childs reveals exactly what it takes to start raising your own animals, including chickens, geese, goats, sheep, pigs, and cows. Childs discusses what you can expect to harvest from your animals—from eggs to milk to meat to wool—based on her own real-life experiences.

Whether you want to raise a few chickens for eggs alone, try your hand at a few goats with the intention of making your own cheese, or sustain

your family and make some extra money from raising cows and selling beef, this is the book for you. Childs explains how to get started and everything you need to know about successfully raising each animal, including:

- Comparison of breeds
- Designing your farm strategy
- Preparing a home for your livestock
- What to feed your animals
- Animal health
- Breeding
- Milking, laying eggs, and butchering

This invaluable guide is the perfect first book for anyone interested in starting a backyard barnyard or a small farm—or simply dreaming about the idea.
