The Spiritual Laws of Life Image

'By cultivating spiritual thoughts here on earth we can provide nourishment for the dead... When fields lie fallow they produce no crops to feed humanity and people may die of starvation. The dead cannot die of starvation, of course; all they can do is suffer when spiritual life lies fallow on earth.' - Rudolf Steiner The founding of the Anthroposophical Society in 1913 marked a major change in Rudolf Steiner's work. Although Steiner had always been an independent spiritual researcher, the break with the theosophists removed all constraints, allowing for a full flowering of anthroposophy. These lectures, presented to audiences in Germany, France and Sweden, are filled with a freshness and vitality that reflect this new beginning, providing intriguing glimpses of great themes that Steiner was to develop in the years ahead. A predominant topic here is that of death. Rudolf Steiner seeks to explain how people on earth can reach the dead in a non-mediumistic way, and how such interaction between 'living' and 'dead' is mutually beneficial. Startlingly, he states that people who do not recognize the being of Lucifer during their earthly life - who have not 'already got to intuit and know the luciferic impulses in the human soul properly whilst here in life' - will be 'vampirized' by this being after death. Rudolf Steiner also elaborates on the activities of the adversary beings in present-day civilization - spiritual powers that play a necessary role in Earth evolution - and how we can counteract them. The longer

someone can stay alive, for example, is a victory over Ahriman's activity. Even the losing of teeth has beneficial aspects, allowing us to '... gain certain impulses and these overcome Ahriman'. Steiner relates the actions of such spiritual entities to child development too, indicating the various influences in the seven-year cycles of growth. Also included are lectures on the Christian festivals and various artworks, including 'The Triumph of Death' in the Compositano cemetery at Pisa, which reveals great secrets of humanity's evolution. Whatever the subject addressed, it soon becomes apparent that these lectures were not just relevant to Steiner's audience in 1913, but also speak to contemporary souls around the world seeking spiritual orientation and understanding.

'Let us be courageous and not draw back in fear when realities of the world of spirit that play into human life are unveiled. You see, the future of humanity depends on us learning to live with the

world of spirit in the same way that we live with the physical world here on earth.' - Rudolf Steiner In a wide-ranging series of lectures, Rudolf Steiner demonstrates the integral nature of spirit and matter and their manifold connections. Speaking to audiences in London, Holland, Germany and Switzerland, Steiner explains how, through a process of evolving consciousness, humanity lost its knowledge and direct experience of the spiritual sources of existence, but now needs to reconnect with them. Spirit is the essence and power of life which, in Steiner's vivid image, 'strikes a match in our whole being' when we allow it to inform us fully. Our world cannot be understood only in physical terms but is inseparable from the divine realities continually creating and sustaining it. Reconnecting with the spirit calls upon us to heal the fractures between everyday consciousness and the metaphysical realms in which we are already embedded. In Steiner's descriptions, there is no end to the numerous reconnections possible: between our past, present and future; between the active, individualizing principle of the 'I' and the physical human body it works upon and shapes; between our physical actions and limb movements in one life and the forming or sculpting of our head in a future one; and above all, between the moral actions and insights we develop whilst alive on earth and our developing 'eye' for spiritual reality in the life after death, with all that this can mean for the future of human evolution. Taking a truly holistic approach, Rudolf Steiner tackles an eclectic series of subjects throughout these sixteen lectures - all united by the common theme of rediscovering how spirit pervades life. Apart from a focus on education in several lectures, he discusses: experiences during sleep; the human spirit and soul between death and a new birth; how spirit 'sculpts' the human organism; Christ from the perspective of anthroposophy; the battle for human nature between luciferic and ahrimanic beings; karma and the creation of conditions for our return to a new life on earth; human experience of the etheric cosmos; and the human being's faculties of hearing, speaking, singing, walking, and thinking. Together, these lectures offer a cornucopia of spiritual insights and wisdom for the present day.

"An exciting vision of the future" --Michael Eric Dyson Everything Is Spiritual is an unexpected and compelling invitation to see your life in a whole new way. We have the great moments of our lives, the highs, those times when we soar, when it all makes sense, when it feels like it all has purpose and meaning. And then there are all those other moments—the lows and aches and failures and struggles and experiences that leave us wondering what the point of it all is. Are our lives ultimately bits and pieces and fragments—you try to find a little peace and hope and then it's over? Or is there more going on here? In our increasingly polarized and disoriented world, Everything Is Spiritual gives us a radical new take on how it all fits together, how it works, how it's all connected. Part memoir, part extended riff on the quantum nature of reality, part history of the universe, Rob Bell takes us back through the twists and turns and struggles of his story in order to help us see the larger story so that we can reconnect with our story.

Unifying Truths of the World's Religions Simon and Schuster These authoritative lectures, delivered during a period of deep crisis and conflict in world history, present a comprehensive spiritual teaching for contemporary humanity. Despite the raging world war, Rudolf Steiner was still actively touring Central Europe whilst simultaneously completing work on his architectural masterpiece, the first Goetheanum, in neutral Switzerland. The building of the Goetheanum – undertaken by a community of people from seventeen nations at war – forms a thematic backdrop to the lectures. In speaking of the walls in the new building, for example, Rudolf Steiner describes how their forms are not confining, but rather express an openness to the surrounding cosmos. Likewise, the carved motifs on the architraves of the wooden pillars are not fixed 'symbols' but are alive and continually metamorphosing. These observations are reflected in Steiner's broader discussions. He speaks of extending and deepening our connection with the world and the cosmos, going beyond our usual narrow limits and definitions to engage in 'community with the realities of existence'. We can do this, for example, with the so-called 'dead', who find it difficult to relate to sense-bound thinking. Rudolf Steiner explains how we can connect with them, greatly enriching our lives and 'making an enormous difference to their souls'. The distinction between fixed symbols and living motifs takes us to the core of anthroposophy,

striving never to rest in inert forms of thought. In the field of education, Steiner thus warns about 'external measuring' of pupils and linear models of cognitive learning. Throughout the three lecture courses included here – which together form a kind of compendium of anthroposophy at the time – Steiner touches upon a wealth of absorbing themes, including the 'discovery' of America, the contrast between East and West, the qualities of European 'folk souls', Valentin Andrae's Chymical Wedding, and Darwinism. Regardless of his topic, however, Steiner consistently makes the urgent appeal that we 'grasp reality', looking further than abstract schemes of all kinds – such as social and political 'programmes' – to participate in the cosmos as conscious and fully human co-creators.

The Big Picture David Lundberg

'Everyone with a curiosity for spiritual knowledge should read this excellent book.' – Peter John, psychic artist Based on direct communications with his eight spirit guides, Dr Bob Woodward confirms that we have all lived in spirit worlds before our birth – and that we will enter these same realms again after our material deaths. In a very real sense, these higher spirit worlds are actually our true home, he says, rather than our present physical existence, which is only a temporary abode. In consultation with his spirit guides – including a Tibetan Lama, a Jewish Rabbi, a Native American and his personal guardian angel – Bob Woodward gives a detailed survey of our lives in spirit worlds before birth and after death, our relationships there with friends, family and even pets, and our connections with both good and evil spiritual beings. He also gives a commentary on a range of subjects such as reincarnation and climate change. In a final extensive and moving interview, Woodward finds and speaks with the soul of his deceased father, who offers enlightening glimpses of life after death. Whilst the author's knowledge is grounded in decades of study of the work of Rudolf Steiner – with which he compares the results of his own extrasensory perceptions – Knowledge of Spirit Worlds is not intended as a dry philosophical

study. Rather, it has a warm, experiential quality – based as it is on personal interaction with spirit entities – and emphasizes the love that connects all worlds and beings together.

A Franciscan View of Creation Simon and Schuster

Built around the extraordinary stories of seven people who have been unwitting visitors to the spiritual world, *The BIG Picture* examines the themes of reincarnation, the relationship between karma and destiny, the divide between religion and spirituality, humanity's task in creation, and the emergence of a new Western spirituality to lead us into the next stage of the evolution of consciousness. In *The BIG Picture*, author Garry Gilfoy discloses his own spiritual experiences and also tells the stories of others, such as Joy, who was sent back from the realm of spirit without her husband after a horrific crash; Trish, who died numerous times before learning to visit her cosmic classroom at will; Helen, who relived a holocaust nightmare before her eyes opened onto ancient Egypt; and Keely, who was miraculously saved by a familiar figure, the Watcher. Gilfoy helps us contemplate deeper meanings and refocus the lens through which we view the world. *The BIG Picture* guides us to ponder unusual possibilities that can shift the point of reference for our earthly thoughts and deeds.

The Invisible World BRILL

A mindfulness expert whose work has been hailed by Eckhart Tolle as "an important contribution to the shift in consciousness" offers a new vision of reality—one that is compatible with modern science and ancient spirituality. "With elegance and lucidity, Steve Taylor explains why spiritual science is the only hope for humanity." —Deepak Chopra It is often assumed that there are two ways of interpreting the world: a rational scientific way, or an irrational religious way. Mindfulness expert, Steve Taylor, shows that there is a third possibility—a spiritual, or "panspiritist", view of reality that transcends both conventional science and religion, recognizes spirit or consciousness as fundamental, and answers many of the riddles that neither can explain. Here, Taylor puts forward the evidence for a spiritual view of reality and examines the development and consequences of the materialist model. Drawing on the insights of philosophers, physicists, mystics, as well as spiritual traditions and indigenous cultures, he also systematically shows how a 'panspiritist' view can explain many puzzling aspects of science and the world such as: • human consciousness • altruism • near-death experiences • telepathy

and pre-cognition • quantum physics • the placebo effect • neuroplasticity A compelling argument for a new vision of reality, Spiritual Science offers a bright vision of the world as sacred and interconnected, and of human life as meaningful and purposeful. [Man's Life on Earth and in the Spiritual Worlds](#) Thomas Nelson Life is full of challenges, both big and small. Spirituality is here to offer solutions. Over the course of his career as physician, teacher, and bestselling author, Deepak Chopra has received thousands of questions from people facing every kind of challenge. They have asked how to lead more fulfilling lives, how to overcome relationship problems and personal obstacles. What's the best way to deal with a passive-aggressive friend? Can a stagnant career be jump-started? In a world full of distractions and stress, how does one find time for meditation? Hidden among all of these questions are answers waiting to be uncovered. In this groundbreaking book, Chopra shows you how to expand your awareness, which is the key to the confusion and conflict we all face. "The secret is that the level of the problem is never the level of the solution," he writes. By rising to the level of the solution in your own awareness, you can transform obstacles into opportunities. Chopra leads the reader to what he calls "the true self," where peace, clarity, and wisdom serve as guides in times of crisis. For Chopra, spirituality is primarily about consciousness, not about religious dogma or relying on the conventional notion of God. "There is no greater power for success and personal growth than your own awareness." With practical insight, *Spiritual Solutions* provides the tools and strategies to enable you to meet life's challenges from within and to experience a sense of genuine fulfillment and purpose.

It has been suggested that 'spirituality' has become a word that 'can define an era'. Why? Because paradoxically, alongside a decline in traditional religious affiliations, the growing interest in spirituality and the use of the word in a variety of contexts is a striking aspect of contemporary western cultures. Indeed, spirituality is sometimes contrasted attractively with religion, although this is problematic and implies that religion is essentially dogma, moralism, institutions, buildings, and hierarchies. The notion of spirituality expresses the fact that many people are driven by goals that concern more than material satisfaction. Broadly, it refers to the deepest values and sense of meaning by

which people seek to live. Sometimes these values are conventionally religious. Sometimes they are associated with what is understood as 'the sacred' in a broader sense - that is, of ultimate rather than merely instrumental importance. This Very Short Introduction, written by one of the most eminent scholars and writers on spirituality, explores the historical foundations of the thought and considers how it came to have the significance it is developing today. In the words of Michael Laitman, "It is beyond human comprehension to understand the essence of such spiritual qualities as total altruism and love. This is for the simple reason that human beings cannot comprehend how such feelings can exist at all, as everyone seemingly requires an incentive to perform any act; without some personal gain, people are not prepared to extend themselves. That is why a quality such as altruism can only be imparted to a person from Above, and only those who have experienced it can understand it." *Attaining The Worlds Beyond* is a first step toward discovering the ultimate fulfillment of spiritual ascent in our lifetime.
