ZOE BOOTH

[Annual Catalogue ...](#) SUNY Press

This text invites students to pursue a career in sociology, entices others to consider advanced courses, and yet serves those who will take but one sociology course. This basic textbook for Introduction to Sociology can also serve well in courses in American Society.

[Marginality and Dissent in Twentieth-Century American Sociology](#) Cambridge University Press
 First published in 1979, this book examines past thought and research about the social and psychological causes of juvenile delinquency in Western society. The first few chapters summarise major delinquency theories and survey an extensive list of studies that demonstrate those theories. The author then develops a single model of individual causation from the divergent theoretical traditions. The model includes such variables as social class, parent-child relations, school experiences, strain, peer relations, personal values and the perceived risk of being caught in lawbreaking. Testing the model with information from 734 large-city adolescents results in several innovations in the measurement and conceptualisation of key variables in delinquency research. In his search for a better understanding of delinquency, the author shows the usefulness of examining the impact of all the variables at once and finds that the major theories of delinquency complement rather than contradict one another.

[Cornell University Courses of Study](#) Rowman & Littlefield

The classic work that redefined the sociology of knowledge and has inspired a generation of philosophers and thinkers In this seminal book, Peter L. Berger and Thomas Luckmann examine how knowledge forms and how it is preserved and altered within a society. Unlike earlier theorists and philosophers, Berger and Luckmann go beyond intellectual history and focus on commonsense, everyday knowledge—the proverbs, morals, values, and beliefs shared among ordinary people. When first published in 1966, this systematic, theoretical treatise introduced the term social construction, effectively creating a new thought and transforming Western philosophy.

Although articles reporting research studies are helpful in acquainting students with methodological approaches, they often make the process look so straightforward, clean, and effortless. It is rare to find an article that tells the "real" story behind the finished product. By having real researchers tell their own stories of "mucking around" with methodological and ethical issues in qualitative research, we get a more realistic, human story of the process. This is a collection of such stories. Authors were asked to describe their own experiences with methodological and ethical struggles as they engaged in their work. Each of the essays offers insight into the research approach used as well as particular issues which became apparent during the research process. Key issues raised by the authors include early learnings; gaining entry; overlapping, conflicting roles, and the boundaries of these roles; differential power relationships; who tells the story and whose story is told; ethical concerns related to confidentiality; and the influence of a researcher's particular philosophy or theoretical framework on his or her research. Throughout the book we see scholars whose personal stories or autobiographies intersect closely with their research projects. deMarrais introduces a unique framework to help students gain an overview of qualitative research methods and the underpinnings and processes in these approaches. This framework is centered on the ways we understand phenomena using qualitative research approaches that engage archival knowledge, narrative knowledge, or observational knowledge.

[The Ohio State University Bulletin](#) John Wiley & Sons

Beginning 19 - each bulletin contains details of curricula, course description, college rules, etc., for one of the schools or colleges at Western Reserve University.

 Designed to inform educators, professionals, and students about gerontology-related courses, degree programs, educational services, and training programs in 1275 institutions in the United States, Guam, the Virgin Islands, Puerto Rico, and the Canal Zone. Geographical arrangement. Entries include coded identifying information of institution, address, contact person, and descriptive information. College, subject indexes.

Routledge

Tracing developments in the sociology of race relations from the 1920s to the 1960s, McKee maintains that sociologists assumed the United States would move unimpeded toward modernization and assimilation, aided by industrialization and urbanization. The fatal flaw in their perspective was the notion that blacks were culturally inferior, backward, and pre-modern, a people who had lost their own culture and couldn't grasp that of their new society. Designed to detail a failure the author says is widely acknowledged but little examined, this book will be of interest to both specialists and general readers. "Masterful. . . . McKee transports the reader back to the intellectual world in which the early sociologists worked and does not simply treat them as evil racists. His approach is informed by the sociology of knowledge." -- Lewis M. Killian, author of *The Impossible Revolution, Phase 2: Black Power and the American Dream*

[An Introduction to Macrosociology](#)

This comprehensive collection of classical sociological theory is a definitive guide to the roots of sociology from its undisciplined beginnings to its current influence on contemporary sociological debate. Explores influential works of Marx, Durkheim, Weber, Mead, Simmel, Freud, Du Bois, Adorno, Marcuse, Parsons, and Merton Editorial introductions lend historical and intellectual perspective to the substantial readings Includes a new section with new readings on the immediate "pre-history" of sociological theory, including the Enlightenment and de Tocqueville Individual reading selections are updated throughout

[The ... Bulletin of Mankato State College](#)

The Sociology Reference Guide series is designed to provide a solid foundation for the research of various sociological topics.

[Catalog](#)

This book is a biography of the husband and wife team that is largely responsible for developing social problems and social deviance as areas of research. Politics in the discipline of sociology is also examined.
