This book includes: - What are med school interviews looking for? - Approach to major types of questions frequently seen in the MMI- Sample questions- Sample answers to questions- Full-length MMI Student Testimonial: 1. "Jay taught me to tackle the interviews using his unique approach - to effectively tell interviewers about who you are in ways that highlight your skills in a humanistic fashion. Further, he helped me show medical schools why I was a great candidate. Jay is a key reason why I can call myself a doctor today." Anonymous, MD, University of Ottawa, School of Medicine 2. "I owe my medical school acceptance to Jay. I applied and interviewed three years straight without success. Frustrated and disheartened, I could not figure out what I did wrong. The year I worked with Jay, I told myself this would be my last application. However, Jay pointed out my blind spots, shined the light on my strengths, and showed me how to demonstrate my qualities. Without his help and approach, I cannot call myself a medical student today." BH, University of British Columbia, School of Medicine 3. "Hi Jay! I got in! I want to thank you again. Your personalized approach & guidance throughout the application process has been invaluable in helping me get accepted. I only wish I had known you

sooner!" GL, Queen's University, School of Medicine
 4. "I was really worried about my interview. I often get off topic and was concerned that I wouldn't answer the questions well. Initially, I felt really scattered and unsure how to respond in the best way. Fortunately, Jay helped me develop a strategy to structure and polish my responses and represent my best self. His approach made me stand out more than my peers." SS, University of Calgary, School of Medicine
 "Before working with Jay, I was completely lost on how to approach the multiple mini interview. But after working with Jay, I felt 10x more confident and could organize my thoughts and deliver strong responses to many questions. He showed me the importance of personal qualities and taught me how to showcase my strengths using personal stories. I am so excited to start medical school in the fall of 2018 all thanks to his guidance. I could not have been this successful without him!" Samantha Taylor, McGill University, School of Medicine

This book is a student reference guide book for the MD/PhD application process. It begins with an overview of the structure of a typical MD/PhD program as well as student outcomes and career choices of MD/PhD graduates. Next is an outline of the academic and extracurricular prerequisites as well as the basic components of the application itself. The authors then address the factors that MD/PhD students should consider when selecting schools to which to apply. Continuing to the main application, examples are provided of all the different essay types that MD/PhD applicants will encounter along with comments on how to address the deliberately vague and abstract prompts while tailoring the responses to the combined-degree program. Most uniquely, included is a very detailed explanation of the many types of interviews that applicants will encounter and how to prepare for them by integrating extensive personal experience and first-hand discussions with MD/PhD program leaders. Lastly, there will be a discussion on how to cope with the year-long timeline that constitutes this application process and provide guidance regarding properly responding to acceptances and waitlist offers. Written by a team of authors each experienced with the MD/PhD application, this book aids the prospective applicant with navigating this

challenging process.

Tips, Tricks, and Techniques to Impress Your Interviewers Morgan James Publishing
 "Is medical school on the horizon? Did you know that Not getting into medical school the first time you apply is the norm in Canada? In fact, most academically-gifted, talented applicants apply 2-3 times before they get accepted. Despite this, students

(and parents) greatly under-estimate the challenge of applying to, interviewing for, and getting accepted to medical school in Canada-especially the first time. They don't know that: most medical schools require students to list and describe their activities from age 16 onward, when they apply; medical schools focus on cumulative undergraduate grades, including the often transitional or tumultuous first year of university; the majority of motivated, smart students in Canada are not getting accepted. Whether in high school or university, this book helps students and their families learn to strategize and prepare for future medical applications now with insights from a pre-med expert and former medical school application reader/interviewer with 20 years of experience coaching thousands of students dreaming of becoming a physician. Get the insider strategies you need to avoid the pitfalls in today's more complex applications so you can stand out in a highly accomplished group of medical-school hopefuls!"--
