Practical Sclerology - Herbology And Nutrition Simon and Schuster

Body electronics is a self-healing system that utilizes nutrient saturation through diet and supplementation. Thomas Chavez learned this discipline under its developer, Dr. John Whitman Ray, and in *Body Electronics*, Chavez expands it to cover every imaginable trauma and illness. The basis for the approach is the melting of melanin protein complexes (crystals) in the body that develop through years of poor diet, insufficient water, poor bowel ecology, and other factors. The book addresses such topics as how to achieve appropriate levels of nutrient saturation with the right combination of enzymes and minerals; how much water to drink and why it's important; how eating cooked food can be a damaging addiction; and how to achieve a healthy relationship with bacterial flora for intestinal health. In addition to physical wellness, the book addresses spiritual and psychological well being. The results of body electronics have been called miraculous; this book shows why.

Bernard Jensen, who pioneered Iridology in the United States, presents a basic introduction to this science which analyzes the delicate structures of the iris to reveal and locate inflammation in the body. Readers are given an explanation of how the chart works, including detailed illustrations of iris topography showing individual systems charts, and over two dozen color photographs of irises diagnosing stages of different ailments. This book supports Jensen's belief that iridology is an important element in the total, holistic health care program.

For over one hundred years, researchers have studied the links between health and the patterns, colors, and textures of the iris. In the United States, Dr. Bernard Jensen brought the art of reading the iris into the twentieth century. In *Visions of Health*, Drs. Jensen and Bodeen describe the basics of iris analysis in easy-to-understand language with dozens of illustrations and color photos, as well as charts for reading your own eyes and those of friends. They believe that with this book in hand, you can recognize weaknesses in the iris and adjust your lifestyle to achieve optimum health.

Learn Why Pulsed Electromagnetic Field (PEMF) Therapy Supercharges Your Health Like Nothing

You probably know that food, water, sunlight, and oxygen are required for life, but there is a fifth element of health that is equally vital and often overlooked: The Earth's magnetic field and its corresponding PEMFs (pulsed electromagnetic fields). The two main components of Earth's PEMFs, the Schumann and Geomagnetic frequencies, are so essential that NASA and the Russian space program equip their spacecrafts with devices that replicate these frequencies. These frequencies are absolutely necessary for the human body's circadian rhythms, energy production, and even keeping the body free from pain. But there is a big problem on planet earth right now, rather, a twofold problem, as to why we are no longer getting these life-nurturing energies of the earth. In this book we'll explore the current problem and how the new science of PEMF therapy (a branch of energy medicine), based on modern quantum field theory, is the solution to this problem, with the many benefits listed below: • eliminate pain and inflammation naturally • get deep, rejuvenating sleep • increase your energy and vitality • feel younger, stronger, and more flexible • keep your bones strong and healthy • help your body with healing and regeneration • improve circulation and heart health • plus many more benefits

In *Do You Believe in Magic?*, medical expert Paul A. Offit, M.D., offers a scathing exposé of the alternative medicine industry, revealing how even though some popular therapies are remarkably helpful due to the placebo response, many of them are ineffective, expensive, and even deadly. Dr. Offit reveals how alternative medicine—an unregulated industry under no legal obligation to prove its claims or admit its risks—can actually be harmful to our health. Using dramatic real-life stories, Offit separates the sense from the nonsense, showing why any therapy—alternative or traditional—should be scrutinized. He also shows how some nontraditional methods can do a great deal of good, in some cases exceeding therapies offered by conventional practitioners. An outspoken advocate for science-based health advocacy who is not afraid to take on media celebrities who promote alternative practices, Dr. Offit advises, "There's no such thing as alternative medicine. There's only medicine that works and medicine that doesn't."

This book is written for Iridologists and natural health practitioners who are seeking greater insights and effectiveness in their healing practices. It is a collaboration between Dr. Jack Tips (protégé of Sclerology's founder, A.S. Wheelwright, and author of twelve books including, *The Art & Science of Sclerology*); and Dr. Betty Sue O'Brian (a gifted, International Iridology Practitioners Association

certified Iridologist who has integrated Sclerology and Iridology into an effective natural healing practice). This book is titled, *Causations* because it is only through the causative view that the healer perceives the truth about why a person is experiencing symptoms, imbalances, ailments, and diseases—all conditions that express limitations in the body's ability to adapt to the physical, emotional, mental, and spiritual flow of energies that comprise the human dynamic. By knowing the truth a person can become free from life-limiting conditions. Combining Sclerology with Iridology provides "the cause" of many health issues.
