Pascagoula - The Closest Encounter Simon and Schuster

Psychologist and researcher Don Donderi examines the evidence and research from the past several decades on the changing nature of UFOs. He looks at why the scientific establishment takes a dim view of UFOs and abduction evidence and examines how the US government has collected and suppressed UFO evidence. UFOs, ETs, and Alien Abductions is a wide-ranging examination of all things off-planet that falls into 3 sections. 1. UFOs: evidence and belief between 1947 through 1965 and Cold War mysteries 2. The changing nature of UFO phenomenon from 1965 to the present, which makes the case for the existence of humanoid crew members seen in and around landed UFOs. This section also examines six well-documented abduction cases, and includes the author detailing his own research involvement with the evidence. He refutes the belief that all abductees are mentally disturbed and that a psychological disturbance explains the experience. 3. The third section is devoted to a very meaty and controversial analysis of science, politics, and UFOs.

Military Encounters with Extraterrestrials e-artnow

An astonishing collection of stories of extraterrestrial abduction, time travel, and extraterrestrial sex. "Brad Steiger's book does an excellent—indeed, essential—job of setting the scene and providing a foundation of the facts as they were known at the time it was written. It is to be hoped that, in time, this provocative and disturbing reality will come into ever greater focus." —Whitley Strieber, from the foreword Here is the startling proof—in one comprehensive, eye-opening volume. Brad Steiger, the world-renowned authority on unexplained phenomena, presents a collection of UFO encounters and abductions. His provocative theories provide answers to the most puzzling questions: Why are they here? What do they want? And how will they change the fate of the human race? Included here are stories of airplane disappearances, alien experimentation, close encounters of the alien-sexual kind, and hybrid children. Alternately entertaining and terrifying, this is a book for anyone who has gazed into the night sky and wondered if we are alone in the universe.

Into The Fringe Fawcett

Presents a historical examination of UFO sightings and reports, and discusses theories for and against UFOs

A True Story Hampton Roads Publishing

The first, comprehensive military history of armed confrontations between humans and extraterrestrials • Includes documentation of incidents from World War I, World War II, the Korean War, the Vietnam War, the Gulf War, and the ongoing hostilities in the Middle East • Reveals the U.S. Navy's defeat in Antarctica by ETs, the shoot-down of "flying saucers" at Roswell, alien sabotage of nuclear weapons, in-flight abductions of USAF and Soviet officers, and photographic evidence of the Battle of Los Angeles • Explains the link between the development of atomic bombs and ballistic missiles and the increase in extraterrestrial intervention in the 20th century Although close encounters with alien space craft are reported as far back as the reign of Pharaoh Thutmosis III in

Egypt, it wasn't until the 20th century that UFO sightings and extraterrestrial encounters were truly documented, due to advances in technology and record-keeping as well as the vast increase in incidents, particularly with military forces. Revealing his extensive research and the verifiable evidence he's discovered, Frank Joseph presents a comprehensive military history of armed confrontations between humans and extraterrestrials in the 20th and 21st centuries. He explains how, with the development of atomic bombs and ballistic missiles, the frequency of extraterrestrial intervention in human affairs increased dramatically. He documents incidents both famous and little known, including the explosive demolition of U.S. munitions factories in 1916 by unearthly aerial vehicles, the Red Baron's dogfight with a UFO during World War I, "foo fighter" sightings and battles with Allied and Axis combatants during World War II, and eye-witness reports from encounters during the Korean War, the Vietnam War, the Gulf War in Iraq, and the ongoing hostilities in the Middle East. He examines the evidence for the shoot-down of "flying saucers" at Roswell and Aztec, New Mexico, alien sabotage of nuclear weapons systems, and in-flight abductions of USAF and Soviet officers and airplanes. He explores the photo evidence for the Battle of Los Angeles, which occurred three months after Pearl Harbor, and the details of Operation Highjump, the U.S. Navy's defeat in Antarctica by ET forces 17 months after the atomic bomb was dropped on Nagasaki, while also uncovering evidence of secret Antarctic German bases. The author also examines recent, 21st-century examples of alien interdiction in Earthly affairs, such as the meltdown of the Fukushima Daiichi nuclear plant in Japan and the fiery abort of Elon Musk's Falcon 9 missile launch, both events accompanied by UFOs. Offering complete disclosure of the multitude of ET events over the past century, Frank Joseph gives us the first true reference book in the field of alien military encounters. Incident at Devils Den: A True Story, by Terry Lovelace, Esq Koinonia House

Pascagoula - The Closest Encounter - My StoryBy Calvin ParkerForeword by Philip Mantle(FULL COLOUR EDITION)On October 11th, 1973 nineteen year old Calvin Parker and his friend forty two year old Charles Hickson were spending a frustrating evening fishing on the Pascagoula River in Mississippi. Both men loved to fish but tonight's fishing trip would turn out to be one they would never forget. In the early evening both men were startled when a strange craft descended and hovered a few feet above the ground and just a few yards from their location. Before they had any chance to run an opening appeared in this craft and out 'floated' three humanoid creatures. Both men were absolutely terrified when these creatures grabbed them and took them aboard the craft. On the craft both men were subjected to an examination and at one point they were so terrified as they believed they were about to die. Minutes later both Calvin Parker and Charles Hickson were deposited back on the riverbank and the craft departed. Taking off in their car the two terrified witnesses eventually located a public telephone box and phoned the local sheriff. A short time later they were being interviewed at their local sheriff's office. These two disorientated witnesses told their story of their close encounter and abduction by these strange creatures. The next day all hell was let loose as the press descended on this unsuspecting Mississippi town. Calvin Parker, seriously disturbed by these events, has largely remained in the background without ever detailing the full account of what happened that night, how it affected him and his life, and other close encounters he

has experienced down the years. Now, for the first time, Calvin Parker tells his story in full. This book, *Pascagoula - The Closest Encounter*, tells the story of one of the classic close encounters currently on record. This book features for the first time the full transcript of Calvin Parker's hypnotic regression session with the late Budd Hopkins, one of the world's foremost researchers of this phenomena. The manuscript is also packed full of documents, newspaper cuttings and photographs old and new. This is the full colour edition and a black and white version is also available.

The Rest of the Amazing Story Simon and Schuster

A voyage of exploration to the outer reaches of our inner lives. UFOs are a myth, says David J. Halperin—but myths are real. The power and fascination of the UFO has nothing to do with space travel or life on other planets. It's about us, our longings and terrors, and especially the greatest terror of all: the end of our existence. This is a book about UFOs that goes beyond believing in them or debunking them and to a fresh understanding of what they tell us about ourselves as individuals, as a culture, and as a species. In the 1960s, Halperin was a teenage UFOlogist, convinced that flying saucers were real and that it was his life's mission to solve their mystery. He would become a professor of religious studies, with traditions of heavenly journeys his specialty. With *Intimate Alien*, he looks back to explore what UFOs once meant to him as a boy growing up in a home haunted by death and what they still mean for millions, believers and deniers alike. From the prehistoric Balkans to the deserts of New Mexico, from the biblical visions of Ezekiel to modern abduction encounters, *Intimate Alien* traces the hidden story of the UFO. It's a human story from beginning to end, no less mysterious and fantastic for its earthliness. A collective cultural dream, UFOs transport us to the outer limits of that most alien yet intimate frontier, our own inner space.

Encounter Pocket Books

What is best known about the UFO events of October 1973 is the Pascagoula abduction account of Charles Hickson and Calvin Parker. It began as an extremely credible report, but unlike many reports, intensive research has uncovered a number of additional reports of UFO sightings in the area at around the same time. This number continues to grow and more are given here. This has added to its credibility and because of this, it has been termed the best-documented alien abduction account on record. But much is not known about many elements associated with this event. It had numerous unique aspects, such as that the instruments the beings appeared to use to scan the men resembled such modern devices as the computerized axial tomography (CAT) scan. Such unique factors are compared to additional reports from the same time. This may be the first report of a new type of abduction event; there may have been a second abduction, by the same object at around the same time as Parker and Hickson's. Abductions appear to happen as single events, but this may have been extremely different and the first reported. And there may have even been several abduction attempts on the same night as the Pascagoula abduction. In addition much happened at the same time as the Pascagoula abduction, such as reports of close UFO encounters, a thunderous boom, and similar episodes that swarmed in to bewildered operators in many states across the USA. These events ushered in a massive UFO wave, possibly the largest wave ever experienced and possibly the last wave. The strange boom was no ordinary sound; it was one that, with the exception of the Krakatoa volcanic eruption of 1883, could be the most widespread audible sound ever recorded. It did not happen in some out of the way place; it happened in the nation's vital centers. It

was felt in Washington DC, over areas of the nation's highest population density, its heartland, and several vital cities. This sound was analyzed according to the latest NASA research on sounds. The boom was quite unnatural and remarkable in many ways. The width of the sound would mean that the object causing it would be many miles high, in outer space, and in a location where there should be no overpressure. However, there was a large area of overpressure such that it broke windows in a swath over at least three states and it appeared able to cause ground movement over a large area. It appeared to defy the laws of physics. Unlike most UFO associated phenomena where there is no hard scientific proof, this sound was recorded on two seismographs, which may provide scientific proof of the existence of anomalous UFO phenomena associated events.

Captured! Simon and Schuster

A true story of the 1977 alien abduction as told by a former Assistant Attorney General and USAF veteran. He and a friend were taken while remote camping in an Arkansas State Park. Includes the 2012 x-rays of an alien implant discovered on a routine x-ray. It was the catalyst to tell the story he had to retire before he could tell.

Alien Abductions August Night Press

Without question, this is a classic by one of the most exciting new authors in the UFO field today. After reading it, your view of reality will never be the same. The owl has held a place of reverence and mystique throughout history. And as strange as this might seem, owls are also showing up in conjunction with the UFO experience. Mike Clelland has collected a wealth of first-hand accounts in which owls manifest in the highly charged moments that surround alien contact. There is a strangeness to these accounts that defy simple explanations. This book explores implications that go far beyond what more conservative researchers would dare consider. But the owl connection encompasses more than the UFO experience. It also includes profound synchronicities, ancient archetypes, dreams, shamanistic experiences, personal transformation, and death. From the mythic legends of our ancient past to the first-hand accounts of the UFO abductee, owls are playing some vital role. This is also a deeply personal story. It is an odyssey of self-discovery as the author grapples with his own owl and UFO encounters. What plays out is a story of transformation with the owl at the heart of this journey.

A Prince of Our Disorder Book Tree

Thus begins the most astonishing true-life odyssey ever recorded—one man's riveting account of his extraordinary experiences with visitors from “elsewhere” . . . how they found him, where they took him, what they did to him, and why. Believe it. Or don't believe it. But read it—for this gripping story will move you like no other. It will fascinate you, terrify you, and alter the way you experience your world.

UFOs Addison Wesley Publishing Company

In this compelling and revealing examination, author Rupert Matthews looks afresh at key episodes of alien activity on earth, and sheds light on the many mysterious phenomena associated with it. From Roswell to Taizé, the book dissects fascinating eyewitness accounts of communication and contact with alien beings, as well as chilling cases of abduction. It also sifts through sinister evidence of government cover-ups. *Alien Encounters* provides in-depth analysis of the most important encounters, including: • The pilot who saw a formation of alien aircraft • The Exeter Incident -

chased by UFOs in the darkness • The Socorro Incident - solid evidence of alien activity • Betty and Barney Hill - abducted on Highway 3 Alien Encounters is a gripping investigation of strange events that continue to spark fierce debate. The Pentagon's decision in 2020 to admit the existence of its UFO division has begun a new era in encounters between humans and extra-terrestrials.

Understanding the meanings behind these strange events has never been more important.

[Intruders](#) BookRefine Publishing

For decades, people have reported close encounters with extraterrestrial entities. Witnesses describe being kidnapped by large-headed, black-eyed creatures from other worlds. Those same creatures have become popularly known as "the Grays." There is, however, another aspect to the alien abduction controversy. Abductees very often report being followed and spied upon by military and government personnel. It is typical for abductees to see black helicopters hovering directly over their homes in an intimidating manner. Phone calls are monitored. Emails are hacked into. Strange men dressed in black suits are seen photographing the homes of the abductees. All of this brings us to the matter of what have become known in the domain of alien abduction research as "Military Abductions," or "MILABS." According to numerous abductees, after being kidnapped by aliens they are kidnapped again . . . by the government. These follow-up events are the work of a powerful group hidden deep within the military and the intelligence community. It is the secret agenda of this highly classified organization to figure out what the so-called Grays are really up to. And, the best way for the government to get the answers is to interrogate those who have come face-to-face with the UFO phenomenon: the abductees. Why is the government secretly compiling files on alien abductees? Is the alien abduction issue so sinister that it has become a matter of national security proportions?

[Alien Encounters](#) Red Wheel Weiser

In his 1998 book, *The Threat*, Jacobs uncovered disconcerting reports about aliens' plans for the future of Earth. He reported that a "change" is coming; a future when very human-like hybrids would intermingle with humans in everyday life. "Soon we will all be together," the aliens said. "Soon everyone will be happy and everyone will know his place." This book examines a chilling phenomenon that Jacobs began noticing in 2003. The alien integration action plan has kicked into high gear. The incidents of alien abductions have declined as occurrences of alien involvement in everyday life have accelerated. A silent and insidious invasion has begun. Alien hybrids have moved into your neighborhood and into your workplace. They have been trained by human abductees to "pass," to blend in to society, to appear as normal as your next door neighbor. This book illustrates in detail the process of alien integration into society and the strategy and support structure that has been developed to make this happen seamlessly. While he is not certain why they are doing it, the final chapter of the book will provide some chilling possible answers as to why they are here and what they want to accomplish. Jacobs is a careful researcher who has investigated more than 1150 abduction events experienced by more than 150 abductees. This book focuses on the experiences of thirteen abductees.

The Believer is the weird and chilling true story of Dr. John Mack. This eminent Harvard psychiatrist and Pulitzer Prize-winning biographer risked his career to investigate the phenomenon of human

encounters with aliens and to give credibility to the stupefying tales shared by people who were utterly convinced they had happened. Nothing in Mack's four decades of psychiatry had prepared him for the otherworldly accounts of a cross-section of humanity including young children who reported being taken against their wills by alien beings. Over the course of his career his interest in alien abduction grew from curiosity to wonder, ultimately developing into a limitless, unwavering passion. Based on exclusive access to Mack's archives, journals, and psychiatric notes and interviews with his family and closest associates, *The Believer* reveals the life and work of a man who explored the deepest of scientific conundrums and further leads us to the hidden dimensions and alternate realities that captivated Mack until the end of his life.

[Alien Encounters, Hard Science, and the Passion of John Mack](#) Abduction: Human Encounters with Aliens

The ideas of alien abductions have fueled our imagination! What if it happened to you? Discover true cases of alien abductions from people claiming being taken by aliens and that came back to tell their story. Imagine you're out alone at a park somewhere taking in the scenery and simply enjoying the exercise of a nice walk. Suddenly, there's a strange feeling in the air. You don't know what it is, but things somehow just don't seem quite right. You look up and there's a light in the sky. You see a bright flash, and then moments later the light is gone, and you resume your hike through the park. According to many alleged alien abductees, these experiences are often the few, sparse moments of conscious recall of an abduction. The individual does not know it at the time, but he has been an unwilling participant in an extraordinary event. In such a situation the only real clue would be a quick glance at the time. Our hypothetical hiker looks down at his watch and realizes that over an hour has passed, completely unaccounted for. Abductees and UFO researchers contend that it is within such an hour of so-called "missing time" that alien entities from who knows where conduct examinations and experiments on us hapless humans. Once the aliens have finished their tasks, these diligent ET scientists wipe our conscious memories and return us safely to Earth. But their technology is apparently not perfect, because some Earth dwellers have allegedly been able to uncover these supposedly lost memories through hypnotic regression. This book takes a look at some of these startling claims of alien-human interactions that the world has come to know as "alien abductions." This is not an attempt to prove the veracity of these claims, but simply to present them as they are reported, so that readers can decide for themselves. Scroll back up and click the BUY NOW button at the top right side of this page to order your copy now!

Witnessed Simon and Schuster

They are tiny. They are tall. They are gray. They are green. They survey our world with enormous glowing eyes. To conduct their shocking experiments, they creep in at night to carry humans off to their spaceships. Yet there is no evidence that they exist at all. So how could anyone believe he or she was abducted by aliens? Or want to believe it? To answer these questions, psychologist Susan Clancy interviewed and evaluated "abductees"--old and young, male and female, religious and agnostic. She listened closely to their stories--how they struggled to explain something strange in their remembered experience, how abduction seemed plausible, and how, having suspected abduction, they began to recollect it, aided by suggestion and hypnosis. Clancy argues that abductees are sane and intelligent people who have unwittingly created vivid false memories from a

toxic mix of nightmares, culturally available texts (abduction reports began only after stories of extraterrestrials appeared in films and on TV), and a powerful drive for meaning that science is unable to satisfy. For them, otherworldly terror can become a transforming, even inspiring experience. "Being abducted," writes Clancy, "may be a baptism in the new religion of this millennium." This book is not only a subtle exploration of the workings of memory, but a sensitive inquiry into the nature of belief.

The Most Startling Cases of Human Alien Contact Ever Reported Harper Collins

Chronicles the alien abduction case surrounding Linda Cortile, who remembered her experience while under hypnosis and who offered a bizarre explanation to several independent testimonies of a strange incident near where she was taken. Reprint.

Abduction: Human Encounters with Aliens ReadHowYouWant.com

Kelly Cahill was a young country housewife and mother of three. Driving home through the Dandenongs from a barbecue one night in 1993, she spotted a bright light in a field. Pulling off the road she saw, in the distance, three other people approaching the light. Later both she and the others independently reported having a terrifying encounter with mysterious beings. Their reports were eerily similar. This is Cahill's account of the event that has been taken seriously by researchers and authorities.

The Messengers Abc-Clio Incorporated

Close Encounters of the Fourth Kind: cases in which personal contact between an individual or individuals is initiated by the "occupants" of the spacecraft. Such contact may involve the transportation of the individual from his or her terrestrial surroundings into the spacecraft, where the individual is communicated with and/or subjected to an examination before being returned. One might expect that a "scientific conference" devoted to people who have reported being kidnapped by "little green men" would be dismissed out of hand. But C.D.B. Bryan, the greatly admired journalist and author of *Friendly Fire*, did not dismiss it: the conference was to be held at the Massachusetts Institute of Technology and would have as its chairmen a Pulitzer Prize-winning Harvard psychiatry professor and a professor of physics from M.I.T. Bryan attended the conference throughout its five days. He approached the subject with no prior stand, no agenda, and an open (if slightly skeptical) mind. As the conference progressed, he was astonished by the quality of the stories told by the hundreds of men and women who came forward hesitantly and reluctantly with their utterly amazing—and utterly convincing—accounts of having been abducted and then

examined aboard extraterrestrial spacecraft by spindly limbed, telepathic gray creatures with outsized foreheads dominated by huge, compelling, tear-shaped black eyes. What most astonished Bryan were the similarities found again and again in these accounts and the consistency of their details. It is here that the heart of the mystery lies: as the Harvard professor John E. Mack asked at the conference, "If what the abductees are saying isn't happening to them, then what is?" This question—and the possible answers—are at the center of this richly explicit, serious, and riveting book. Bryan recreates the conference. He interviews ufology's most prominent psychiatrists, psychologists, hypnotherapists, researchers, physicists, physicians, and folklorists. He interweaves throughout the testimony of the abductees themselves, who tell us their stories in chilling detail. He presents, in depth, the Close Encounter experiences of two women whose stories he tells on the basis of both their spontaneous recollections of the events and their memories that were retrieved through sessions of hypnosis of which Bryan himself was a witness. Finally, Bryan examines the current theories—psychological, psychiatric, medical, parapsychological—that have been put forward by the unconvinced to explain the abduction phenomenon. Are the abductees suffering from some sort of false memory syndrome? . . . a multiple or dissociative personality disorder? . . . Are they fantasy-prone? *Close Encounters of the Fourth Kind* is a detailed, objective exploration—the most concrete to date—of one of the enduring and amazing mysteries of our time. It is a book that will equally fascinate believers and nonbelievers.

Communion Harvard University Press

The 1961 UFO abduction of Betty and Barney Hill stirred worldwide interest, because of the book *The Interrupted Journey*, the subsequent media coverage, and a 1975 TV movie. The case is mentioned in almost all UFO abduction books. It also became a target for debunkers, who still attack it today. But the complete story of what really happened that day, its effect on the participants, and the findings of investigators has never been told . . . until now. In *Captured!*, you'll get an insider's look at the alien abduction, previously unpublished information about the lives of the Hills before and after Barney's death in 1969, their status as celebrities, Betty's experiences as a UFO investigator, and other activities before her death in 2004. Kathleen Marden, Betty Hill's niece, shares details from her discussions with Betty and from the evidence of the UFO abduction. She also looks at the Hills' riveting hypnosis sessions about their time onboard the spacecraft. In addition, coauthor, physicist, and ufologist Stanton T. Friedman, the original civilian investigator of the Roswell Incident, reviews and refutes the arguments of those who have attacked the Hill case, as well as the star map that Betty Hill saw inside the craft and later recreated.
