3000. That's the number of marketing messages the average American confronts on a daily basis from TV commercials, magazine and newspaper print ads, radio commercials, pop-up ads on gaming apps, pre-roll ads on YouTube videos, and native advertising on mobile news apps. These commercial messages are so pervasive that we cannot help but be affected by perpetual come-ons to keeping buying. Over the last decade, advertising has become more devious, more digital, and more deceptive, with an increasing number of ads designed to appear to the untrained eye to be editorial content. It's easy to see why. As we have become smarter at avoiding ads, advertisers have become smarter about disguising them. Mara Einstein exposes how our shopping, political, and even dating preferences are unwittingly formed by brand images and the mythologies embedded in them. *Advertising: What Everyone Needs to Know(R)* helps us combat the effects of manipulative advertising and enables the reader to understand how marketing industries work in the digital age, particularly in their uses and abuses of "Big Data." Most importantly, it awakens us to advertising's subtle and not-so-subtle impact on our lives--both as individuals and as a global society. What ideas and information are being communicated to us--and to what end?

As environmental legislation grows more stringent in response to the escalating climate crisis, some of the world's largest corporations have adopted fraudulent mechanisms to keep their margins of profit, and achieve improper competitive advantage. The Internet has ushered in a new era in the economies of networking. With the increasing need for optimization based on these network economies, the IT-based e-business has become a platform for study as well as daily practice. In a similar vein, global warming has raised many issues which come into conflict with traditional research and policies. The Internet revolution has also shifted our society from a government- and company-led economy to a 'netizen'- and consumer-led business

world. This book enlightens us on why a harmonized participation of traditional network members or interested groups is necessary and how we can create values from diverse fields of interests and objectives, including the corporate social responsibility (CSR) and eco-friendly productivity. Digital Business and Sustainable Development integrates the platforms from these two fields of study based on the comparative analysis of Asian and other developing countries.
