This is the true story of a young Eastern European girl turned exotic dancer with a twist of humor and

sarcasm. Anna, a teenage runaway, decides to take her chances and make it on her own, away from abuse at the hands of her father. Ill-equipped for the complexity of life ahead, Anna ends up alone and destitute in Austria. When she meets her future husband, Victor, Anna is easily persuaded to opt for a fresh start in faraway Canada, away from everything dear and familiar. Things become even harsher and more complicated with the arrival of a baby and the young couple struggles to make ends meet. When Anna accidentally stumbles upon an opportunity to make a living as an exotic dancer, she grits her teeth and takes the bull by the horns. After a predictable divorce from her premature marriage, Anna raises her daughter as a single mom and works her way up from a stripper to the club's manager. Take an inside look at the adult entertainment industry and meet the colorful characters Anna encounters throughout her two decades in the business.

Based on a four-year study, Manga High explores the convergence of literacy, creativity, social development, and personal identity in one of New York City's largest high schools. Since 2004, students at Martin Luther King, Jr., High School in Manhattan have been creating manga—Japanese comic books. They write the stories, design the characters, and publish their works in print and on the Internet. These students—African-American and Latino teenagers—are more than interested in the art and medium of manga. They have become completely engrossed in Japanese language, culture, and society. Manga High is highlighted by reproductions and content analysis of students' original art and writing. An appendix includes guidelines for educators on starting a comic book club.

Newark, N.J. : Bliss MMIX is a RISC computer designed by Don Knuth to illustrate machine-level aspects of programming. In the author's book series "The Art of Computer Programming", MMIX replaces the 1960s-style machine MIX. A particular goal in the design of MMIX was to keep its machine language simple, elegant, and easy to learn. At the same time, all of the complexities needed to achieve high performance in practice are taken into account. This book constitutes a collection of programs written in CWEB that make MMIX a virtual reality. Among other utilities, an assembler converting MMIX symbolic files to MMIX objects and two simulators executing the programs in given object files are provided. The latest version of all programs can be downloaded from MMIX's home page. The book provides a complete documentation of the MMIX computer and its assembly language. It also presents mini-indexes, which make the programs much easier to understand. A corrected reprint of the book has been published in August 2014, replacing the version of 1999.

Twelve Years a Slave
Lindhardt og Ringhof
Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but

vitaly important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

I Will Survive is the story of Gloria Gaynor, America's "Queen of Disco." It is the story of riches and fame, despair, and finally salvation. Her meteoric rise to stardom in the mid-1970s was nothing short of phenomenal, and hits poured forth that pushed her to the top of the charts, including "Honey Bee," "I Got You Under My Skin," "Never Can Say Goodbye," and the song that has immortalized her, "I Will Survive," which became a #1 international gold seller. With that song, Gloria heralded the international rise of disco that became synonymous with a way of life in the fast lane - the sweaty bodies at Studio 54, the lines of cocaine, the indescribable feeling that you could always be at the top of your game and never come down. But down she came after her early stardom, and problems followed in the wake, including the death of her mother, whose love had anchored the young singer, as well as constant battles with weight, drugs, and alcohol. While her fans always imagined her to be rich, her personal

finances collapsed due to poor management; and while many envied her, she felt completely empty inside. In the early 1980s, sustained by her marriage to music publisher Linwood Simon, Gloria took three years off and reflected upon her life. She visited churches and revisited her mother's old Bible. Discovering the world of gospel, she made a commitment to Christ that sustains her to this day.

Harold D. Lasswell is arguably the quintessential face of political science to the larger public of the past century. However, there is a side to Lasswell less well known, but of special importance in this day and age: the place of the profession of politics as an academic activity. This book, written at the start of the culture wars thirty years ago, outlines the basic core position of political science practitioners. It helps to explain why the field kept its collective cool, when other social science professionals veered to more extreme activist positions. *The Future of Political Science* grew out of the phenomenally rapid expansion of the study of

government in the United States and elsewhere. The study of professionalism among physical scientists, lawyers, engineers, etc. was not matched by such internal examination within the social sciences until much later.

Lasswell's overview centered on developments in the United States. There unfettered study of government reached unprecedented heights in the final stage of the twentieth century. The key concept of this volume, one that continues to inform discourse, is the relationship of political science as a mechanism for the study and teaching of the political system to the field as a tool of the Establishment. This concern grew in the wake of a variety of scandals and secret support sponsored by both government and non-government organizations alike. *The Future of Political Science* covers areas ranging from membership size and disparities, intervention scenarios in world events, the nature of creativity in political research collaboration in projects with the other social sciences, and the location of scientific centers of

gravity in the study of politics. Because of Lasswell's works we have a field of the political science of knowledge as well as the sociology of knowledge. Harold D. Lasswell served as Ford Foundation Professor of the Social Sciences at Yale University, Distinguished Professor of Policy Sciences at John *The Cogito in Husserl's Philosophy* iUniverse Introduces the authors' philosophy of Internet security, explores possible attacks on hosts and networks, discusses firewalls and virtual private networks, and analyzes the state of communication security. This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's

book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

A free open access ebook is available upon publication. Learn more at www.luminosoa.org. Persian is one of the great lingua francas of world history. Yet despite its recognition as a shared language across the Islamic world and beyond, its scope, impact, and mechanisms remain underexplored. A world historical inquiry into pre-modern cosmopolitanism, *The Persianate World* traces the reach and limits of Persian as a Eurasian language in a comprehensive survey of

its geographical, literary, and social frontiers. From Siberia to Southeast Asia, and between London and Beijing, this book shows how Persian gained, maintained, and finally surrendered its status to imperial and vernacular competitors. Fourteen essays trace Persian's interactions with Bengali, Chinese, Turkic, Punjabi, and other languages to identify the forces that extended "Persographia," the domain of written Persian. Spanning the ages of expansion and contraction, *The Persianate World* offers a critical survey of both the supports and constraints of one of history's key languages of global exchange.

Tree Shaker CUP Archive Henri Lefebvre has considerable claims to be the greatest living philosopher. His work spans some sixty years and includes original work on a diverse range of subjects, from dialectical materialism to architecture, urbanism and the experience of everyday life. *The Production of Space* is his major philosophical work and its translation has been long awaited by scholars in many different fields. The book is a search for a reconciliation

between mental space (the space of the philosophers) and real space (the physical and social spheres in which we all live). In the course of his exploration, Henri Lefebvre moves from metaphysical and ideological considerations of the meaning of space to its experience in the everyday life of home and city. He seeks, in other words, to bridge the gap between the realms of theory and practice, between the mental and the social, and between philosophy and reality. In doing so, he ranges through art, literature, architecture and economics, and further provides a powerful antidote to the sterile and obfuscatory methods and theories characteristic of much recent continental philosophy. This is a work of great vision and incisiveness. It is also characterized by its author's wit and by an anecdote, as well as by a deftness of style which Donald Nicholson-Smith's sensitive translation precisely captures. [Competition Driving](#) Pan Macmillan This introduction to the theory of complex manifolds covers the most important branches and methods in complex
