In this exciting new book, experienced author, professor, and teacher Gregory J. Privitera—2013 Advisor of the Year at St. Bonaventure University and recipient of the SBU Award for Professional Excellence in teaching in 2014—draws on his extensive expertise to give students a step-by-step plan for success in preparing for and applying to graduate school. Broad in scope and rich in detail, *Getting Into Graduate School* includes insights into how graduate school selection committees decide on candidates, a concrete freshman-to-senior-year plan, and samples of application materials, resumes, and cover letters. This empowering book provides everything students in psychology and the behavioral sciences need to map their course to academic and professional success. "Privitera helps students to keep their eye on a goal and a prize from day one of college, and he helps them to understand that long-term thinking can enhance all areas of life." —Ramani Durvasula, California State University, Los Angeles "The single most impressive aspect...is the concrete plan outlined for how students can plan for applying to graduate school, as early as their freshman year." —Stacy Bender, Alfred University

The field of educational psychology draws from a variety of diverse disciplines including human development across the life span, measurement and statistics, learning and motivation, and teaching. And within these different disciplines, many other fields are featured including psychology, anthropology, education, sociology, public health, school psychology, counseling, history, and philosophy. In fact, when taught at the college or university level, educational psychology is an ambitious course that undertakes the presentation of many different topics all tied together by the theme of how the individual can best function in an "educational" setting, loosely defined as anything from pre-school through adult education. Educational psychology can be defined as the application of what we know about learning and motivation, development, and measurement and statistics to educational settings (both school- and community-based).
