Learn how to design and develop robotic process automation solutions with Blue Prism to perform important tasks that enable value creation in your work Key Features Develop robots with Blue Prism Automate your work processes with Blue Prism Learn basic skills required to train a robot for process automation Book Description Robotic process automation is a form of business process automation where user-configured robots can emulate the actions of users. Blue Prism is a pioneer of robotic process automation software, and this book gives you a solid foundation to programming robots with Blue Prism. If you've been tasked with automating work processes, but don't know where to start, this is the book for you! You begin with the business case for robotic process automation, and then move to implementation techniques with the leading software for enterprise automation, Blue Prism. You will become familiar with the Blue Prism Studio by creating your first process. You will build upon this by adding pages, data items, blocks, collections, and loops. You will build more complex processes by learning about actions, decisions, choices, and calculations. You will move on to teach your robot to interact with applications such as Internet Explorer. This can be used for spying elements that identify what your robot needs to interact with on the screen. You will build the logic behind a business objects by using read, write, and wait stages. You will then enable your robot to read and write to Excel and CSV files. This will finally lead you to train your robot to read and send emails in Outlook. You will learn about the Control Room, where you will practice adding items to a queue, processing the items and updating the work status. Towards the end of this book you will also teach your robot to handle errors and deal with exceptions. The book concludes with tips and coding best practices for Blue Prism. What you will learn Learn why and when to introduce robotic automation into your business processes Work with Blue Prism Studio Create automation processes in Blue Prism Make use of decisions and choices in your robots Use UI

Automation mode, HTML mode, Region mode, and spying Learn how to raise exceptions Get the robot to deal with errors Learn Blue Prism coding best practices Who this book is for The book is aimed at end users such as citizen developers who create business processes, but may not have the basic programming skills required to train a robot.No experience of BluePrism is required.

This book introduces the reader to the visible memorabilia of science and scientists in all the five boroughs of New York City - statues, busts, plaques, buildings, and other artifacts. In addition, it extends to some scientists and institutions currently operating in the city. New York has been known as a world center of commerce, finance, communications, transportation, and culture, but it also is a world center in science. The city is home to renowned universities and research laboratories, a museum of natural history and other museums related to science, a science academy, historical societies, botanical gardens and zoos, libraries, and a Hall of Science as well as a large number of world-renowned scientists. The book pays special attention to the role of this city in welcoming persecuted scientists and letting African-American and women scientists thrive. The book is presented in an informative and entertaining way, dotted with scientific gossip and anecdotes, and can be enjoyed even without the reader's actual presence in the city. Over eight hundred photographs illustrate the book. They may induce the reader to make their own discoveries in New York.

The official, illustrated English Heritage guide, with over 950 of London's most interesting inhabitants and their former homes brought to life. 'If people want to find out about our London history, they can go and stand for a minute outside and look at a house where we know that person has lived - I think that's just wonderful.' Dame Judi Dench Blue plaques, bearing names both familiar and intriguing, can be found all across the capital. From BOB MARLEY to ALAN TURING, VIRGINIA WOOLF to VINCENT VAN GOGH, MAHATMA GANDHI to EMMELINE PANKHURST, the plaques celebrate an incredible range of London's past residents. Whether they be scientists, sports stars, artists, actors, inventors or politicians this revised and updated English Heritage guide reveals, with wit and insight, the stories of London's most extraordinary men and women and the homes in which they lived. 'The blue plaque helps us make poetry from the everyday, infusing the hard materials of the city with the feeling of lives lived: a memory of the past making the present richer.' Antony Gormley, Guardian

More than 100,000 entrepreneurs rely on this book for detailed, step-by-step instructions on building successful, scalable, profitable startups. The National Science Foundation pays hundreds of startup teams each year to follow the process outlined in the book, and it's taught at Stanford, Berkeley, Columbia and more than 100 other leading universities worldwide. Why? The Startup Owner's Manual guides you, step-by-step, as you put the Customer Development process to work. This method was created by renowned Silicon Valley startup expert Steve Blank, co-creator with Eric Ries of the "Lean Startup" movement and tested and refined by him for more than a decade. This 608-page how-to guide includes over 100 charts, graphs, and diagrams, plus 77 valuable checklists that guide you as you drive your company toward profitability. It will help you: • Avoid the 9 deadly sins that destroy startups' chances for success • Use the Customer Development method to bring your business idea to life • Incorporate the Business Model Canvas as the organizing principle for startup hypotheses • Identify your customers and determine how to "get, keep and grow" customers profitably • Compute how you'll drive your startup to repeatable, scalable profits. The Startup Owner's Manual was originally published by K&S Ranch Publishing Inc. and is now available from Wiley. The cover, design, and content are the same as the prior release and should not be considered a new or updated product.

Doing Meta-Analysis with R: A Hands-On Guide serves as an accessible introduction on how meta-analyses can be conducted in R. Essential steps for meta-analysis are covered, including calculation and pooling of outcome measures, forest plots, heterogeneity diagnostics, subgroup analyses, meta-regression, methods to control for publication bias, risk of bias assessments and plotting tools. Advanced but highly relevant topics such as

network meta-analysis, multi-three-level meta-analyses, Bayesian meta-analysis approaches and SEM meta-analysis are also covered. A companion R package, dmetar, is introduced at the beginning of the guide. It contains data sets and several helper functions for the meta and metafor package used in the guide. The programming and statistical background covered in the book are kept at a non-expert level, making the book widely accessible.

Features • Contains two introductory chapters on how to set up an R environment and do basic imports/manipulations of meta-analysis data, including exercises • Describes statistical concepts clearly and concisely before applying them in R • Includes step-by-step guidance through the coding required to perform meta-analyses, and a companion R package for the book
