Unlock the Astonishing Power of Your DNA for Optimum Health and Well-Being Shortcut Edition

What if instead of being victims of our heredity, we could rewrite the script of our lives through the energy of our beliefs? In the past, we've been taught that living beings are like machines run by biochemicals and DNA, explains Dr.

Bruce H. Lipton. What we now know is that our entire biology is shaped by the intelligence of each of our 50 trillion cells. And the single most important way to influence them is through the power of our thoughts. Since the publication of *The Biology of Belief*, Dr. Lipton has been widely embraced as one of the most accessible and knowledgeable voices of new biology. With this dynamic and engaging lecture, Dr. Lipton offers a potent breakdown of the book and a rare window into his personal experiences developing this theory. You'll feel like you're in attendance at a one-on-one author talk as Dr. Lipton explains his ideas and theories about: The philosophical roots of science, and how genetic determination rose to become the dominant theory; The relationship between genes and proteins, and how this changes our understanding of human behavior; The science of epigenetics--why biologists must look beyond DNA to find out what shapes life--and how it affects you; The differences between the conscious and subconscious minds, and how they function together; The importance of the fetal environment, and how our parents act as "genetic engineers" in our subconscious development; The chemistry of stress and love--how your body, mind, and immune system change with each emotional state; Turning the immense power of your subconscious mind into your most valuable tool for health and well-being, and much more. Even if you only have a basic knowledge of biology, Dr. Lipton will evolve your understanding with his thoughtful explanations and real-life examples. Join this leading voice in the field of epigenetics as he takes you on a journey into the world under the microscope, through the ages of evolution, and into the miracle that is

your own life.

Discover the secret to manifesting and maintaining the Honeymoon Effect—a state of bliss, passion, energy, and health in the early stages of a great love—throughout your entire life. Think back on the most spectacular love affair of your life—the Big One that toppled you head over heels. For most, it was a time of heartfelt bliss, robust health, and abundant energy. Life was so beautiful that you couldn't wait to bound out of bed in the morning to experience more Heaven on Earth. It was the Honeymoon Effect that was to last forever.

Unfortunately for most, the Honeymoon Effect is frequently short lived. Imagine what your planetary experience would be like if you could maintain the Honeymoon Effect throughout your whole life. Bruce H. Lipton, Ph.D., best-selling author of *The Biology of Belief*, describes how the Honeymoon Effect was not a chance event or a coincidence, but a personal creation. This book reveals how we manifest the Honeymoon Effect and the reasons why we lose it. This knowledge empowers readers to create the honeymoon experience again, this time in a way that ensures a happily-ever-after relationship that even a Hollywood producer would love. With authority, eloquence, and an easy-to-read style, Lipton covers the influence of quantum physics (good vibrations), biochemistry (love potions), and psychology (the conscious and subconscious minds) in creating and sustaining juicy loving relationships. He also asserts that if we use the fifty trillion cells that live harmoniously in every healthy human body as a model, we can create not just honeymoon relationships for couples but also a

“super organism” called humanity that can heal our planet.

The Biology of Belief is a ground breaking work in the field of new biology. Former medical school professor and research scientist Bruce H. Lipton PhD presents his experiments, and those of other leading-edge scientists, which examine in great detail the mechanisms by which cells receive and process information. The implications of this research radically change our understanding of life, showing that genes and DNA do not control our biology; instead, DNA is controlled by signals from outside the cell, including the energetic messages emanating from our positive and negative thoughts. This profoundly hopeful synthesis of the latest and best research in cell biology and quantum physics has been hailed as a major breakthrough, showing that our bodies can be changed as we retrain our thinking.

Tranceformers: Shamans of the 21st Century is the true story of this author's contact with a "dead" optics physicist

colleague and the telepathic communication that sent him searching for scientific answers to his spiritual questions. Harper draws from this deep well of wisdom: astrology, biology, near-death experiences, paranormal psychology, quantum physics as well as Egyptian and Mayan cosmology overall. He does an excellent job of synthesizing massive amounts of information, making this shift of the ages comprehensible to the general reader. Clearly this is a necessary primer to understand the coming apocalypse of biblical proportions in consciousness, climate, culture, and civilization. However, the theme of this book is that by learning to use trance- the techniques employed by mystics, prophets, and shamans- one can unlock the mysteries of existence for themselves. Indeed this is the big idea behind the *Eternal Return of the Sun of God in 2012: Self-Empowerment. 10th Anniversary Edition* Hay House, Inc

Radical changes are afoot in medicine as we build stronger bridges between science and spirituality. In *CONSCIOUS MEDICINE* Gill Edwards explains that mind and body are inseparable and that emotions are crucial in health and disease. Her new approach to healthcare is based on the latest research into the transformative power of consciousness, energy and the bodymind. She explains how, when you break your old habits of thought, you can not only reverse disease processes and heal injuries but also attract more positive events and circumstances into your life. Chapters cover 'miracles' in health and why our current medical model is limiting, how negative thoughts activate the stress response in the body which eventually makes us ill, how the body speaks to us symbolically through symptoms and illness, how to break free from limiting

patterns and create a new health-full future. Always thought-provoking and inspiring, this is an accessible, practical and joyous book.

Summary of Bruce Lipton's The Biology of Belief by Swift Reads Simon and Schuster

Life is quite normal for six unsuspecting high school students, until one day they each receive a life-altering gift that launches them onto an irreversible path of nonstop adventure. Now they find themselves battling the cruel inhabitants of a sinister castle, outwitting a grievous giant, and fleeing a destructive tempest, among other incredible events that are all too common in their new world. Soon the six friends recognize that the most important battle is taking place inside the mind. When their new gifts are properly used in conjunction with the power of their thoughts; super powers and super solutions appear to be supplied... precisely when needed. But the mind is a powerful tool and difficult to control... mastering it is their ultimate adventure.

For many years, Dr. Wayne W. Dyer's fans have wondered when he would write a memoir. Well, after four decades as a teacher of self-empowerment and the best-selling author of more than 40 books, Wayne has finally done just that! However, he has written it in a way that only he can—with a remarkable take-home message for his longtime followers and new readers alike—and the result is an exciting new twist on the old format. Rather than a plain old memoir, Wayne has gathered together quantum-moment recollections. In this revealing and engaging book, Wayne shares dozens of events from his life, from the time he was a little boy in Detroit up to present

day. In unflinching detail, he relates his vivid impressions of encountering many forks in the road, taking readers with him into these formative experiences. Yet then he views the events from his current perspective, noting what lessons he ultimately learned, as well as how he has made the resulting wisdom available to millions via his lifelong dedication to service. As a reader, you will feel as if you are right there with Wayne, perusing his personal photo album and hearing about his family, his time in the service, how he writes his best-selling books, and so much more. In the process, you'll be inspired to look back at your own life to see how everything you have experienced has led you to where you are right now. Wayne has discovered that there are no accidents. Although we may not be aware of who or what is "moving the checkers," life has a purpose, and each step of our journey has something to teach us. As he says, "I wasn't aware of all of the future implications that these early experiences were to offer me. Now, from a position of being able to see much more clearly, I know that every single encounter, every challenge, and every situation are all spectacular threads in the tapestry that represents and defines my life, and I am deeply grateful for all of it." *I Can See Clearly Now* is an intimate look at an amazing teacher, but it also holds the key for seekers on a personal path of enlightenment. Wayne offers up his own life as an example of how we can all recognize the hand of the Divine steering our individual courses, helping us accomplish the mission we came here to fulfill.

In *Subud the Coming New Age of Reality*, author Simon Monbaron, a self-

proclaimed Subud "zealot", shares the knowledge, wisdom and experience he has gained from forty years of receiving the spiritual training known as the "latihan kejiwaan" of Subud. This massive (594 pages) tome is not just for Subud members, but for anyone who seeks the reality that lies beyond the material world. At last, here is a book I can give to friends and family members who are curious about what I do when I go off to receive the latihan, but are not yet ready to jump into the deep end to find out for themselves! For the merely curious, Monbaron's book recounts the history of Subud, and how it grew from a small group in Indonesia to a world-wide spiritual phenomenon. It tells the story of Muhammad Subuh Sumohadiwidjojo, an unremarkable government clerk whose life changed when a ball of light entered the top of his head when he was out for an evening stroll. And it discusses many aspects of the latihan, which is the central core of Subud. For those who are considering joining Subud, the Monbaron's book provides information regarding what this involves, as well as a detailed description of the Subud organization. Readers may also skip around and find out what Bapak had to say about topics as varied as suicide, feminism, reincarnation, sex, drug use, and many other questions and issues with which people struggle. Whether you use it as a reference manual, a source of fascinating anecdotes and spiritual insights, or a way to learn about a spiritual path of profound power and simplicity, *Subud the Coming New Age of Reality* is a treasure chest of immense value.

Unleashing the Power of

Consciousness, Matter & Miracles
 It has been ten years since the publication of *The Biology of Belief*, Bruce Lipton's seminal book on the relationship between mind and body that changed the way we think about our lives, our health, and our planet. During that time, research in this field has grown exponentially - Lipton's groundbreaking experiments have now been endorsed by more than a decade of rigorous scientific study. In this greatly expanded edition, Lipton, a former medical school professor and research scientist, explores his own experiments and those of other leading-edge scientists that have unraveled in ever greater detail how truly connected the mind, body, and spirit are. It is now widely recognized that genes and DNA do not control our biology. Instead, they are controlled by signals from outside the cell, including energetic messages emanating from our thoughts. This profoundly hopeful synthesis of the latest and best research in cell biology and quantum physics puts the power to create a healthy, joyous life back in our own hands. When we transform our conscious and subconscious thoughts, we transform our lives, and in the process help humanity evolve to a new level of understanding and peace.

The *Believing Brain* is bestselling author Michael Shermer's comprehensive and provocative theory on how beliefs are born, formed, reinforced, challenged, changed, and extinguished. In this work synthesizing thirty years of research, psychologist, historian of science, and the world's best-known skeptic Michael Shermer upends the traditional thinking about how humans form beliefs about the world. Simply put, beliefs come first

and explanations for beliefs follow. The brain, Shermer argues, is a belief engine. From sensory data flowing in through the senses, the brain naturally begins to look for and find patterns, and then infuses those patterns with meaning. Our brains connect the dots of our world into meaningful patterns that explain why things happen, and these patterns become beliefs. Once beliefs are formed the brain begins to look for and find confirmatory evidence in support of those beliefs, which accelerates the process of reinforcing them, and round and round the process goes in a positive-feedback loop of belief confirmation. Shermer outlines the numerous cognitive tools our brains engage to reinforce our beliefs as truths. Interlaced with his theory of belief, Shermer provides countless real-world examples of how this process operates, from politics, economics, and religion to conspiracy theories, the supernatural, and the paranormal. Ultimately, he demonstrates why science is the best tool ever devised to determine whether or not a belief matches reality.

Harmony

The cutting edge of neurolinguistics meets the spiritual wisdom of the ages in a handbook of key words that literally rewire our brains. New discoveries in biology and the neurosciences are revealing how the structure of language-the words we think and speak-can actually change the way the neurons in our brains and hearts connect. But our ancestors understood this connection intuitively, thousands of years ago. They created specific word-patterns to provide comfort, healing, strength, and inner power in difficult times, and they encoded these powerful words in prayers, chants, mantras, hymns, and sacred writings to preserve them for

future generations. Now beloved teacher and thought leader Gregg Braden cracks the code and puts these powerful words in your hands. Perfect as a pocket guide, a reference for spiritual study, or a gift to someone you love, this elegant, compact book contains Wisdom Codes that cut to the core of life's greatest tests, most challenging demands, and hardest lessons. You'll find chapters devoted to healing from loss and grief, facing your unspoken fears, finding certainty in the face of uncertain choices, and finding forgiveness, as well as ancient parables that offer a "fast track" to unraveling life's deepest mysteries. Each Wisdom Code—distilled from a quote, a scripture passage, or a parable—is accompanied by a brief discussion of what the code means, why it's important, and how to apply it in your life.

This 10th-anniversary edition of Bruce Lipton's best-selling book *The Biology of Belief* has been updated to bolster the book's central premise with the latest scientific discoveries—and there have been a lot in the last decade. *The Biology of Belief* is a groundbreaking work in the field of new biology. Timeless Healing Piatkus

We've all heard stories of people who've experienced seemingly miraculous recoveries from illness, but can the same thing happen for our world? According to pioneering biologist Bruce H. Lipton, it's not only possible, it's already occurring. In *Spontaneous Evolution*, this world-renowned expert in the emerging science of epigenetics reveals how our changing understanding of biology will help us navigate this turbulent period in our planet's history and how each of us can participate in this global shift. In collaboration with political philosopher Steve Bhaerman, Dr. Lipton invites readers to reconsider: •the "unquestionable" pillars of biology, including random evolution, survival of the fittest, and the role of DNA; •the relationship between mind and matter; •how our beliefs about nature and human nature shape our politics, culture, and individual lives; and •how each of us can become planetary "stem cells" supporting the health and growth of our world. By questioning the old beliefs that

got us to where we are today and keep us stuck in the status quo, we can trigger the spontaneous evolution of our species that will usher in a brighter future. .
