This edition of I'M HERE TO WIN is an enhanced e-book with exclusive embedded video from the author. In I'M HERE TO WIN, Chris "Macca" McCormack opens his playbook and reveals everything it takes-mind, body, and

spirit-to become a champion. Now he shares the story of his triumphs and the never-say-die dedication that has made him the world's most successful triathlete. In 2010, at the age of 37, Macca beat the odds and won the Ford Ironman World Championship in Kona, Hawaii for a second time in what many called the most dramatic finish in the race's history. Macca's journey to athletic greatness is more than just one of physical perseverance. After coming in fourth in Hawaii in 2009, Macca returned to the island on a mission: He was there to win. A game plan containing a new strategic approach to winning brought him first across the finish line. Chris McCormack has dedicated his life to training for-and winning-the Ironman Hawaii, one of the most grueling tests of mental and physical endurance in the world. The race challenges athletes to swim 2.4 miles, bike 112 miles, and run a full marathon, 26.2 miles, using all their strength and willpower to overcome the incredibly harsh conditions. In *I'M HERE TO WIN* Macca provides concrete training advice for everyone-from weekend warriors who casually compete to seasoned veterans who race every week to armchair athletes looking for an extra push-and provides insight into the mind of a great champion with excitement and inspiration on every page.

Most serious runners don't realize their potential. They simply stop getting faster and don't understand why. The reason is simple: most runners are unable to run by feel. The best elite runners have learned that the key to faster running is to hear what their bodies are telling them. Drawing on new research on endurance sports, best-selling author Matt Fitzgerald explores the practices of elite runners to explain why their techniques can be effective for all runners. *RUN: The Mind-Body Method of Running by Feel* will help runners reach their full potential by teaching them how to train in the most personalized and adaptable way. Fitzgerald's mind-body method will revolutionize how runners think about training, their personal limits, and their potential. *RUN* explains how to interpret emotional and physical messages like confidence, enjoyment, fatigue, suffering, and aches and pains. *RUN* guides readers toward the optimal balance of intensity and enjoyment, volume and recovery, repetition and variation. As the miles add up, runners will become increasingly confident that they are doing the right training on the right day, from one season to the next. *RUN* marks the start of a better way to train. The culmination of science and personal experience, the mind-body method of running by feel will lead runners to faster, more enjoyable

training and racing.

Hunter Allen and Andy Coggan, PhD have completely revised the book that made power meters understandable for amateur and professional cyclists and triathletes. Power meters have become essential tools for competitive cyclists and triathletes. No training tool can unlock as much speed and endurance as a power meter--for those who understand how to interpret their data. A power meter displays and records exactly how much energy a cyclist expends, which lends unprecedented insight into that rider's abilities and fitness. With the proper baseline data, a cyclist can use a power meter to determine race strategy, pacing, and tactics. *Training and Racing with a Power Meter* makes it possible to exploit the incredible usefulness of the power meter by explaining how to profile strengths and weaknesses, measure fitness and fatigue, optimize workouts, time race readiness, and race using power. This new edition: Enables athletes to predict future performance and time peak form
 Introduces fatigue profiling, a new testing method to pinpoint weaknesses
 Includes two training plans to raise functional threshold power and time peaks for race day
 Offers 75 power-based workouts tuned for specific training goals
 This updated edition also includes new case studies, a full chapter on triathlon training and racing, and improved 2-color charts and tables throughout. *Training and Racing with a Power Meter*, will continue to be the

definitive guide to the most important training tool ever developed for endurance sports.

Sometimes in life, you are hit by an unexpected wave of change. A change that will forcibly stir you out of your cocooned comfort zone. You may face despair, loneliness and depression. This is not a dead end but just a test to rediscover yourself and unleash your inner potential. I wasn't ready to put myself through a gruelling training regime. At the same time I had to conquer my fear of swimming in open water and lay those inner demons to rest. When I completed my first Sprint distance Triathlon, I was elated. It motivated me to pursue this sport called Triathlon for which I developed passion over time. Ultimately, I followed my dream of crossing the finish line of the Ironman 70.3, to consider myself worthy of something. For those of you who are thinking about getting into this sport, this book will motivate you to take that plunge. And for the rest of us triathletes, you will find a part of yourself in the chapters of this book. Happy reading and keep 'Tri'-ing!

The Brave Athlete solves the 13 most common mental conundrums athletes face in their everyday training and in races. You don't have one brain—you have three; your ancient Chimp brain that keeps you alive, your modern Professor brain that navigates the civilized world, and your Computer brain that accesses your memories and runs your habits (good and bad). They fight for control all the time and that's when bad things happen; you get crazy nervous before a race, you choke under pressure, you quit when the going gets tough, you make dumb mistakes, you worry about how you look. What if you could stop the thoughts and feelings you don't want? What if you could feel confident, suffer like a hero, and handle any stress? You can. The Brave Athlete from Dr. Simon Marshall and Lesley Paterson will help you take control of your brain so you can train harder, race faster, and better enjoy your sport. Dr. Marshall is a sport psychology expert who trains the brains of elite professional athletes. Paterson is a three-time world champion triathlete and coach. Together, they offer this innovative, brain training guide that is the first to draw from both clinical science and real-world experience with athletes. That means you won't find outdated "positive self-talk" or visualization gimmicks here. No, the set of cutting-edge mental skills revealed in The Brave Athlete actually work because they challenge the source of the thoughts and feelings you don't want. The Brave Athlete is packed with practical, evidence-based solutions to

the most common mental challenges athletes face. Which of these sound like you? · Why do I have thoughts and feelings I don't want? · I wish I felt more like an athlete. · I don't think I can. · I don't achieve my goals. · Other athletes seem tougher, happier, and more badass than me. · I feel fat. · I don't cope well with injury. · People are worried about how much I exercise. · I don't like leaving my comfort zone. · When the going gets tough, the tough leave me behind. · I need to harden the f*ck up. · I keep screwing up. · I don't handle pressure well. With *The Brave Athlete: Calm the F*ck Down and Rise to the Occasion*, you can solve these problems to become mentally strong and make your brain your most powerful asset.

Swim, Bike, Run, Eat Rowman & Littlefield

Why is the Half Iron-Distance the most popular triathlon distance? Because it is the perfect length for busy athletes with demanding career and family responsibilities. Full Iron-Distance races require such painstaking planning and sacrifice that it's difficult to keep life in balance. The Half Iron-Distance is accessible, while remaining challenging. Also known as the "70.3" for the sum of its 1.2 mile swim, 56 mile bike ride, and 13.1 mile run, the half-iron triathlon is not simply a race for which an athlete can use a full-iron training regimen chopped in half. Doing so would in no way approach maximizing an athlete's performance. The races are performed at completely different intensity levels, with completely different approaches. As a result, the training is completely different. *IronFit Secrets to Half Iron-Distance Triathlon Success* does for the half-iron what *Be IronFit* has done for the full-iron. It provides three sixteen-week training programs—Competitive,

Intermediate, and "Just Finish"—and details everything an athlete needs to know to successfully prepare for and maximize performance at this racing distance. In as little as four months, any athlete can be physically and mentally ready for the world's most popular triathlon challenge.

The Triathlete Guide to Sprint and Olympic Triathlon Racing will help you discover the speed, thrill, and challenge of triathlon's most popular race distances. Not everyone has time to train for long-course triathlons. By pursuing triathlon's shorter distances, you can enjoy all the total body fitness benefits of the swim-bike-run sport and discover the unique challenges of short-course racing—all while enjoying a life outside of training. This complete guide from former pro triathletes Chris Foster and coach Ryan Bolton shares all the know-how you need to find speed and enjoy successful racing in sprint and Olympic-distance triathlons. Foster, now the Senior Editor of *Triathlete* magazine, shares his pro advice for how to set a smart race strategy, how to master

triathlon pacing, how to execute fast transitions, how to train to improve your weakness and race to your strengths. Bolton offers smart, effective sprint and Olympic triathlon training plans so you can get started right away, no matter your background. Sprint and Olympic triathlons are triathlon's most popular distances for good reasons. Experienced triathletes returning to the short course will enjoy a break from long, slow hours of training and rediscover the joy of speed. Active people looking for a new challenge can jump right into triathlon's most beginner-friendly distances. The Triathlete Guide to Sprint and Olympic Triathlon Racing makes it simple to get back up to speed in the world's most rewarding endurance sport.
